ED II

Announcement concerning Distance Learning

The second semester will continue with week 7 starting next Monday, March 23, following the Spring Break held during the present week between March 16-22. Until further notice the University has to introduce distance learning to aid your studies and to offer a platform for continuous discussions concerning the weekly topics.

Lectures

Lecture notes will be uploaded in Moodle and/or the departmental homepage before the scheduled time of the lecture. Please download the lecture notes during the given week because due to a limited storage capacity it might be necessary to remove the files from Moodle.

Please follow the revised schedule (see separate on the homepage) noting that the entire program had to be shifted by one week.

Dissection classes

Practical zoom classes will be held during the time of your dissection classes every other week starting from week 8. You will need to download **Zoom** (<https://semmelweis.zoom.us>) to your computer or the **Zoom app** to your smart phone to be able to enter the virtual classroom.

You will find a link to join your classes under your course (Anatomy 4 EM) in Moodle.

There will be weekly tests to aid your studying, therefore it is highly recommended to take a chance before the actual week ends (Sunday 12 pm).

The Department of Anatomy will provide you with further study aids in Macroscopy (videos, pin tests or photographs) and in Histology (detailed descriptions of certain slides in the form of ppt/pdf notes). to be downloaded from Moodle.

Midterm test

Since this test is an e-learning type written test it will be held as announced during week 8. (Please note, week 8 starts on March 30).

Examination exemptions cannot yet be considered without knowing when regular teaching is reintroduced following the present transitional period. However, we are eager to support our best students in gaining examination exemptions and offer them the earliest possible examination dates.

Thank you for your cooperation!
Stay safe and healthy!

Dr Andrea D Székely
Associate Professor, Course Director
