

INFORMATION

in the Department of Prosthodontics

Conservative Dentistry and Prosthodontics exam requirements:

- Specialty exam: both practical and theoretical parts appear to be accurate.
- During the practical part the candidates have to prepare a treatment plan on the basis of examination. The results of the patient's examination and treatment plan should be present to the practical examiners, according to the rules of the medical consultation.

The candidate:

- necessary for the examination at the clinic to make full use of available diagnostic tools.
- a diagnostic or therapeutic interventions may receive task that can be performed during the exam period.
- the treatment plan based on the available photo documentation must present a Power-Point presentation on the exam. You can take your own media device for the photodocumentation.
- theoretical exam administered by three patients (complex mouth rehabilitation, which can measure a candidate's professional capacity) shall take the form of a PowerPoint presentation and documented cases demonstrate the exam. This should include all the steps of the procedure (photos and a full course written) Missing case presentation, that described above do not meet, we can not accept.
- the practical part of the exam white dress is provided, the theoretical part of the tradition appropriate occasion exam clothing optional.

Please refer to the above, otherwise the specialty exam board is unable to examiner the candidates.
