Medical University of Graz

Innovative Science for Successful Business

**2nd Partnering Day
for Biomedical Research**

November 03, 2005

Development and strengthening of cooperation between innovative companies and university scientists in the fields of life sciences will be the focus of the 2nd international Partnering Day. This event is jointly organized by the Medical University of Graz, the Cluster Human.technology Styria and the Innovation Relay Centre Austria.

The Partnering Day 2005 will offer the opportunity to present your technological know-how to regional and international enterprises and research organisations in the sectors of biotechnology, pharmaceutical industry, medical and biomedical technology, medical and molecular diagnostics, medical informatics as well as implantation and transplantation technologies. Scientists and companies will have the opportunity to establish contacts, to present scientific results with industrial relevance and to identify new ways for cooperation of mutual interest.

Companies profit...

... from the technological know-how of the Medical University of Graz and of the life sciences departments of other universities. You are invited to establish contacts to scientists from all fields of life sciences and medical research, in order to efficiently promote the transfer of innovative, industry relevant research results. Illustrate your expertise and communicate your requirements concerning research and technology. Present your interests to enter into research cooperation either during a presentation, a poster or during a pre-organised bilateral dialogue.

Broad technology platform

Researchers of the Medical University of Graz and of other life sciences oriented universities as well as extramural research organisations and innovative enterprises are invited. This platform facilitates the discussion of a broad spectrum of biomedical topics. Furthermore the Partnering Day 2005 offers the opportunity of networking between the participants.

Researchers profit...

... from the possibility to contact regional and international companies. Enterprises from all fields of biomedicine are invited. Your conceptions concerning research and development are sought-for. Benefit from the possibility to present your strengths to companies. Illustrate your requests to strong partners from industry. During individual discussions you will get into face-to-face contact with representatives from industry.

Agenda

- 9.00 – 9.15 Welcome, introduction
