

INNOVÁCIÓS FRISS HÍREK

2019.04.15.

Tisztelt Érdeklődő!

Az Innovációs Igazgatóság a legújabb lehetőségeket gyűjtötte össze Önnek, kutatásai fejlesztése, támogatása érdekében.

Forduljon hozzánk bizalommal további információért!

Tisztelettel,

az Innovációs Igazgatóság munkatársai

Megjelentek a 2019. évi kutatói témapályázatok (OTKA) felhívásai

A pályázatok benyújtásával kapcsolatos részletes információkat a mellékelt „OTKA Tájékoztató” tartalmazza.

További információ az **Innovációs Igazgatóság honlapján:**

Congressionally Directed Medical Research Programs (CDMRP).

The CDMRP fills research gaps by funding high impact, high risk and high gain projects that other agencies may not venture to fund. While individual programs are unique in their focus, all of the programs managed by the CDMRP share the common goal of advancing paradigm shifting research, solutions that will lead to cures or improvements in patient care, or breakthrough technologies and resources for clinical benefit.

Horizon Impact Award

The European Commission has launched the first Horizon Impact Award. This prize acknowledges and rewards the most influential and impactful projects under Horizon 2020 or FP7.

Can you demonstrate that you have valorized your results and created a societal impact?

The prize will celebrate the best outcomes and the people who made them happen. The contest is now open to all participants who completed an FP7 or H2020 project.

Each of the five winners will receive €10 000 at the award ceremony during the European Research and Innovation days in Brussels in September. Please apply through the Funding and Tenders portal.

The deadline for submission is: 28 May 2019.

For more information about the eligibility and award criteria, please visit our website:

https://ec.europa.eu/info/research-and-innovation/funding/funding-opportunities/prizes/horizon-impact-award_en#what

If you have questions please address them to: EC-Horizon-Impact-Award@ec.europa.eu

Eurolife Summer Schools 2019

Eurolife is a network of nine prestigious academic institutions across Europe (University of Barcelona, Semmelweis University, Trinity College Dublin, University of Edinburgh, University Medical Center Göttingen, Medical University of Innsbruck, Leiden University Medical Center, Karolinska Institutet, University of Strasbourg) that facilitates collaborative research, joint postgraduate training and education, the exchange of researchers and students and the building of joint research projects.

Eurolife organises the below **Summer schools in 2019** for MSc and PhD students which are a very good vehicle for bringing together students, teachers and researchers.

- **Immune modulation in human and animal infections: impact on health, disease and therapy, Leiden**
 This year Eurolife will fund 9 grants towards students and researchers from Eurolife institutions, wishing to join the 5-day Eurolife Summer School on immunotherapy, vaccinology, microbiota interventions and drug development for infectious and hyperinflammatory diseases, including novel therapeutic approaches such as host-directed personalized therapies.
 Who can apply: (bio)medical Master students, PhD students, as well as early stage post-doctoral scientists who are interested in one or more of the following; immunology, microbiology and metabolism.
Location: Leiden, The Netherlands
Date: **July 8, 2019- July 12, 2019.**
Participation fee: free for selected students from Eurolife Consortium institutions nominated for the Eurolife Summer School grant (9 grants available, preferably 1 per Eurolife institution). Meals and accommodation are included in the participation fee. Candidates are expected to organise and fund their travel to- and from- Leiden.
Required documents for the application: Application Form, CV, reference letter from the supervisor and Motivation Letter. Documents need to be sent to eurolife@med.uni-goettingen.de.
Application deadline: **17: 00 CET, May 5, 2019.** Successful applicants will be notified by the 1st June 2019
Further information: <http://eurolifeuniversities.org/category/news/>

- **Biology of Brain Disorders (BBD) 2019: Frontiers in Innovation, Dublin**
 This year Eurolife will fund 9 grants towards students and researchers from Eurolife institutions, wishing to join the Eurolife Summer School/Workshops in Ireland. The event will consist of discussions on the fundamentals of neuroscience, followed by mechanisms that are shared across brain disorders and / or that are specific to each disorder, and also computational approaches
Who can apply: The event is open to students, and professionals with a basic background in neuroscience, psychiatry and neurology, and/or to entrepreneurs that are considering investing in the field of brain disorders.
Location: Dublin, Ireland
Date: The scientific talks will be held in Slane Castle, Co. Meath (16th-21st of June) while the innovation workshop/entrepreneurship training will be held in Trinity College Dublin Business School (22nd-25th of June).
Participation fee: free registration for selected students from Eurolife Consortium institutions nominated for the Eurolife Summer School grant (9 grants available, preferably 1 per Eurolife Institution). Please note that the grant does not cover the accommodation or travel. The selected students will be required to fund and organise their travel to and from the event, as well as the accommodation.
Required documents for the application: Application Form, CV and Motivation Letter. Documents need to be sent to eurolife@med.uni-goettingen.de.
Application deadline: **17: 00 CET, May 3, 2019.** Successful applicants will be notified by the 15th May 2019.
