

REQUIREMENT SYSTEM

SEMMELOWEIS UNIVERSITY FACULTY OF DENTISTRY Department of Conservative Dentistry
Name of subject: Clinical dentistry I-II. Type of subject: <u>compulsory</u> /obligatory elective/elective (proper one should be underlined) code: FOKOKFK146_1A, FOKOKFK146_2A credit value: clin. dent. I.: 4, clin. dent. II.: 4
Lecturer of subject: Dr. Tóth Zsuzsanna associate professor
Year: 2018/2019.
The role of this subject in realizing the objectives of this gradual course: We teach this subject together with the Prosthodontic Clinic. The objective is to attain skills to provide a complex dental care to patients, as such the knowledge of both prosthetic and conservative dental care is required, although other special care e.g. periodontology may also play an important role.
Detailed weekly curriculum: This subject only includes clinical practice, during which students perform primarily conservative and prosthodontic treatments.
Requirements of participation and possibilities of absence remedy: Participation is compulsory. More than 25% absence is not accepted under any circumstance. We cannot ensure a date to remedy absence.

Verifying absence from clinical practice or examination:

More than 25% absence is not accepted under any circumstance, therefore verifying your absence is unnecessary.

The number, topic and time of examinations during the semester (oral and written) and their retake:

All exams taken at clinical practice and practical work are valued and checked by the practice teacher.

Requirements needed for signature at the end of the semester (including number and type of work done by student):

More than 25% absence is not accepted under any circumstance.

Minimum satisfactory (2) practice grade of practice teachers' mutual consent is needed for signature.

Students receive practice grade at the end of both semesters.

Method of granting grade:

Practice grade consists of constantly valued work during the semester with mutual consent of the practice teachers.

Type of examination: none.
