

Evaluation of Comenius EVIBACE 3rd meeting at Percy Hedley, Newcastle, UK.

May 14 – 16. 2014. Theme: To Collect and Reflect.

All partner organisations represented.

Outcomes:

- **Presentation and discussions re documentation, measurement and research activities. Specific standardised assessments considered.**
PowerPoints of presentations available on TwinSpace.(Co-ordinated by ITA.)
- **Partnership discussions:** All agreed that a wide variety of outcome measures had been discussed. There are also many more available. Those discussed are not an exhaustive list but are widely available and mostly suitable for use by Conductors as well as other professionals.

It was agreed that Partner organisations would benefit from trying the tests with their child populations to see if they produce useful evidence of outcome measures suitable for working in a CE setting.

Following on from presentations by Phoenix and NICE and their work with ICF it was agreed to consider the ICF-CE work done by NICE and to map these codes onto the tests to try to establish if all areas are covered.

Different Partner organisations agreed to consider different tests and analyse their suitability for use within Conductive Education settings and attempt to map back to the ICF-CE as follows:

Percy Hedley: PEDI- CATs

Peto: GMFM & SPARKLE

Joriel: QoL CP

Phoenix: DTVPS

Inkendaal: Cognition test

NICE: GMFM & QoL CP

ITA: Attain classification data for GMFCS MACS and CFCS.
