## **ED II MAXILLOFACIAL ANATOMY**

### **Announcements**

**Signing of the lecture book:** active participation in lectures, and dissection room sessions is obligatory for every student. Students should attend at least 75% of the scheduled hours to gain a signature proving the validity of the semester. Absences are therefore limited in **25%**. Presence will be recorded in the lectures and in the dissection room classes.

**Midterm examination:** During the 4th semester, both practical and theoretical knowledge will be regularly evaluated. The midterms will be either oral and written exams. The ***maxillofacial midterm*** includes the identification of a number of anatomical and histological features in projected images as well as theoretical questions related to the subject. The ***anatomy midterm*** includes both the identification of several structures on the specimen and oral theoretical questions related to the subject.

The date of the tests is always set previously. The results of all tests will appear on the personal achievement cards.

**Evaluation** is made using a five-grade scale (1-5)

Those who fail, or absent from, both of the midterms will have to sit for an oral practical retake (exact date TBA) during the last two weeks of the semester.

*N.B. – In case neither the first nor the repeated takes of a final exam have been successful, the students may sit for a CV final examination in the **subsequent winter examination period**, in case they have „chances” left, or, may repeat the semester in the following year.*
