

EM II

CV final examinations for students both in AOKANT003_4A and AOKANT461_4

EXAMINATIONS will be held on Mondays twice during the examination period (January 7 and 28).
The exams start at 8.00 in the Histology computer laboratory (Rooms 2-3). You will be seated down in Room 3 first and then in Room 2. Second year English Dentistry (ED) and Hungarian 2nd year Medicine students will join you.

On the day of the examination, leave your bags in a locker and gather in front of the Histology lab 10 minutes before the starting time. Please make sure you have the following items on you:

ID card/student card

SeKA login details (written down on paper – just in case)

1-2 pens

Histology notebook

in case of a retake exam – **proof of payment** (except for the 1st retake)

For safety reasons you may keep your valuables (money, cards, IDs, phone etc) on you, however „large” items, or pencil cases, will be collected upon entering the examination room.

Phones and smart watches are not allowed to be with you during examinations.

The test is composed of 100 questions (only text) including approximately 30% of multiple choice questions. The questions will cover Anatomy, Histology and Embryology.

Writing time: 90 minutes.

Passing rate: 60%.

Students may view their tests for a period of 10 minutes following a final examination, however, neither questions may be asked nor notes may be taken during this time. Please note that students ARE NOT ALLOWED to leave the site of examination before, or during, the viewing period.

OLD CURRICULUM students - Upon finishing the test you will be given **2 Histology slides and a Cell Biology** question to explain.

NEW CURRICULUM STUDENTS - - Upon finishing the test you will be given **3 Histology slides** to explain.

Those who pass will continue the exam with the Morphology part in the Lenhossék Lecture Room (ground floor). Please be prepared that embryologically relevant questions may be asked in both practical parts too.

The examination will be finished in the Lecture Room, where a mark will be calculated from the marks gathered during the examination as well as from the dissection room mark given by the Tutor.

Students failing the examination, may repeat the exam only if they have chances left.

Consultations (revision): Open dissection room consultations will be available (to be announced later, please keep looking at the homepage) in the NEW DISSECTION ROOMS (top floor). There are no consultations in Histology since students may access the slide via the moodle system.

The total number of examination seats is set (200% of the number of students in a given course), therefore „chances” left will not automatically entitle the students to enroll in an examination if the actual number of a given day/week is full. I.e., the number of examination seats will not be increased.

Students not able to pass the ana4 examination during the present examination period, may enroll in the regular course (Maxillofacial Anatomy – ana4) starting in February 2019.
