

Stem cells and embryology seminars

2017. november 24.

Adam Balic:

Developing and exploiting new technologies to advance understanding of the avian immune system

2018. január 8.

Czirók András:

Extracellular matrix macro-assembly dynamics in early vertebrate embryos

2018. február 14:

Nahum Shpigel (Hebrew University, Israel)

Transplantation of Human Intestine into the Mouse: A Platform for Study of the Human Enteric Nervous System

2018. november 19.

Visnovitz Tamás:

Examination of extracellular vesicles from cardiomyocytes

2019. január 15:

Pascal de Santa Barbara

Development of visceral smooth muscle cells and associated pathologies

2019. március 25:

Sophie Creuzet: The neural crest is a brain organaizer: from development to pathophysiology

2019. április 26:

Donald Newgreen (Murdoch Children's Research Institute, Australia)

Why are developmental defects in the enteric nervous system so variably penetrant?
