

## EM II. ANNOUNCEMENTS

### MIDTERMS AND COMPETITION RULES

Due to the shortage of brain specimens the department will not be able to offer open dissection room consultation before the neuroanatomy midterm. However, it is possible to announce a „**video consultation**” to be held by Dr. Barna in the **Lenhossék lecture room** starting at **18.00 on September 30**.

The present midterms are obligatory tests therefore **attendance is mandatory**. In case of absence you will have to reattend at a different time point. Two retake times are offered:

<b>Midterm 1</b>	<b>date: week 4, 2nd class</b>
------------------	--------------------------------

1st retake: week 5, 2nd class
-------------------------------

2nd retake: week 14.
----------------------

<b>Midterm 2</b>	<b>date: week 10, during the Histology class (see in the timetable)</b>
------------------	---

1st retake: week 11, Histology class
--------------------------------------

2nd retake: week 14, last Histology class
---

An **average of 4,00** earned from the two midterms will entitle you to participate in the departmental competition where the **best 5%** (calculated on the basis of the head count of the entire course) will be given full exemption from the semifinal examination with a mark 5.

Further **partial exemptions** will be given out to students passing successfully the competition requirements but falling beyond the 5% limit, their practical examination parts will be accepted with a mark 5 in Histology and Anatomy. These students will have to sit for the written part of the examination only.

Please note, that only <b>marks given on the midterm, but not on the retakes</b> , will be used for calculating eligibility for the participation in the competition. Irrespective of the reason/cause, results of retake midterms will not be counted in the average.
