May 20, 2020

additional information:

Only those students are entitled to take the test on the exam day who registered for it in the Neptun system before.

The students of a certain exam day are asked to join a Zoom meeting 15 minutes prior to the beginning of the exam, at 14.45, with their camera turned on. They must show their identity card / passport to their camera when the attendance is checked.

They must be connected to the Zoom meeting with the camera turned on during the test, until everyone finishes. (Otherwise the exam result is not accepted.)

It is the student's responsibility to ensure that the exam is going to be uninterrupted: during the exam, he / she can only be in the room alone and not communicate with others; you cannot leave the room. For the entire duration of the exam, the students can run only the Moodle and Zoom programs on their electronic devices.

If you loose your internet connection, try to return to the test and the Zoom meeting as soon as possible and continue it.

Anatomy for students of Faculty of Pharmacy

Information on the examination period

The examination period starts on May 18, and finishes on July 3, 2020. Exam days are announced in the Neptun system. The exams are arranged within the distance learning system.

Anatomy exams are online Moodle tests, the students must take it remotely, from home. The exam consists of 25 test questions, the maximum available points are 80. Passing rate is 50% (40 points). Students are entitled to log in the Moodle system and have an attempt at the test ONLY if they are registered in Neptun. Students may be asked to identify themselves upon request. The department may limit the accessibility of the tests by using a specific password for each occasion.

Once a student has logged in to see/try the test it will automatically be considered as an attempt to pass the test, thus the number of available exam chances will be reduced. The use of illegal devices is strictly prohibited and will be followed by a disciplinary procedure.
