

SAFETY MEASURES ON THE PREMISES OF THE DEPARTMENT OF ANATOMY DURING PRACTICAL MAKE UP CLASSES AND EXAMINATIONS

Masks should be worn at all times.

Bring your own masks, the department cannot provide you with surgical face masks.

Wait in the yard keeping at least 1.5m distance from each other.

Entrance to the department is only possible following pretriage (temperature is taken, submission of the questionnaire or copies of negative PCR tests)

Only one entrance is open on the side of the dissection room wing where all three dissection rooms are accessible through the stairs.

You may only be on the premises during the times of make up classes and the examination.

You cannot use the lockers while being in the department, so please try to have only the most necessary items on you which could be taken into the dissection rooms with you. You will be able to hang up your belongings on the racks.

The department will provide you with one piece of disposable protective clothing made of non-woven fabric which you will have to wear in the dissection room classes as well as for the examination. You will have to keep it with you for the entire length of the visits.

The dissection rooms will be cleaned and sanitized between each turn/rounds of classes so you will have to immediately leave when the class is over.

Practical examinations will be held in the lecture rooms if not otherwise stated on the days you registered for in neptun.

Before the examination wait in the yard keeping at least 1.5m distance from each other.

Once the examination is finished, leave the building AND the yard immediately.

Second year students will see their results in neptun once the sheets are corrected and all marks are counted together.
