Complete name of the course: Anatomy (theory) + Anatomy (practice)

Name of the Programme: Pharmacy Basic Education

Abbreviated name of the course: Anatomy (theory) + Anatomy (practice)

English name of the course: Anatomy (theory) + Anatomy (practice)

Neptun-Code: GYKANT118E1A + GYKANT118G1A

Type of registration: obligatory

Institute: Department of Anatomy, Histology and Embryology

Name of the tutor/lecturer:
Dr. Csáki Ágnes
Phone:
E-Mail: csaki.agnes@med.semmelweis-univ.hu

Academic degree:
associated professor, Ph.D.

Further tutors:
Dr. Halász Vanda
Dr. Herberth-Minkó Krisztina
Szászné Dr. Kocsis Katalin
Dr. Kozsurek Márk
Pecsénye-Fejszá Nóra
Dr. Puskár Zita
Dr. Tóth Zsuzsanna Emese

Academic degree:
assistant lecturer
assistant professor, Ph.D.
assistant professor, Ph.D.
assistant professor, Ph.D.
assistant lecturer
senior research fellow, Ph.D.
senior research fellow, Ph.D.

Number of classes /week:
2 lecture / week + 2 practice / week

Credit points:
2 (GYKANT118E1A)
0 (GYKANT118G1A)

Course principles:
- to teach the terminology of the human anatomy to the future pharmacists
- to discuss those special anatomical and physiological conditions, which may influence the therapeutical considerations;
- to discuss those anatomical conditions, which are necessary for the understanding of the further medical subjects of the pharmacists' studies;
- to teach the terminology (Latin and English) of human body parts (at a gross and microscopical anatomical level) necessary for the understanding of the medical language during the communication between the pharmacists and the doctors.

Special attention is required concerning the anatomy of the central nervous system and the digestive tract, the absorption of medicines and their mechanism of action.

Brief course summary:
The lectures include all topics of anatomy, histology and embryology. Locomotor system, internal organs, nervous system, general and detailed histology, general embryology and development of organs are the topics of the lectures. During the dissection room practices the tutors discuss and demonstrate some chapters of anatomy of the locomotor system, internal organs and nervous system. During the histology lab practices, after a short introduction, the students can examine the most important sections with an electronic histology system.

I. Lecture topics/week

1. week:
   1. Introduction, Locomotor System
   2. Skull, vertebral column, head, neck muscles

2. week:
   3. Basic tissues I
   4. Basic tissues II, Skin

3. week:
   5. The Immune System, the Lymphoid Organs
   6. Blood, hematopoiesis

4. week:
   7. Heart, the Vascular System
   8. The Respiratory System, the Mechanics of Breathing

5. week:
   9. The Digestive System I, abdominal cavity
   10. The Digestive System II

6. week:
   11. The Liver, the Pancreas
   12. The Kidneys and the Urinary tract

7. week:
   13. The Female Reproductive Organs, cycle
   14. The Male Reproductive Organs, Pelvis

8. week:
   15.-16. Midterm

9. week:
   17. Nervous System introduction (synapses, neurotransmitters) Spinal cord, spinal nerves
   18. Central Nervous System, meninges, blood supply, CSF, Encephalon, Spinal cord, Spinal nerves

10. week:
    19. Motor system, Sensory system, Limbic system
    20. Cranial nerves, The Autonomic Nervous System

11. week:
    21. The Eyeball and Visual system
    22. The Organ of Hearing and Equilibrium.

12. week:
    23. Hypothalamus, the Endocrine Organs I
    24. The Endocrine Organs II

13. week:
    25. Germ cells, Fertilization, Development of the fetus, Placenta,
    26. Teratology

14. week:
    27. Development of the Digestive System and Reproductive organs
    28. Malformations

II. Practice topics/week

1. week: Introduction, upper and lower limbs
2. week: basic tissues, skin
3. week: skull, vertebral column, head, neck muscles
4. week: histology of the blood, vessels and the lymphoid organs
5. week: respiratory tract, thoracic cavity
6. week: respiratory tract histology, gastrointestinal tract histology I.
7. week: heart, large vessels
8. week: gastrointestinal tract histology II.; kidney and urinary tract histology
9. week: gastrointestinal tract, abdominal cavity
10. week: genital organs histology, spermatogenesis, oogenesis
11. week: urogenital system, pelvis
12. week: nervous system and sensory organs histology
13. week: nervous system: brain, spinal cord, cranial nerves, spinal nerves, main vessels and nerves on limbs, sensory organs
14. week: endocrine organs, placenta
