

250 years of EXCELLENCE in
medical education, research &
innovation and healthcare

SEMMEWEIS UNIVERSITY

Faculty of Medicine

Department of Anatomy, Histology and Embryology

Head of Department

Dr. Alán Alpár

Professor

February 11. 2021

ED I.

Macroscopic Anatomy II.

Announcements and subject matter of the 2nd semester

- I. **Macroscopy of the cardiovascular system** (heart, blood vessels in general, pulmonary circulation, systemic circulation, veins)
- II. **Macroscopy of internal organs** (gastrointestinal tract , respiratory tract, urogenital tract, separation of body cavities, peritoneum, pelvic floor, perineum)
- III. **Maxillofacial Anatomy** (morphology of the head & neck region, morphology of teeth)

Acceptance of the semester

Active participation in dissection room lab sessions is obligatory. Students should attend at least 75% of the scheduled hours, as well as successfully passing the obligatory midterm test, to gain a signature proving the validity of the semester. Absences are therefore limited in 25%.

Obligatory midterm test

Internal organs: Cardiovascular, gastrointestinal and respiratory tracts (except for the head&neck region) retroperitoneum, urogenital system, perineal region

Date: Week 9, April 13

In case of absence, or an unsuccessful midterm result, students will have to attend a retake exam(TBA).

The semester is only accepted if the midterm is successfully passed (with at least a mark 2).

Non-obligatory practical assessments

Date: Week 14, May 21. last practical class

- Topics :**
- *Upper and lower limbs
 - *Internal organs (except for the viscera of the head & neck region)

***Exemptions:** Students earning marks 3, 4 or 5 in the non-obligatory practical assessments **may request** an exemption from the relevant practical parts of the final examination. Here their marks will be counted in the result of the final examination upon successfully passing the written part.

Exam competition

We invite our students having a valid mark from the 1st semester to participate in a written competition test from the topics of the 2 semesters of the subject. Students achieving good marks (4 or 5) at the test may be exempted from written part of the final examination. The best 5 students are invited to participate in a Macroscopy pin test to determine the final order of competitors.

Final examination

Topics: Subject matter of the two semesters of Macroscopic Anatomy

Only those students are eligible to sit for the final examination who have successfully finished their dissection task

The final exam consists of practical and theoretical parts:

1. Written pretest (Macroscopic Anatomy questions)
2. Oral examination (Identification of structures on anatomical prosections, including relevant theoretical questions)

The final result of the examination is calculated from 5 partial marks

1. Written test (unless exempted)
2. *Limbs
3. *Internal organs (except for those in the head&neck region)
4. Maxillofacial Anatomy specimens
5. Macroscopy of the central nervous system (brain and spinal cord)
