

Information about Midterms of Anatomy subject

There are two Midterms from Anatomy. These Midterms are not compulsory. According to the „Study and Examination Regulations” Article 28 (4): „result of ... non-compulsory assessments can be taken into consideration when ... forming the term grade or examination grade”. On the base of the result of the two successful (at least grade 2, more than 50% of the points) Midterms an exam grade is formed, acceptance of it is not obligatory.

Time and topics of Midterms:

- 1st Midterm: 10th week, 21/04/2021, Wednesday, 14:50 (topics: locomotor system, basic tissues, internal organs) (maximum: 60 points)
- 2nd Midterm: 14th week, 19/05/2021, Wednesday, 14:50 (topics: central and peripheral nervous system, sensory organs, endocrine system) (maximum: 20 points)

Mode of Midterms

- Midterms are Moodle tests. At the beginning of the exam, at 14.50, students are asked to join a Zoom meeting (link will be provided at the Midterm site on Moodle) with their camera turned on, and they are asked to keep their camera turned on during the Midterm. Password needed to start the test given via Zoom meeting.

Forming of semifinal grade

If both Midterms are successful (at least grade 2, more than 50% of the points), according to the sum of the two Midterms, a semifinal grade is formed.

- 40,1-50 point: 2
- 50,1-60 point: 3
- 60,1-70 point: 4
- 70,1-80 point: 5

Those students, who do not accept the grade, can take an exam in the exam's period. Those students, who accept the grade calculated on the base of the two Midterms, are asked to register on the Neptun to the exam of 25/05/2021.
