Subject matter of the 1st semester
Macroscopic Anatomy and Embryology I.

Macroscopy and clinically oriented anatomy of the parts of the musculoskeletal system
- osteology
- arthrology
- myology (except for the muscles of mastication, facial expression and neck muscles)
- vascular* and nervous supply of the limbs and the trunk
  (*arteries starting from the brachial or femoral arteries)

Skull (viscerocranium, neurocranium).

Macroscopy of the brain and spinal cord, membranes (dura, arachnoid and pia mater).

General Embryology

Test I. (OBLIGATORY ORAL MIDTERM EXAMINATION)
Topics: Gross anatomy of the limbs, together with their girdles (bones, joints, muscles and fasciae, action, innervation, blood supply)
  Date: 8th week

Test II. (ELECTIVE/ NOT OBLIGATORY ORAL TEST)
Topics: Musculoskeletal system. Skull, bones and spaces. Macroscopy of the brain and spinal cord
  Date: 14th week.

Semifinal examination
Topics: Subject matter of the semester

1) Written ‘e-learning type’ pretest

2) Practical examination and theoretical questions (oral examination)
Gross anatomy of the musculoskeletal system including the skull including relevant developmental questions.
Gross anatomy of the CNS and peripheral nerves

ED I  ANNOUNCEMENTS

Evaluation is made using a five-grade scale (1-5).

Semester acceptance (i.e. signature):

1. Active participation in dissection room lab sessions is obligatory. Students should attend at least 75% of the scheduled hours to gain a signature proving the validity of the semester. Absences are therefore limited in 25%.
2. Successful obligatory midterm test passed with at least a mark 2.

Midterm examinations: During the semester, both practical and theoretical knowledge will regularly be evaluated. Anatomy mid-terms are held as oral/practical tests. The test will include both identification of several structures on the specimen and theoretical questions related to the subject. The results of all tests will appear on the personal achievement cards.

Test 1 is obligatory and will have to be taken only on the date specified in the Midterm announcement. Midterms cannot be retaken to „upgrade“ the mark. Unsuccessful midterms will have to be retaken or in case the student was absent from the midterm test. Two retake possibilities are offered during the last two weeks of the semester.

Test 2 is not obligatory and students who pass the test with a 3-4-5 will be exempted* from the practical part of the semifinal examination with the mark earned at the test. This test cannot be retaken.

Cadaver dissection – every students is required to produce a fully dissected specimen during the 1st or the 2nd semester to prove excellence and be exempted from the dissection part of the final examination. The specimen will be evaluated by a departmental jury.

Semifinal examinations are composed of the following parts:

1. written pretest
2. oral examination (unless exempted*) - composed of practical and theoretical questions in Macrosopy i.e., identification and full description of the morphological features of the relevant body parts and. Please note, that relevant theoretical and Embryology questions may arise during the practical examination parts.

Please note:

In case neither the first nor the repeated takes of a semifinal exam have been successful the exam has to be postponed to the following exam period as a ‘CV’ exam (if there are possibilities left). Students may apply with the department to be exempted from passing the prerequisite.

RULES AND REGULATIONS IN THE DISSECTING ROOM

Students are expected to be prepared for the practical work.

Everybody is supposed to behave in the dissecting room conforming to the spirit of the site. Loud speech, out-of-place jokes and any kind of behaviour, disregarding the dignity of human corpses, should strictly be avoided.

Students should take care of the equipment of the dissecting room. Do not sit on the dissection tables or stand on the tripod stools to avoid accidents. Fire and work safety regulations should be maintained. The dissection room is a hazard area. Cleanliness and order should be kept. The white lab coats should be worn while in the dissection room, to protect one’s clothing from contacting the cadaver specimen.

Working in the dissection room involves the use of sharp and pointed tools, injuries should be reported to the lab instructor. The technical personnel will provide first aid when necessary.

Only the members of the study group can participate in the sessions, visitors may be present only with the permission by the lab instructor. Students can leave the sessions only with the approval of the lab instructor.

Photos of the black board drawings can only be made with the agreement of the lab instructor.

Specimen preparations should be wrapped and labeled. Dissection materials of other groups or individuals should not be handled. Dissected cadaver pieces should be discarded in a designated container and discarded blades have to be collected separately.

Dissecting rooms are closed between 6:00 PM to 8:00 AM and over the weekends (with the exception of special workdays appearing in the schedule). Students may not stay in the dissecting room without the supervision of one of the assistants of the department. In the absence of an instructor, the technical personnel should ask the students to leave the dissecting room.

IT IS STRICTLY FORBIDDEN TO eat, drink, to chew a gum, or to use music devices. Bags and coats should ALWAYS be left in the lockers PRIOR TO entering the dissecting room. The lockers will have to be locked using your OWN padlocks. Please, remember to keep your valuables always on you, or lock them in the lockers. The department takes no responsibility for lost items.

SMOKING IS STRICTLY FORBIDDEN ON THE DEPARTMENTAL PREMISES, INCLUDING THE GARDEN AND THE YARD
