September 2023

MICROSCOPIC ANATOMY AND EMBRYOLOGY II HANDBOOK

Dr. Andrea D. Székely
Associate Professor

Course Director of the English Language Program

Dr. Gábor Gerber
Associate Professor

Head of the Anatomy, Histology and Embryology subjects for the Faculty of Dentistry
Dean of the Faculty of Dentistry

Microscopic Anatomy and Embryology II

TEACHING DEPARTMENT:

SEMMELWEIS UNIVERSITY

Department of Anatomy, Histology and Embryology

Budapest, Tűzoltó utca 58.

H-1094 Budapest

<http://semmelweis.hu/anatomia>

LEARNING OBJECTIVES

Demonstration of the fine structure of cells and tissues composing the organs of the human body specifically to provide the future doctors of dental medicine with a valid body of information describing the microscopical elements of clinically significant morphological structures (including cell biology, general histology and the histology of organs).

General embryology demonstrates the steps of the formation of a new human being together with the stages of intrauterine development, including the clinically relevant aspects of the development of organ systems. Teaching is done in the form of lectures and histology laboratory classes

Competences acquired by completion of the course:

Understanding the microscopical composition of the human body together with the understanding of human development in order to draw parallels with macroscopical anatomy. Clear understanding of histological structure and function. Ability to identify basic structural elements within the tissue specimen. Identification of general directions/landmarks within digitized tissue slides.

LECTURES: First semester: 2 x 45 min; second semester: 2 x 45 min.

PRACTICAL CLASSES: First semester: 2 x 45 min; second semester: 2 x 45 min.

ECTS CREDITS: Altogether 8 (first semester: 4; second semester: 4).

MIDTERM TESTS: Written (in the Moodle system)

ACCEPTENCE OF THE SEMESTER:

Active participation in laboratory sessions is obligatory for every student. Students should attend at least 75% of the scheduled hours to gain a signature proving the validity of the semester. Absences are therefore limited in **25%**. Attendance will be recorded in the classes.

TYPE OF EXAMS: oral and written

The final examination consists of written and oral (practical and theoretical) parts

1. Written pretest (e-learning module – access to SeKA account is obligatory)
2. Oral examination (identification of structures on digitized histological slides) including relevant theoretical questions from the fields of Histology and Embryology

COURSE DESCRIPTION

Microscopic Anatomy and Embryology II.

Lectures and histology classes

Subject matter: Histology of the lymphatic system, together with the histology and developmental aspects of the central and peripheral nervous systems, endocrine organs and organs of special senses, including the skin.

Credits: 4

Prerequisites: Macroscopic Anatomy II (successful final examination)
Microscopic Anatomy and Embryology I (successful examination)

Academic Year 2023/2024 Faculty of Dentistry
ED II. Microscopic Anatomy and Embryology II.

Weeks	Lectures <i>Tuesdays 10.00 - 11.45</i>	Lecturer	Histology laboratory <i>Tuesdays 15.00-16.30</i>
Week 1 09. 4-8.	1. Blood, corpuscular elements of blood. Bone marrow, erythropoiesis, leukopoiesis 2. Cellular components of lymphatic tissue. Thymus, tonsils, MALT	1 Puskár 2 Puskár	Blood Lymphatic system I. – tonsils
Week 2 09. 11-15.	3. Structure and circulation of lymph nodes and spleen 4. Nerve tissue: neurons and glial cells, synapses, receptors and effectors	3 Puskár 4 Vereczki	Lymphatic system II. - thymus, lymph node, spleen
Week 3 09. 18-22.	5. Differentiation of the neural tube. Cranio-caudal and dorso-ventral differentiation. Differentiation of the brain vesicles 6. Formation and derivatives of the neural crest and placode ectoderm	5 Kozsurek 6 Minkó	Nerve tissue, PNS
Week 4 09. 25 - 29.	7. Microscopy of the CNS – Fine structure of the spinal cord. Spinal reflexes, receptors and effectors 8. Brain tracts, neurotransmitters, neuronal circuits, “connectomics” Structure of the cerebral cortex	7 Gerber 8 Székely	<i>Microscopy of the CNS – consultation I.</i> <i>Spinal reflexes, development of the spinal cord + slides</i>
Week 5 10. 2-6.	9. Central autonomic nervous system. Monoaminergic and cholinergic neurones and pathways. „Ascending Reticular Activating System” (ARAS) 10. Somato- and viscerosensory systems. Sensory pathways	9 Kozsurek 10 Vereczki	Nerve tissue, CNS (slides) <i>Brodman areas</i>
Week 6 10. 9-13.	11. Functional connectivity of the sensory cortex, thalamus and insula. Somato- and viscerosensory innervation of the head-and neck region (trigeminal system) 12. Neuroanatomy of pain.	11 Shahbazi 12 Gerber	<i>Microscopy of the CNS – consultation II.</i> <i>Sensory pathways</i> <i>Development of the telencephalon</i> <i>+slides</i>
Week 7 10. 16-20.	13. Neuroanatomy of movements/locomotion I. Somatomotor cortical tracts. Visceromotor system, control of micturition 14. Structure of the cerebellum, cerebellar connections	13 Vereczki 14 Tóth	<i>Microscopy of the CNS – consultation III.</i> <i>Motor systems</i> <i>Structure, connectivity and development of the cerebellum</i>
Week 8 10. 23-27. <i>Oct.23. is a National Holiday</i>	15. Neuroanatomy of movements/locomotion II. Planning /programming of and eliciting movements. Gait control mechanism. The role of cerebellum and basal ganglia 16. External ear, middle ear.	15 Vereczki 16 Gallatz	<u>Midterm test 1</u> <i>Blood, lymphatic organs, microscopy of the CNS</i>
Week 9 10. 30. - 11. 3. <i>Nov. 1 is a National Holiday</i>	17. Inner ear. Bony and membranous labyrinth. Development of the organ of hearing. 18. Control of balance / posture together with the movements of the eye and head. Perception of spatial position	17 Tóth 18 Tóth	Organ of hearing and equilibrium (slides) <i>External ocular muscles (revision)</i>
Week 10 11. 6-10.	19. Spiral organ of Corti. Auditory pathway. Neuroanatomy of hearing, understanding and control of speech. 20. Fibrous and vascular coats of the eyeball. Lacrimal gland, lacrimal apparatus.	19 Puskár 20 Barna	Organ of vision I. <i>Innervation of the lacrimal gland</i>
Week 11 11. 13-17.	21. Inner coat of the eyeball, retina. Development of the eye 22. Neuroanatomy of vision. Visual pathway, visual recognition, orientation in space.	21 Lendvai 22 Lendvai	Organ of vision II.
Week 12 11. 20-24.	23. Circadian rythm, sleep/wake cycle; neuroanatomy of resting state and activation. 24. Endocrine system: Hypothalamus, the hypothalamo-hypophysial system, epiphysis	23 Gerber 24 Tóth	Endocrine organs I.
Week 13 11. 27 - 12. 1.	25. Taste sensation and olfaction. Limbic system. 26. Neuroanatomy of energy metabolism, food intake, hedonism and addiction	25 Gallatz 26 Gerber	<u>Midterm test 2</u> <i>Endocrine organs I.</i> <i>Organs of special senses</i>
Week 14 12. 4-8.	27. Neuroanatomy of emotions, motivation, aggression, empathy and behaviour. The reward system. 28. Neuroanatomy of stress, fear, anxiety and depression. Determination, alertness, personality, consciousness, well-being.	27 Vereczki 28 Gerber	Endocrine organs II Skin as a sensory organ

List of slides (FOK series)

2022/2023

1st semester

Weeks	Histology laboratory <i>Tuesdays 15.00-16.30</i>	
Week 1 09. 4-8.	Blood 52. Blood smear (MGG) Lymphatic system I. 47. Palatine tonsil (HE) 48. Lingual tonsil (HE)	<i>DEM</i> <i>ÁOK</i> 42. Palatine tonsil (T/B cell IHC) <i>ÁOK</i> 48. Pharyngeal tonsil (HE)
Week 2 09. 11-15.	Lymphatic system II. 49. Thymus (HE) 44. Lymph node (HE) 45. Spleen (HE)	<i>DEM</i> <i>ÁOK</i> 1.a, b Spleen (T/B cell IHC)
Week 3 09. 18-22.	Histology of the peripheral nervous system 36. Peripheral nerve (cross section, HE) 37. Pseudounipolar neurones (DRG, HE) 38. Multipolar neurones (autonomic ggl, AgNO ₃ impregnation) 43. Motor end plate (striated muscle, ACh esterase histochemistry)	<i>DEM</i> <i>Peripheral nerve (OsO₄ impregnation)</i> <i>6. nerves in the skin(HE)</i>
Week 4 09. 25 - 29.	<i>Microscopy of the CNS – consultation I. Spinal reflexes, development of the spinal cord</i> 39. Spinal cord (multipolar neurones, Nissl) & Autonomic ganglia in hollow organs	
Week 5 10. 2-6.	Histology of the central nervous system + <i>major Brodmann areas</i> 40. Cerebral cortex (pyramidal neurones, Bielschowsky) 42. Cerebral cortex (pyramidal neurones, Golgi) 94. Hippocampus (HE)	
Week 6 10. 9-13.	<i>Microscopy of the CNS – consultation II. Sensory pathways & Development of the telencephalon</i> 99. Mesencephalon (Luxol fast blue + Nissl) 100. medulla oblongata (Luxol fast blue + Nissl)	
Week 7 10. 16-20.	<i>Microscopy of the CNS – consultation III. Motor systems & Structure, connectivity and development of the cerebellum</i> 95. Cerebellar cortex (HE) 41. Cerebellar cortex (GFAP ICC)	
Week 8 10. 23-27. <i>Oct.23. is a National Holiday</i>	<u>Midterm test 1</u> <i>Blood, lymphatic organs, microscopy of the CNS</i>	
Week 9 10. 30. - 11. 3. <i>Nov. 1 is a National Holiday</i>	Histology of the organ of hearing & equilibrium 98. Cochlea (semithin section, toluidine blue) Macula (semithin section, toluidine blue) Ear lobe (Verhoeff's stain)	<i>External ocular muscles (revision)</i>
Week 10 11. 6-10.	Histology of the organ of vision I. 96. Eye bulb (HE) 33. Lacrimal gland (HE)	
Week 11 11. 13-17.	Histology of the organ of vision II. 97. Retina (semithin section, toluidine blue) 9. Pigment epithelium (unstained)	
Week 12 11. 20-24.	Endocrine system I. 90. Epiphysis/ pineal body (HE) 86. Hypophysis/ pituitary gland (HE) 87. Hypophysis/ pituitary gland (chrom–hematoxyline–phloxin/Gömöri)	<i>DEM</i> 74. Leydig cells, testicle (HE) 78. Ovarian follicles (HE) 79. Corpus luteum (HE)
Week 13 11. 27 - 12. 1.	<u>Midterm test 2</u> <i>Endocrine organs I. & Organs of special senses</i>	
Week 14 12. 4-8.	Endocrine system II. 88. Thyroid gland (HE) 89. Parathyroid gland (HE) 92. Adrenal/suprarenal gland (HE) Histology of the skin 6. Palm skin (HE) 11. Scalp/hairy skin (HE)	<i>DEM</i> 70. Islets of Langerhans, pancreas (HE)

ED II. Microscopic Anatomy and Embryology II.

Subject matter of the present semester

I. Histology of the blood, lymphatic organs and the nervous system

- a) Corpuscular elements of blood
- b) Histology of lymphoid tissue (lymph nodes, thymus, tonsils, spleen)
- c) Fine structure of peripheral nerves, neurons and supporting elements
- d) Receptors and effectors, interneuronal synapses
- e) Histology of the brain and spinal cord

II. Microscopy of the central nervous system, i.e., NEUROANATOMY *

- a) Microscopic anatomy of brain and spinal cord
- b) Nuclei and tracts of brain and spinal cord
- c) Microscopy of the autonomic nervous system, tracts

III. Organs of special senses (histology and embryology)

- a) Organ of vision, visual pathways
- b) Organ of hearing and equilibrium, auditory pathways, vestibular system
- c) Organ of smell, olfactory pathways
- d) Organ of taste, gustatory pathways
- e) Skin and appendages

IV. Endocrine organs (histology and embryology)

- a) Hypothalamo-hypophysial system
- b) Endocrine glands and cells

V. Development of the nervous system and organs of special senses

- a) Development and primary differentiation of the neural tube
- b) Development of the peripheral nervous system (neural crest, placodes)
- c) Development of the organ of vision
- d) Development of the organ of hearing&equilibrium

*The * Neuroanatomy topics will be discussed during the consultations I-III. in weeks 4, 6 and 7.*

week 6 - lectures 4,5,6;

week 7 – lectures 7,8,9,10;

week 7 – lectures 11,12

*Consultations start with a **brief moodle test** composed of 10 questions of the topic of the daily class (referring to the relevant lectures) to test the preparatory work of students.*

Passing rate is 50%. Each test scores 10 points, therefore altogether 30 points can be collected from the tests.

*Students achieving **less than 15 points** from all three tests will receive a ***relevant additional oral question** (see the Topic list) included in their final examination.*

Announcements

Evaluation is made using a five-grade scale (1-5).

Acceptance of the semester (signature)

1. Active participation in histology lab sessions is obligatory. Students should attend **at least 75% of the scheduled hours**, including the obligatory midterm examinations. Absences are therefore limited in **25%**.
2. **Successful midterm tests (passing with at least a 2).**

MIDTERM TESTS

- Midterm test I.** Written (Moodle)
Date: 8th week
Topics: Histology of blood, lymphatic system, microscopy of the CNS (*except for the basal ganglia*)
- Midterm test II.** Written (Moodle)
Date: 13th week
Topics: Endocrine organs I.; Organs of special senses

*Midterm tests are **obligatory** tests, they can only be done on the day specified previously, and unless they are unsuccessful, they **cannot be retaken or upgraded.***

***Unsuccessful midterms** (i.e., fail – 1) will have to be retaken at the given timepoints (weeks 9 and 14).*

EXAM COMPETITION – every student, who collected at least **15 points** from the brief CNS tests AND whose **midterm marks are 4 or 5**, are invited to participate in a written competition on week 14.

Topic list- Subject matter of the two semesters

Students achieving **the level of a 4 or 5** at the competition may request **to be exempted from the written** part of the final examination.

FINAL EXAMINATION

Topics: Subject matter of the two semesters

1. Written pretest (moodle, *unless exempted*)
2. Oral examination – (see the Topic list)
 - a) Identification of structures on 1 digitized tissue slide
 - b) 1 topic from the Microscopy of the CNS (i.e., Neuroanatomy)
 - c) *A further question from the topics of CNS tests whose cumulative score is less than 15 points collected from the test during weeks 6-7-8 (*see above)*

The final mark is calculated from all 3 partial marks earned from each part.

Please note: *Students may register for, or deregister from, the examinations via the neptun system.*

In case neither the first nor the repeated takes of a semifinal exam have been successful the exam has to be postponed to the following exam period as a 'CV' exam (if there are possibilities left).

WORK / ENVIRONMENTAL PROTOCOL

GENERAL RULES

1. Frequently wash your hands using soap and warm water.
2. Sanitise your hand frequently.
3. Do not touch your face or eye.
4. It is **STRICTLY FORBIDDEN** to consume food, drinks or chewing gum **anywhere** on the premises of the department (including lecture halls, dissection rooms, histology laboratories or on the hallways, staircases).
5. Use paper tissues in case you cough or sneeze and dispose of them immediately in the designated bins.

SPECIFIC RULES CONCERNING THE HISTOLOGY LABORATORIES

- | |
|---|
| <ol style="list-style-type: none">1. You may clean the surfaces with hygienic towels before you start using them.2. Food and drinks are strictly forbidden in the Histology laboratory. |
|---|

FIRE SAFETY PROTOCOL

Please make sure to adhere to the rules of fire safety regulation with full compliance, paying special attention to the following:

1. The use of naked light or smoking is **STRICTLY PROHIBITED** on the premises of the Department, including the building and the yard.
2. In case of fire, a loud fire alarm signal is to ring throughout the building. In case of a fire drill, the building must be left organized, with the guidance of the teacher/instructor of the group, using the exits as quick as possible. Escape routes are posted on every floor.
3. The use of elevators is **STRICTLY PROHIBITED** during a fire drill.
4. Every lecture room has 3 accessible entrances/exits. Students usually enter and leave through the lower single entrance under normal circumstances. When necessary, i.e. in case of fire, the upper 2 doors could also be opened using the keys kept in the fire cassettes next to the doors.
5. All fire cases or signs/ suspicion of a possible fire should be reported to the teacher of the group.
6. No electrical devices should be plugged in a connector different from the designated ones. Only electrical devices in an intact and perfect condition should be used.

To be downloaded from the homepage of the Department of Anatomy, Histology and Embryology (<http://semmelweis.hu/anatomia>) or from Knowledgebase on the Library homepage: (https://lib.semmelweis.hu/knowledge_base).

ANNOUNCEMENTS CONCERNING THE FINAL EXAMINATIONS IN MICROSCOPIC ANATOMY AND EMBRYOLOGY

Final examinations are generally held on Tuesdays and Thursdays during the examination period starting

at 12.00 or as it appears in Neptun

(the starting time of the exam may change according to the number of students registered)

REGISTRATION ISSUES

Registration has to be done in neptun according to the Study and Examination Policy. Registration closes 24/23 hours before the actual exam time.

Absences – no-show at the semifinal examination reduces the remaining examination possibilities and Students will have to pay a missed examination fee via neptun.

In case of health problems, students will have to present a **doctor's note within 3 working days** to be evaluated by the Head of Department. If accepted, the number of the student's examination possibilities will not be reduced.

On the day of the examination, leave your bags in a locker and gather in front of the Histology lab 10 minutes before starting time. Please make sure you have the following items on you:

ID card/student card (you may not start the examination without it)
SeKA login details (memorize or write them down on a small piece of paper) *
a pen or pencil to aid you with the explanation of the slides and the oral question
in case of a retake exam – proof of payment (except for the 1st retake)

*Students who cannot login /forgot their password will be considered as „absent“ (see above) and have to sit for the examination on a different day

Phones and smart watches have to be stored elsewhere during examinations. Neither pens+papers may be with you during the written part. You cannot take notes or talk to your peers during the examination. Students found to use such items or breaking the aforementioned rules will be immediately suspended, the case recorded and the examination is terminated with a fail (1).

For safety reasons you may keep your valuables (money, cards, IDs, etc) on you, however „large“ items, such as phones (switched off), tablets (switched off) and pencil cases will be collected upon entering the examination room.

No chewing gum, no food, no drinks are allowed while on the premises

PARTS OF THE SEMIFINAL EXAMINATION

WRITTEN PART (Students may not leave the room during the test)

The test is composed of 40 simple / multiple choice questions

(Histology, Microscopy of CNS, Embryology:CNS, endocrine organs, organs of special senses)

Writing time: 40 minutes

Passing rate: 20 points = 50% (0-50%-fail, 50% - satisfactory, 65% - average, 75% - good, 85% - excellent)

- Following the completion of the test Students may view their results, however, neither questions may be asked nor notes may be taken during this time. Students may not leave the room before the inspection time expires.
- Students not reaching 50% percent in the written part cannot continue (i.e. fail) the examination and should leave.

- Students failing the examination in a subsequent practical part may be exempted from the written test during the retake examination if they gained an **average (3)**, **good (4)**, or **excellent (5)**, result from the written test.

ORAL / PRACTICAL PART

This part is also held in the Histology Laboratory. The oral examination consists of

- 2 digitized tissue slides (description)
- 1 theoretical question from a topic of the material studied during the two semesters (see the Topic list).

Further questions, other than the identification of the presented specimens, may arise, e.g. discussing the theoretical or developmental relevances. Students may be asked to produce schematic drawings as part of the examination (e.g. reflexes, cross sections of the brain stem or schematic drawings of histological images).

MARKING SYSTEM

The examination finishes in the Histology room, where Students are given a mark calculated from all the marks they earned during the examination.

- If one part of an examination results in fail (1), the entire examination is terminated with a fail (1).
- In case the result of one of the parts is **1/2**, the overall result of the examination CANNOT be better than a pass (2). This mark can only be earned once during the examination.
- **Students failing the examination, may repeat the exam once „free“, every further attempt will be charged for.** The total number of examination seats is set (200% of the number of students in a given course), therefore the number of examination seats will not be increased*.
- Students may request in writing to sit for an oral theory exam to replace the written part in case of a 2nd or 3rd retake examination. A request will have to be sent to the Course Director 48 hours before the examination day.
- **Retake of a successful examination** - students unhappy with the result of the examination may apply in writing with the Course Director, to retry the examination. They will be registered by the Course Director in neptun. ***Please note, that such a retake examination does not necessarily result in a better mark.***
- **Technical problems** concerning registration or deregistration via the neptun system are beyond the scope of the Department, Students should seek help from the neptun group of the Secretariat.
- The Registrar of the English Secretariat is not entitled to register or deregister students with the only exception of using the 4th chance upon getting the Dean's permission.

TOPICS OF THE FINAL EXAMINATION

(topics of the two semesters)

General Histology

Concept of basic tissues

Definition and classification of epithelial tissue

Simple epithelia

Stratified epithelia

Glandular epithelia

Pigment epithelium, sensory neuroepithelium

Cells of connective tissue

Ground substance and fibres of connective tissue

Types of connective tissue

Blood and the corpuscular elements of blood

Histology of the bone marrow, maturation of erythrocytes and platelets

Differentiation of granulocytes, lymphocytes and monocytes

Histology of cartilage and bone tissue

Intramembranous ossification. Endochondral ossification. Growth and remodeling of bone

Smooth muscle and myoepithelial cells

Skeletal muscle tissue

Cardiac muscle tissue

Histology of arteries and arterioles

Histology of veins and capillaries

Histology of organs

Wall structure of hollow organs

General composition of parenchymal (solid/compact) organs

Histology of the lip and tongue

Histology of the respiratory tract. Larynx. Trachea. Lung

Histology of the esophagus and stomach

Histology of the small and large intestines. Fine structure of the intestinal villi, enteroendocrine system

Histology of the liver. Gall bladder, biliary ducts

Histology of the pancreas

Histology of kidney. Ureter. Urinary bladder

Histology of the male and female gonads and genital organs/ducts

Histology of the uterus (proliferative, secretory phases) menstrual cycle, vagina

Histology and development of skin appendages, mammary gland

Maxillofacial Histology and Embryology

Enamel

Amelogenesis

Dentin

Dentinogenesis

Structure of the dental papilla

Cementum (two types)

Parodontium

Gingiva – subdivisions and histology

Tooth development
Tooth eruption
Development of the mandible and maxilla
Development of the face. Formation of the nasal cavity and paranasal sinuses
Microscopic Anatomy and development of the primary and secondary palates
Microscopic Anatomy and development of the tongue
Microscopic Anatomy and development of salivary glands
Derivatives of pharyngeal pouches and grooves
Derivatives of pharyngeal arches

Lymphatic organs

Histological structure of lymph nodes
Spleen (fine structure and circulation)
Thymus
Tonsils, MALT

Development of the nervous system and organs of special senses

Development and primary differentiation of the neural tube
Development of brain vesicles
Development of the peripheral nervous system (neural crest, placodes)
Development of the organ of vision
Development of the organ of hearing&equilibrium

Histology of the nervous system

Histology of the neurons developing from the neural tube
Glial cells
Histology of the neurons and supporting cells developing from the neural crest
Fine structure of peripheral nerves
Receptors and effectors
Interneuronal synapses

Microscopy of the central nervous system

Fine structure (microscopy) of the spinal cord
Proprioceptive reflexes
Nociceptive reflexes
Autonomic reflexes
Fine structure of the medulla oblongata
Fine structure of the pons
Fine structure of the midbrain
Classification of cranial nerve nuclei
Tracts of the brain stem
Reticular formation, monoaminergic systems
Fine structure of the cerebellum
Cerebellar afferents and efferents
Fine structure of the thalamus
Hypothalamo-hypophyseal system
Fine structure of the basal ganglia
Fine structure of the cerebral cortex, cortical fields
Tracts of the protopathic sensibility (anterolateral system)
Tracts of the epicritic sensibility (posterior funiculus/medial lemniscus)
Corticospinal tract (pyramidal tract)

Extrapyramidal system
Limbic system (nuclei and tracts)
Reflex arc of mastication
Anatomical bases for trigeminal pain
Autonomic innervation of salivary glands

Endocrine organs

Microscopical anatomy of the pituitary gland; development of the posterior lobe
Microscopical anatomy and development of the anterior and intermediate lobes of the pituitary gland
Blood supply of the pituitary gland
Microscopical anatomy of the pineal gland
Microscopical anatomy and the development of the thyroid gland
Microscopical anatomy and the development of the parathyroid gland
Microscopical anatomy and the development of the suprarenal gland
Histology of the islands of Langerhans

Organs of special senses

Microscopical structure of the skin (scalp and palm)
Coats of the eyeball
Chambers of the eye, vitreous body
Lens, accommodation
Light reflex of the pupil
Visual pathway, visual reflexes, optic nerve (CN2)
Cornea reflex
(External ocular muscles, eye movements)
Accessory and protective apparatus of the eye (palpebrae, conjunctiva, fasciae, lacrimal apparatus)
External ear, tympanic membrane. Tympanic cavity, auditory tube. Hearing ossicles (joints, muscles)
Vestibulocochlear nerve. (CN8)
Organ of Corti. Cochlea, cochlear duct
Auditory pathway.
Vestibular system
Bony and membranous labyrinth, vestibulum
Organ of olfaction, olfactory pathway, olfactory nerve (CN 1)
Organ of taste, taste buds, central processing of taste (tracts)
