

FACULTY OF MEDICINE

MACROSCOPIC ANATOMY MIDTERMS

(1st and 2nd retakes)

Those students need to sit for a retake midterm whose both midterms were unsuccessful or were absent from both midterm, or one was a fail and they missed the other occasion.

Students with one valid/successful midterm will not need to resit the midterm

Hungarian, German and English speaking courses are scheduled together.

Form of the midterm: PIN TEST

Place: Top floor dissection room

Date: presumably May 14, Wednesday starting from 12.45 and in case it was unsuccessful the 2nd retake will be held presumably on Friday.

If neither of the reakes are successful, students without one successful midterm will not get the signature, therefore their semester will not be accepted (they will have to repeat the year).

Good luck with this exam!

Dr Andrea D Székely
Associate Professor, Course Director
