

Exam announcement - Developmental Biology 2024/25 (spring semester)

Developmental Biology II. (Principles of regenerative medicine) (AOVANT834_2A)

For students registered in the actual subject courses:

the exam is a remote Moodle exam (available from home), which is available **from 12/05/2025 and during the exam's period**. The exam test includes short essay type questions. **After opening**, you are allowed to write the test for **1 day (24 hours)**. You should **register for a Neptun exam date** after finishing the test. The tests are evaluated by the lecturers, and the grade will be registered in the Neptun.

CV exam -Developmental Biology I. (Stem cells and Organoids) (AOVANT834_1A)

For students registered in the CV course, with a signature from a previous year): the exam is a remote Moodle exam (available from home), which is available **from 12/05/2025 and during the exam's period**. The exam test includes „multiple choice questions” (with one or multiple correct answers), „true or false” type questions, and „drag and drop” type questions with images. **After opening**, 40 minutes are given to finish the test. You should **register for a Neptun exam date** after finishing the test, and the grade will be registered in the Neptun.

Warning:

Those students, who are currently registered to the course without a signature from a previous year are not allowed to register to this course and cannot take the exam. They must deregister.
