Publikációs lista

h-index: **28**

1a) Eredeti munkák (original papers)

1. Varga BT, Ernyey AJ, Tajti BT, Gáspár A, Demeter Z, Kollár L, Kovács P, Albert M, Alpár A, Gyertyán I. Translational difficulties in establishing a pharmacologically induced neurovascular uncoupling model in rats. **Sci Rep** 2026 16:27671. **IF: 4,9**

2. Cinquina V, Tretiakov EO, Kalaba P, Alpár A, Calvigioni D, Piscitelli F, Keimpema E, Di Marzo V, Verkhratsky A, Harkany T. Astrocytes modulate neuronal development by S100A6 signaling. **Nat Commun** 2025 16:9049. **IF: 15,7**

3. László MJ, Vigh JP, Kocsis AE, Porkoláb G, Hoyk Z, Polgár T, Walter FR, Szabó A, Djurovic S, Merkely B, Alpár A, Frecska E, Nagy Z, Deli MA, Nardai S. N-N-dimethyltryptamine mitigates experimental stroke by stabilizing the blood-brain barrier and reducing neuroinflammation. **Sci Adv** 2025 11:eadx5958. **IF: 14,14**

4. Tretiakov EO, Hevesi Z, Böröczky C, Alpár A, Harkany T, Keimpema E. Molecular Fingerprint of Endocannabinoid Signaling in the Developing Paraventricular Nucleus of the Hypothalamus as Revealed by Single-Cell RNA-Seq and In Situ Hybridization. **Cells** 2025 14:788. **IF: 5,2**

5. Gáspárdy A, Gulyás L, Polland I, Alpár A, Fekete SG, Harmat L. Determination of Natural Blood Plasma Melatonin Concentration of Tsigai Ewes Characteristic for Gestation and Early Postpartum Period Between Autumnal Equinox and Winter Solstice. **Vet Sci** 2025 12:336. **IF: 2,4**

6. Hanics J, Tretiakov EO, Romanov RA, Gáspárdy A, Hevesi Z, Schnell R, Harkany T, Alpár A*. Neuronal activity modulates the expression of secretagogin, a Ca-sensor protein, during mammalian forebrain development. **Acta Physiol (Oxf)** 2025 241:e70031. **IF: 5,6**
   * levelező szerző (corresponding author)

7. Dóra F, Hajdu T, Renner É, Paál K, Alpár A, Palkovits M, Chinopoulos C, Dobolyi A. Reverse phase protein array-based investigation of mitochondrial genes reveals alteration of glutaminolysis in the parahippocampal cortex of people who died by suicide. **Transl Psychiatry** 2024 14:479. **IF: 6,2**

8. Barany L, Meszaros C, Alpar A, Ganslandt O, Hore N, Delev D, Schnell O, Kurucz P. Topographical anatomy of the septum verum and its white matter connections. **Sci Rep** 2024 14:18064. **IF: 3,8**

9. Harmat L, Nagy J, Somoskői B, Alpár A, Fekete SG, Gáspárdy A. Determination of Rhythmicity and Gestational Stage-Related Distribution of Blood Plasma Melatonin Concentrations in Donkey Mares. **Vet Sci** 2024 11:310. **IF: 2,4**

10. Benevento M, Alpár A, Gundacker A, Afjehi L, Balueva K, Hevesi Z, Hanics J, Rehman S, Pollak DD, Lubec G, Wulff P, Prevot V, Horvath TL, Harkany T. A brainstem-hypothalamus neuronal circuit reduces feeding upon heat exposure. **Nature** 2024 628:826-834. **IF: 56,1**

11. Meszaros C, Kurucz P, Baksa G, Alpar A, Ganslandt O, Brandner S, Barany L. Topographical anatomy of the subthalamic region with special interest in the human medial forebrain bundle. **J Neurosurg** 2024 141:570-580. **IF: 3,5**

12. Alpár A*. Az anatómia, szövet- és fejlődéstan oktatásának jelene és jövője az orvosképzésben [Presence and future of the teaching of anatomy, histology and embryology in the medical curriculum]. **Orv Hetil** 2024 165:323-331. **IF: 0,8**
* levelező szerző (corresponding author)

13. Butz H, Saskői É, Krokker L, Vereczki V, Alpár A, Likó I, Tóth E, Szőcs E, Cserepes M, Nagy K, Kacskovics I, Patócs A. Context-Dependent Role of Glucocorticoid Receptor Alpha and Beta in Breast Cancer Cell Behaviour. **Cells** 2023 12:784. **IF: 5,1**

14. Lovász K, Magyar P, Szalóki T, Maurovich-Horvat P, Altdorfer K, Tamás L, Alpár A*. A radioanatomical study of 3rd segment terminal branches of the maxillary artery in the pterygopalatine fossa. **Sci Rep** 2023 13:3401. **IF: 3,8**
* levelező szerző (corresponding author)

15. Patthy Á, Hanics J, Zachar G, Kovács GG, Harkany T, Alpár A*. Regional redistribution of CB1 cannabinoid receptors in human foetal brains with Down's syndrome and their functional modifications in Ts65Dn mice. **Neuropathol Appl Neurobiol** 2023 49:e12887. **IF: 4,0**
* levelező szerző (corresponding author)

16. Korchynska S, Rebernik P, Pende M, Boi L, *Alpár A*, Tasan R, Becker K, Balueva K, Saghafi S, Wulff P, Horvath TL, Fisone G, Dodt HU, Hökfelt T, Harkany T, Romanov RA. A hypothalamic dopamine locus for psychostimulant-induced hyperlocomotion in mice. **Nat Commun** 2022 13:5944. **IF: 16,6**

17. Kazsoki A, Palcsó B, Alpár A, Snoeck R, Andrei G, Zelkó R. Formulation of acyclovir (core)-dexpanthenol (sheath) nanofibrous patches for the treatment of herpes labialis. **Int J Pharm** 2022 611:121354. **IF: 5,8**

18. Patthy Á, Murai J, Hanics J, Pintér A, Zahola P, Hökfelt TGM, Harkany T, Alpár A. Neuropathology of the Brainstem to Mechanistically Understand and to Treat Alzheimer's Disease. **J Clin Med** 2021 10:1555. **IF: 4,96**

19. Hevesi Z, Zelena D, Romanov RA, Hanics J, Ignácz A, Zambon A, Pollak DD, Lendvai D, Schlett K, Palkovits M, Harkany T, Hökfelt TGM, Alpár A*. Secretagogin marks amygdaloid PKCδ interneurons and modulates NMDA receptor availability. **Proc Natl Acad Sci U S A** 2021 118:e1921123118. **IF: 9,412**
* levelező szerző (corresponding author)

20. Pintér A, Hevesi Z, Zahola P, Alpár A*, Hanics J. Chondroitin sulfate proteoglycan-5 forms perisynaptic matrix assemblies in the adult rat cortex. **Cell Signal** 2020 74:109710.
* levelező szerző (corresponding author) **IF: 3,968**

21. Nardai S, László M, Szabó A, Alpár A, Hanics J, Zahola P, Merkely B, Frecska E, Nagy Z. N,N-dimethyltryptamine reduces infarct size and improves functional recovery following transient focal brain ischemia in rats. **Exp Neurol** 2020 327:113245. **IF: 4,691**

22. Hunyadi A, Gaál B, Matesz C, Meszar Z, Morawski M, Reimann K, Lendvai D, Alpár A, Wéber I, Rácz É. Distribution and classification of the extracellular matrix in the olfactory bulb. **Brain Struct Funct** 2020 225:321-344. **IF: 3,298**

23. Fuzik J, Rehman S, Girach F, Miklosi AG, Korchynska S, Arque G, Romanov RA, Hanics J, Wagner L, Meletis K, Yanagawa Y, Kovacs GG, Alpár A, Hökfelt TGM, Harkany T. Brain-wide genetic mapping identifies the indusium griseum as a prenatal

target of pharmacologically unrelated psychostimulants. **Proc Natl Acad Sci U S A** 2019 116(51):25958-25967. **IF: 9,412**

24. Zahola P, Hanics J, Pintér A, Máté Z, Gáspárdy A, Hevesi Z, Echevarria D, Adori C, Barde S, Törőcsik B, Erdélyi F, Szabó G, Wagner L, Kovacs GG, Hökfelt T, Harkany T, Alpár A*. Secretagogin expression in the vertebrate brainstem with focus on the noradrenergic system and implications for Alzheimer's disease. **Brain Struct Funct** 2019 224(6):2061-2078. **IF: 3,298**
* levelező szerző (corresponding author)

25. Alpár A*, Zahola P, Hanics J, Hevesi Z, Korchynska S, Benevento M, Pifl C, Zachar G, Perugini J, Severi I, Leitgeb P, Bakker J, Miklosi AG, Tretiakov E, Keimpema E, Arque G, Tasan RO, Sperk G, Malenczyk K, Máté Z, Erdélyi F, Szabó G, Lubec G, Palkovits M, Giordano A, Hökfelt TG, Romanov RA, Horvath TL, Harkany T. Hypothalamic CNTF volume transmission shapes cortical noradrenergic excitability upon acute stress. **EMBO J** 2018 37(21). pii: e100087. **IF: 11,227**
* levelező szerző (corresponding author)

26. Király K, Kozsurek M, Lukácsi E, Barta B, Alpár A, Balázsa T, Fekete C, Szabon J, Helyes Z, Bölcskei K, Tékus V, Tóth ZE, Pap K, Gerber G, Puskár Z. Glial cell type-specific changes in spinal dipeptidyl peptidase 4 expression and effects of its inhibitors in inflammatory and neuropatic pain. **Sci Rep** 2018 8:3490. **IF: 4,011**

27. Lékó AH, Cservenák M, Szabó ÉR, Hanics J, Alpár A, Dobolyi Á. Insulin-like growth factor I and its binding protein-3 are regulators of lactation and maternal responsiveness. **Sci Rep** 2017 7:3396.**IF: 4,122**

28. Hanics J, Szodorai E, Tortoriello G, Malenczyk K, Keimpema E, Lubec G, Hevesi Z, Lutz MI, Kozsurek M, Puskár Z, Tóth ZE, Wagner L, Kovács GG, Hökfelt TG, Harkany T, Alpár A*. Secretagogin-dependent matrix metalloprotease-2 release from neurons regulates neuroblast migration. **Proc Natl Acad Sci U S A** 2017 114:E2006-E2015. **IF: 10,557**
* levelező szerző (corresponding author)

29. Romanov RA, Zeisel A, Bakker J, Girach F, Hellysaz A, Tomer R, Alpár A, Mulder J, Clotman F, Keimpema E, Hsueh B, Crow AK, Martens H, Schwindling C, Calvigioni D, Bains JS, Máté Z, Szabó G, Yanagawa Y, Zhang MD, Rendeiro A, Farlik M, Uhlén M, Wulff P, Bock C, Broberger C, Deisseroth K, Hökfelt T, Linnarsson S, Horvath TL, Harkany T. Molecular interrogation of hypothalamic organization reveals distinct dopamine neuronal subtypes. **Nat Neurosci** 2017 20:176-188. **IF: 19,912**

30. Hanics J, Teleki G, Alpár A, Székely AD, Csillag A. Multiple amygdaloid divisions of arcopallium send convergent projections to the nucleus accumbens and neighboring subpallial amygdala regions in the domestic chicken: a selective pathway tracing and reconstruction study. **Brain Struct Funct** 2017 222:301-315. **IF: 4,231**

31. Somogyi A, Katonai Z, Alpár A, Wolf E. A novel form of compensation in the Tg2576 amyloid mouse model of Alzheimer's disease. **Front Cell Neurosci** 2016 10:152. **IF: 4,555**

32. Guggenhuber S, Alpár A, Chen R, Schmitz N, Wickert M, Mattheus T, Harasta AE, Purrio M, Kaiser N, Elphick MR, Monory K, Kilb W, Luhmann HJ, Harkany T, Lutz B, Klugmann M. Cannabinoid receptor-interacting protein Crip1a modulates CB1 receptor signaling in mouse hippocampus. **Brain Struct Funct** 2016 221:2061-74. **IF: 4,698**

33. Bitencourt RM, Alpár A, Cinquina V, Ferreira SG, Pinheiro BS, Lemos C, Ledent C, Takahashi RN, Sialana FJ, Lubec G, Cunha RA, Harkany T, Köfalvi A. Lack of

presynaptic interaction between glucocorticoid and CB1 cannabinoid receptors in GABA- and glutamatergic terminals in the frontal cortex of laboratory rodents. **Neurochem Int** 2015 90:72-84. **IF: 3,385**

34. Bullmann T, Seeger G, Stieler J, Hanics J, Reimann K, Kretzschmann TP, Hilbrich I, Holzer M, Alpár A, Arendt T. Tau phosphorylation-associated spine regression does not impair hippocampal-dependent memory in hibernating golden hamsters. **Hippocampus** 2016 26:301-18. **IF: 3,945**

35. Romanov RA, Alpár A*, Zhang MD, Zeisel A, Calas A, Landry M, Fuszard M, Shirran SL, Schnell R, Dobolyi Á, Oláh M, Spence L, Mulder J, Martens H, Palkovits M, Uhlen M, Sitte HH, Botting CH, Wagner L, Linnarsson S, Hökfelt T, Harkany T. A secretagogin locus of the mammalian hypothalamus controls stress hormone release. **EMBO J**. 2015 34:36-54. **IF: 9,643**
*levelező szerző (corresponding author), teljes értékű elsőszerzősség (equal contributions)

36. Alpár A, Tortoriello G, Calvigioni D, Niphakis MJ, Milenkovic I, Bakker J, Cameron GA, Hanics J, Morris CV, Fuzik J, Kovacs GG, Cravatt BF, Parnavelas JG, Andrews WD, Hurd YL, Keimpema E, Harkany T. Endocannabinoids modulate cortical development by configuring Slit2/Robo1 signalling. **Nat Commun** 2014, 5:4421. **IF: 11,47**

37. Gáti G, Lendvai D, Hökfelt T, Harkany T, Alpár A*. Revival of calcium-binding proteins for neuromorphology: secretagogin typifies distinct cell populations in the avian brain. **Brain Behav Evol** 2014, 83:82-92. **IF: 2,013**
* levelező szerző (corresponding author)

38. Tortoriello G, Morris CV, Alpár A, Fuzik J, Shirran SL, Calvigioni D, Keimpema E, Botting CH, Reinecke K, Herdegen T, Courtney M, Hurd YL, Harkany T. Miswiring the brain: Δ9-tetrahydrocannabinol disrupts cortical development by inducing an SCG10/stathmin-2 degradation pathway. **EMBO J**, 2014 33:668-685. **IF: 10,434**

39. Lendvai D, Morawski M, Négyessy L, Gáti G, Jäger C, Baksa G, Glasz T, Attems J, Tanila H, Arendt T, Harkany T, Alpár A*. Neurochemical mapping of the human hippocampus reveals perisynaptic matrix around functional synapses in Alzheimer's disease. **Acta Neuropathol** 2013, 125:215-229. **IF: 9,777**
* levelező szerző (corresponding author)

40. Keimpema E, Tortoriello G, Alpár A, Capsoni S, Arisi I, Calvigioni D, Hu SS, Cattaneo A, Doherty P, Mackie K, Harkany T. Nerve growth factor scales endocannabinoid signaling by regulating monoacylglycerol lipase turnover in developing cholinergic neurons. **Proc Natl Acad Sci U S A**. 2013, 110:1935-1940. **IF: 9,809**

41. Keimpema E, Alpár A, Howell F, Malenczyk K, Hobbs C, Hurd YL, Watanabe M, Sakimura K, Kano M, Doherty P, Harkany T. Diacylglycerol lipase α manipulation reveals developmental roles for intercellular endocannabinoid signaling. **Sci Reports** 2013, 3:2093. **IF: 5,078**

42. Jäger C, Lendvai D, Seeger G, Brückner G, Matthews RT, Arendt T, Alpár A*, Morawski M*. Perineuronal and perisynaptic extracellular matrix in the human spinal cord. **Neuroscience**. 2013, 238C:168-184. **IF: 3,327**
* levelező szerző (corresponding author)

43. Zilberter M, Ivanov A, Ziyatdinova S, Mukhtarov M, Malkov A, Alpár A, Tortoriello G, Botting CH, Fülöp L, Osypov AA, Pitkänen A, Tanila H, Harkany T, Zilberter Y. Dietary energy substrates reverse early neuronal hyperactivity in a mouse model of Alzheimer's disease. **J Neurochem** 2013 125:157-71. **IF: 4,244**

44. Attems J*, Alpár A*, Spence L, McParland S, Heikenwalder M, Uhlén M, Tanila H, Hökfelt T*, Harkany T, Clusters of secretagogin-espressing neurons in in the aged human olfactory tract lack terminal differentiation. **Proc Natl Acad Sci USA** 2012, 109:6259-6264. **IF: 9,737**
* teljes értékű elsőszerzősség (equal contributions)

45. Antonucci F*, Alpár A*, Kacza J, Caleo M, Verderio C, Giani A, Martens H, Chaudhry F, Allegra M, Grosche J, Michalski D, Erck C, Hoffmann A, Harkany T, Matteoli M, Härtig W. Cracking down on inhibition: selective removal of GABAergic interneurons from hippocampal networks. **J Neurosci** 2012, 32:1989-2001. **IF: 6,908**
* teljes értékű elsőszerzősség (equal contributions)

46. Lendvai D, Morawski M, Brückner G, Négyessy L, Baksa G, Glasz T, Patonay L, Matthews RT, Arendt T, Alpár A*. Perisynaptic aggrecan-based extracellular matrix coats in the human lateral geniculate body devoid of perineuronal nets. **J Neurosci Res** 2012, 90:376-387. **IF: 2,974**
* levelező szerző (corresponding author)

47. Mulder J, Zilberter M, Pasquaré SJ, Alpár A, Schulte G, Ferreira SG, Köfalvi A, Martín-Moreno AM, Keimpema E, Tanila H, Watanabe M, Mackie K, Hortobágyi T, de Ceballos ML, Harkany T. Molecular reorganization of endocannabinoid signalling in Alzheimer's disease. **Brain** 2011, 134:1041-1060. **IF: 9,457**

48. Alpár A*, Ueberham U, Lendvai D, Naumann N, Rohn S, Gáti G, Arendt Th, Gärtner U. Activity-induced dendrite and dendritic spine development in human amyloid precursor protein transgenic mice. **Int J Dev Neurosci** 2011, 29:107-114. **IF: 2,418**
* levelező szerző (corresponding author)

49. Gáti G, Morawski M, Lendvai D, Jäger C, Négyessy L, Arendt T, Alpár A*.: Distribution and classification of aggrecan-based extracellular matrix in the thalamus of the rat. **J Neurosci Res** 2010, 88:3257-3266. **IF: 2,958**
* levelező szerző (corresponding author)

50. Gáti G, Morawski M, Lendvai D, Matthews RT, Jäger C, Zachar G, Arendt Th, Alpár A*. Chondroitin sulphate proteoglycan-based perineuronal net establishment is largely activity-independent in chick visual system. **J Chem Neuroanat** 2010, 40:243-247. **IF: 2,121**
* levelező szerző (corresponding author)

51. Alpár A, Künzle H, Gärtner U, Popkova Y, Bauer U, Grosche J, Reichenbach A, Härtig W. Slow age-dependent decline of doublecortin expression and BrdU labeling in the forebrain from lesser hedgehog tenrecs. **Brain Res** 2010, 1330:9-19. **IF:2,623**

52. Naumann N, Alpár A, Ueberham U, Arendt Th, Gärtner U. Transgenic expression of human wild-type amyloid precursor protein decreases neurogenesis in the adult hippocampus. **Hippocampus** 2010, 20:971-979. **IF: 4,609**

53. Alpár A*, Naumann N, Arendt Th, Gärtner U. Constitutively enhanced p21Ras activity amplifies dendritic remodeling of hippocampal neurons during physical activity. **Int J Dev Neurosci** 2009, 27:407-411. **IF: 2,025**
* levelező szerző (corresponding author)

54. Morawski M*, Alpár A*, Brückner G, Fiedler A, Jäger C, Stieler J, Gáti G, Arendt Th. Chondroitin sulfate proteoglycan-based extracellular matrix in chicken (Gallus domesticus) brain. **Brain Res** 2009,1275:10-23. **IF:2,463**
* teljes értékű elsőszerzősség (equal contributions)

55. Alpár A*, Naumann N, Ueberham U, Arendt Th, Gärtner U. Deprivation-induced dendritic shrinkage might be oppositely affected by the expression of wild-type and mutated human amyloid precursor protein. **J Neurosci Res** 2009, 87:1813-1822. **IF:2,986**
* levelező szerző (corresponding author)

56. Alpár A*, Naumann N, Härtig W, Arendt Th, Gärtner U. Enhanced Ras activity preserves dendritic size and extension as well as synaptic contacts of neurons after functional deprivation in synRas mice. **Eur J Neurosci** 2008,27:3083-3094. **IF: 3,385**
* levelező szerző (corresponding author)
