

Action plan based on the student feedback received in the 1st semester of the 2022/2023 academic year

Subject: INTERNAL MEDICINE PROPEDEUTICS

Neptun code: AOKBHK781_1A

Department: Internal Medicine and Hematology

Faculty: Faculty of Medicine

Reflection on the implementation of the previous period's action plan ("*implementation review*"):

- We increased the response rate of the feedback
- We formed smaller groups than the official requirement was for a better student/teacher and student/patient ratio
- The exam requirements are clearly communicated through the Moodle and on the Department's website and through the teachers

Our feedback on general comments by the students:

Students evaluated our subject above the average.

Our feedback on specific comments on mandatory subjects:

Thank you for all the good feedbacks!

Remarks	Responses
<i>Practice is great. But lectures are not organized, even handouts are not up, and the lecturers are not dedicated to teaching.</i>	All lectures are uploaded to the Moodle site of the subject.
<i>There is no standard for the physical examination. I learnt one method from my teacher and in the midterm I was asked questions/ asked to perform an examination in a completely different way and was marked down for it which is unfair.</i>	Standardisation of the exam is on the way.
<i>I really enjoyed the course</i>	

PRACTICE

We try to achieve a higher rate of feedback.

Budapest, March 23, 2023

The action plan was compiled by:

Prof. Dr. Tamás Masszi

Dr. Katalin Keltai
