

**SEMMELWEIS UNIVERSITY**  
**Department of Internal Medicine and Haematology**

Director  
**PROFESSOR TAMÁS MASSZI**

INTERNAL MEDICINE II.

Neptun code: AOKBHK783\_2A

**Reflection on the implementation of the previous period's action plan ("implementation review"):**

We increased the ratio of the practical lessons and provide more time to practice and physical examination skills.

**Our feedback on general comments by the students:**

The students evaluated the subject above the average of the faculty.

**Our feedback on specific comments on mandatory subjects:**

Students's comments	Responses
I personally cannot concentrate very long practice or lecture that in this department everything was around 45 mins which was great. But it is a bit strange that we do have to do practical exams for the exam because we almost never practiced it during this block	With the push of the practical exam we try to motivate students to do more physical examination
Please increase the interaction time with patients and practicals instead of lectures.	Try to
The experience was amazing. Even better than internal medicine dept. last year. They were helpful too. But this year internal medicine felt far more interactive, especially in lectures	😊
So far so good	😊
