10. Forms of cutaneous tuberculosis, their diagnosis and treatment
11. Atypical mycobacterial infections
12. Clinical forms and treatment of leprosy and leishmaniosis
13. Diseases due to HPV and their treatment
14. Herpes simplex and herpes zoster, clinical forms, complications and treatment
15. Pityriasis versicolor
16. Microsporia
17. Mycosis superficialis (Tinea capitis, corporis, pedis, inguinalis)
18. Tinea profunda (The Deep Mycoses)
19. Onychomycosis (Tinea unguinum)
20. Pompholyx
21. Candidosis, Clinical pattems of candidosis
22. Lyme borreliosis

II.

1. Urethral discharge, diagnosis and management
2. Vaginal discharge, diagnosis and management
3. Genital herpes virus infections
4. Genital warts
5. Gonococcal infection in men
6. Gonococcal infection in women
7. Chlamydia trachomatis cervicitis and urethritis
8. Complications in men and women
9. Chlamydia trachomatis negative non gonococcal urethritis
10. Lymphogranuloma venereum. Granuloma inguinale. Chancroid
11. Bacterial vaginosis
12. Trichomoniasis
13. Candidosis of the genitalia
14. Scabies
15. Pediculosis
16. HIV infection, AIDS
17. Primary syphilis and differential diagnosis
18. Secondary syphilis
19. Tertiary syphilis
20. Methods of diagnosis in syphilis, BAP

III.

1. Structure of the skin
2. Toxic epidermal necrolysis, causes and treatment
3. Pharmacologic side effects of the drugs on the skin. Management of the drug eruptions.
4. Lupus erythematosus, DLE, SLE, SCLE Clinical forms and treatment
5. Scleroderma
6. Dermatomyositis
7. Basal cell carcinoma
8. Squamous cell carcinoma
9. Premalignant epidermal lesions
10. In situ malignant tumours of the skin
11. Precursor lesions and risk factors for malignant melanoma
12. Malignant melanoma (types, clinical signs, prognostic factors)
13. Pigmented naevi
14. Cutaneous T-cell lymphoma
15. Bullous diseases of autoimmune origin
16. Skin manifestations in diabetes mellitus
17. Skin symptoms of liver diseases
18. Seborrhoeic dermatitis, clinical forms and therapy
19. Rosacea, perioral dermatitis
20. Psoriasis, clinical forms and therapy
21. Lichen ruber planus
22. Pityriasis rosea
23. Akne, comedo. Clinical forms and therapy.
24. Venous diseases of the legs. The postthrombotic syndrome
25. Paraneoplastic skin symptoms
26. Alopecia, clinical forms and treatment.
27. Vasculitis. Erythema multiforme, erythema nodosum
