

Action plan based on the student feedback received in the first semester of the 2021/22 academic year (FOKOELT349_1A)

Department: Department of Physiology

Faculty: Faculty of Dentistry

Our feedback on general comments by the students:

We have received the results of the online submitted questionnaires by the students about our teaching. According to the provided data, our teaching was generally appreciated by the students and our scores were higher than the averages of the Faculty results.

Our feedback on specific comments on mandatory subjects:

Most of the comments praised the practical teachers and/or the lecturers. We have received few specific comments and recommendations from our students.

A comment asked to provide the possibility to use the materials of Medical Physiology course, as well. We do not know whether it is feasible in the current authorization protocol of the NEPTUN-Moodle systems but we would be happy if any Semmelweis student/teacher could reach any teaching material made by University teachers.

A comment asked to make kahoot tests at the end of each lecture. We do not think it is feasible to perform at the end of every lecture due to time-limitations, although we will announce this possibility to the lecturers.

The lack of clear attendance policy was criticized in one comment. We believe that it is clearly stated in our "Information of general interest; Faculty of Dentistry (2021/2022). <https://semmelweis.hu/elettan/files/2021/09/ED-Information-2021-22.pdf>". According to our regulation: "No more than three absences from practices (10.5 practice hours including seminar and laboratory hours) are allowed for any reason; otherwise the semester will not be credited.". We will ask our teachers to emphasize this rule in the future.

Date: 04. 08. 2022.
