

Action plan based on the student feedback received in the first semester of the 2024/25 academic year (AOKELT792_2A)

Department: Department of Physiology

Faculty: Faculty of Medicine

Our feedback on general comments by the students:

We have received the results of the online questionnaires submitted by students regarding our teaching. Based on the provided data, it is clear that our teaching has been well-received by the students, and our scores were basically similar (significantly not different) to those of Faculty averages.

Our feedback on specific comments on mandatory subjects:

We received several comments or recommendations in the evaluation documents from our students. The majority of textual comments were positive and praised many of our practical teachers and lecturers.

Several comments raised concerns about the legibility of lecturers' handwriting during lectures. While we acknowledge these critiques, we would like to emphasize that everything written on the board is also announced orally. In addition, lecturers make notes at a pace that allows students enough time to record the key points.

Few comments criticized the scheduling of weekly tests, stating that they take place before students have had the opportunity to consult the relevant material. However, this testing method is applied across all language and course types. The professors of the Department believe it is the most effective way to motivate students to prepare thoroughly for both theoretical and practical sessions. Due to time constraints, the theoretical part of the practical session focuses only on discussing the most essential or challenging aspects of previous lectures. As a result, the topics covered in these discussions do not necessarily overlap with the questions on the weekly tests.

Comments related to the teaching style and quality of specific teachers will be handled through direct, in-person discussions with the concerned teachers to ensure continuous improvement.

Reflection on the implementation of the previous period's action plan ("implementation review"):

We have implemented measures to address numerous suggestions provided by our students in the past years. Significant concerns from previous periods have been successfully resolved; additionally, we have instructed our teachers to emphasize the purpose of our weekly test system.
