

# **Action plan based on the student feedback received in the first semester of the 2025/26 academic year (FOKOELT349\_1A)**

**Department: Department of Physiology**

**Faculty: Faculty of Dentistry**

## **Our feedback on general comments by the students:**

We have received the results of the online questionnaires submitted by students regarding our teaching. Based on the data provided, it is clear that our teaching has been well received, with our scores surpassing the Faculty averages in every aspect of the subject's general evaluation.

## **Our feedback on specific comments on mandatory subjects:**

We received several comments and recommendations in the evaluation documents from our students. The majority of the textual comments were positive and praised many of our practical teachers and lecturers.

One specific comment stated that a lecture video was not provided (including last year's recording). We carefully reviewed this issue and confirmed that all recordings had been uploaded by the end of the semester to ensure that the materials were available for review during the examination period. However, we will ensure that recordings are uploaded also in time for preparations for the weekly tests as well.

Comments related to the quality of a practice teacher will be addressed through direct, in-person discussions with the concerned teachers to ensure continuous improvement.

## **Reflection on the implementation of the previous period's action plan ("implementation review"):**

We have taken steps to address many of the suggestions provided by our students in the previous year. It is worth noting that the weekly test system had also been criticized in last year's feedback. In response, we communicated with our teachers and asked them to emphasize the significance and purpose of the weekly tests within the context of the Medical and Dental Physiology course. Since then, no further concerns have been raised regarding this aspect.
