

WHAT IS THE HEALTH MOBILITY RADAR (HMR)?

HMR is an interactive webplatform that enables data visualization on graphs, tables and maps about health professionals' mobility in the EU

WHY AND TO WHOM IS HEALTH MOBILITY RADAR USEFUL?

Experts, competent authorities, researchers, statisticians, workforce planners, and policy makers can monitor the trends of mobility of diverse groups of health professionals, access aggregate numbers of movements, and download graphs, tables and maps for different years

WHAT DATA WILL APPEAR ON HEALTH MOBILITY RADAR?

Data collection covers the five sectoral health professions: medical doctors, dentists, pharmacists, nurses and midwives

Total numbers of health personnel in aggregated format will be presented, showing the main mobility directions, source and target countries
