

## SEMMELWEIS UNIVERSITY

Faculty of Medicine, Department of Internal Medicine and Oncology

Department Head

**PROF. DR. ISTVÁN TAKÁCS**

Department of Endocrinology

Head of Department

**PROF. DR. PETER IGÁZ**

# Action plan based on the student feedback received in the 2. semester of the 2023/2024 academic year

**Department: Department of Endocrinology  
Faculty of Medicine**

**AOSEDT869\_1A  
Genetics of Endocrine Diseases**

### **Reflection on the implementation of the previous period's action plan ("*implementation review*"):**

We have asked the presenters to send their presentations before the lectures, but this has not been realized on all instances, so we will have to improve this. The pdf-s for the lectures are planned to be uploaded before the presentations.

### **Our feedback on general comments by the students:**

We thank you for your generally positive comments. The overall scores mostly correspond to the Faculty's average. We plan to make the lectures even more interactive than before and ask the audience to be more active. Thereby the interest of the audience would be better sustainable.

### **Our feedback on specific comments on elective subjects:**

The only point where the scores of our subject were somewhat weaker than the Faculty average, was the Moodle surface. We will do our best to improve this. The presentation files are planned to be uploaded before the lectures, so that the students will have the opportunity to read these before the lectures and to make it easier for them to follow the lectures and make notes.

27. August 2024

The action plan was compiled by:

Prof. Peter Igaz

Head of the Department of Endocrinology
