Information on the medical internship to be fulfilled in foreign countries

Criteria of selection and acceptance of medical internship abroad at the Faculty of Medicine.

1. Internships in state-accredited university clinics and their training hospitals may be accepted and recognized in the Member States of the European Union (in addition Switzerland and Norway). The legal background and basis for this is the mutual recognition of degrees awarded by accredited institutions and by accredited institutions in another EU Member State.
2. Places of medical internship accredited by MAB, i.e. Accredited Training Hospitals in Hungarian General Medical Education:
 - Ilsan Paik Hospital (Seoul, Korea)
 - Yonsei University Hospital (Seoul, Korea)
 - Tsukuba University Hospital (Tsukuba, Japan)
 - Ibaraki Prefectural Hospital and Cancer Center (Ibaraki, Japan)

Conditions of medical internships in the EU and in the USA:

- a. The hospital should be a training hospital accredited by a medical training university in the EU / US or it should be involved in the training of medical students of a university that is accredited by an EU member state.
- b. The internship at a particular training site (which is either in the EU or in the USA) should be in line with the competence list adopted by the MAB regarding the clinical practice year of the medical students.
- b) The foreign training site must assess the student's performance and should certify with the signature of the head of the given department that the student has completed the tasks that are detailed in the competency list.

Budapest, 28 September 2020.
