CALL FOR TEACHING ASSISTANT (TA) FELLOWSHIP

The Department of Molecular Biology at Semmelweis University offers teaching assistant (TA) positions for international students of the Faculty of Medicine for the 2021/22 academic year with the following terms:

1. Teaching assistants are supposed to assist at the laboratory (practical) lessons held at the Dept. of Molecular Biology in the following courses: Medical Chemistry and Molecular Cell Biology I (1st semester); Molecular Cell Biology II (2nd semester).

2. Proposals are to be submitted to the Secretariat of the Dept. of Molecular Biology (H-1094 Budapest, Túzoltó u. 37-47) before 9th July, 2021. Submitted applications will be evaluated and ranked by the head of department and forwarded to the Dean’s Office within 10 working days following the submission deadline.

3. Teaching assistants’ tasks and obligations include active participation and assistance in the practical education of students during lab lessons (presentation of the theoretical background of the corresponding experiments; technical assistance and supervision of students; critical evaluation and discussion of the results; holding consultations). Teaching assistants have to submit a detailed report on their teaching activities to the head of department by the end of the term of the spring semester. This report is a prerequisite for the official acknowledgement of the teaching assistant’s activities.

4. The duration of the TA position covers both semesters of the 2021/22 academic year. The minimum working time corresponds to the duration of lab lessons of the selected course but cannot exceed 50 hours a month.

5. Teaching assistants receive a scholarship from the University.

6. Successful candidates for the TA position are required to meet the following criteria: (i) the arithmetic average of all his/her marks received in the previous two semesters, i.e. in spring semester of 2019/20 and fall semester of 2020/21 is at least 4.00, (ii) the applicant passed his/her exams in Medical Chemistry and Molecular Cell Biology I and II with excellent (5) grade; (iii) the applicant has been a registered student research fellow at the Department of Molecular Biology for at least one year.

Prof. Miklós Csala
Head of Department
