

Action plan based on the student feedback received in the II semester of the 2022/2023 academic year

Department: Department of Prosthodontics

Faculty: Faculty of Dentistry

Our feedback on general comments on mandatory subjects by the students:

Dental materials:

Students comment:

- all were great
- In my opinion, it would be much better if the subject was made practical instead of just lectures. It would raise the interest and attendance among the students!

Answer of the Department:

Thank you very much for your feedback! We cannot change the curriculum. The lectures will remain.

Odontotechnology and Prosthodontics Preclinical II.:

Students comment:

- (Oktató: Dr. Vass Andrea Fanni): Best teacher ever!
- (Oktató: XY): Sometimes she refuses to answer the questions regarding other dentistry subjects, she doesn't answer Odontology question in preclinical class if she has even time

Answer of the Department:

Thank you very much for your feedback!

Students comment:

- Some weeks the zoom for the lectures was not working so there were no recordings of certain weeks available. The recordings of the lectures is very helpful when revising for the exams. I hope every lecture can be recorded as some of the lecture materials are

Answer of the Department:

Thank you very much for your feedback! We will upload the videos of the lectures, sorry for the late.

Prosthodontics I.:

Students comment:

- (Oktató: Dr. Kőnig János): He is such a nice teacher and helps us a lot and we all had patients to work with thanks to him while other groups were working in one patient in big groups

- (Oktató: Dr. Saláta József): Dr.Salata is really nice and knowledgeable! his explanations are really helpful and understandable that clear out all my questions. really thankful to have such a great teacher in the practice!

Answer of the Department:

Thank you very much for your feedback!

Students comment:

- Not enough patients. only 2 students were able to get patients - the rest were doing nothing

Answer of the Department:

Thank you very much for your feedback! We try to see as many patients as possible. Unfortunately, there may be slight discrepancies between the practices.

Prosthodontics III.:

Students comment:

- (Oktató: Dr. Zsedely Anikó): Dr Zsedely, is a nice teacher. She tries to help you, but the problem is that sometimes she helps too much. Maybe because she gets tired, she just sits in our chair and finishes what we are doing. This is the only bad thing about her, all the rest is good. She's nice and supportive and doesn't stress you
- (Oktató: Dr. Nagy Lilien): We would like to have the same teacher next semester please
- (Oktató: Dr. Zsedely Anikó): Very nice but doesn't let students do all the practical work
- all I can say is prosthodontics department is the best in this university, well organized, well explained and very good instructors, thank you

Answer of the Department:

Thank you very much for your feedback!

Students comment:

- The lecture slides are horrible, they're mostly photos with no descriptive writing on them. The slides should have all of the info on them and the lecturers should come and speak with us and give a lecture and impart their knowledge on us, not read from the slides. This is why few people attend lectures.
- Some of the exam topics → I'm not sure where they get it from but it sure is not taught in practicals nor the lectures so I am unsure as to how we are supposed to acquire the knowledge? Even the practical instructors were surprised that they were topics which shows the disorganisation of the department and lack of care for the English program. The topics are translated from Hungarian.

Answer of the Department:

Thank you very much for your feedback! From the next semester, we will cancel lectures and introduce mandatory seminars. We will make sure that the topics of the seminars covers the exam topic lists. We will try to organise the subject better.

Prosthodontics V.:

Students comment:

- (Oktató: Dr. Nagy Zsanett Éva): So kind, helpful, and very knowledgeable! Thank you

Answer of the Department:

- Thank you very much for your feedback!

-

Clinical dentistryII.:

Students comment:

- (Oktató: Dr. Károlyházy Katalin): Very inspirational supervisors! I am extremely satisfied.
- Extremely satisfied with clinical dentistry. The most useful subject for dentistry students. I learnt a lot and the supervisors had a lot of trust in us, I felt like I was working in a real clinic. I would like to mention Dr. Herczegh and Dr. Karolyhazy, they have been the most amazing supervisors. Very inspirational professors!

Answer of the Department:

Thank you very much for your feedback!

Budapest, 19.09.2023.
