

Endodontics

During core training period

Type of intervention	Number of cases
Number of root canal treatments and obturations altogether	60
minimum number of teeth from these as difficult cases *	10
minimum number of multirooted teeth from these	40
minimum number of molars from these	30
minimum number of teeth from these with irreversible	10
minimum number of teeth from these with chronic	
apical periodontitis	25
minimum number of molars from these	10
minimum number of retreatment	20
minimum number of molars from these	10
Post restorations	5
Removal of seperated instrument	3
Treatment of traumatized teeth	3
Regenerative endodontic treatment by revitalization, Vital	
pulp therapy	7
Endodontic related surgery	
episectomy	5
hemisection	2
crown lengthening	3
treatment of perforation	2
Complete endodontic tooth rehabilitation (root canal	
obturation and final coronal restoration)	25

During specialist training period

Type of intervention	Number of cases
Number of root canal treatments and obturations altogether	60
minimum number of teeth from these as difficult cases *	10
minimum number of multirooted teeth from these	40
minimum number of molars from these	30
minimum number of teeth from these with irreversible	
pulpitis	10
minimum number of teeth from these with chronic	
apical periodontitis	25
minimum number of molars from these	10
minimum number of retreatment	20
minimum number of molars from these	10
Post restorations	5
Removal of seperated instrument	3
Treatment of traumatized teeth	3
Regenerative endodontic treatment by revitalization, Vital	
pulp therapy	6
Endodontic related surgery	

episectomy	5
hemisection	1
crow lengthening	2
treatment of perforation	1
Complete endodontic tooth rehabilitation (root canal obturation and final coronal restoration)	25
