Written review:

4 A hallgatók szöveges véleménye: Fogalmazza meg észrevételeit, illetve javaslatait a tantárgy vonatkozásában!

- Boring
- The pharmaceutical technology (physical) is the worse class that I ever had I learned nothing because the class was so crowded and chaos and the other teachers speak so loud during the class with different subjects and we are a lot of students in a table that only 2 or 3 students can apply the experimental

Our feedback on general comments by the students:

The results are on average 87% of the faculty's average - (K1:86%, K2:85%, K3: 89%, K4: 89%, K5:86%, K6: 89%)

There was only one written comment that was given on a totally different subject, on Pharmaceutical Technology. This fact calls into question the relevance of these assessments.
