SUMMER COURSE
organized by the
Center for Health Technology Assessment,
SEMMELWEIS UNIVERSITY

Evidence-based pharmaceutical policy
decision-making in lower-income European countries

COURSE DATE: 14-18 June 2021

For Whom?
For representatives of health care payers, HTA agencies, academic research teams and market access teams of the pharmaceutical industry or consultant companies who are involved or interested in-, or influenced by evidence-based policy decisions related to patented and off-patent pharmaceuticals in countries with economic constraints.

Why?
Evidence-based decision-making is especially important in less affluent countries with more limited health care resources and generally poorer overall health status, as the opportunity cost of suboptimal pharmaceutical policy decisions is higher in these countries.

COVID DISCLAIMER
Our course will be accessible online, the lectures will be held through live streaming.
DESCRIPTION AND LECTURERS

The course – in parallel with providing basic insights into the theory of economic evaluation, modeling, managed entry agreements, multi criteria decision analysis (MCDA) and off-patent drug policies - will primarily be based on case studies.

Participants will develop an economic model and use it for designing managed entry agreement scenarios and understanding their influence on the cost-effectiveness and the budget impact of pharmaceuticals at their market entry. As the traditional economic value frameworks may be too narrow to capture patient-centric and societal value elements, participants will develop an extended value framework and evaluate policy scenarios by MCDA.

On the last day, participants will explore how the objectives and the evidence base of policy decisions for off-patent pharmaceuticals can be improved.

András Inotai PharmD, PhD
Associate Professor

Zoltán Kaló MD, MSc, PhD
Professor of Health Economics

* Please note that for companies within the European Union with a valid EU VAT number the price will exclude VAT, in all other cases the VAT is 27%.

Early bird deadline: 15 May, 2021 / Standard deadline: 1 June, 2021

ADDITIONAL INFORMATION

Location: Online, streamed from Beznák Aladár Room, Basic Medical Science Center, Semmelweis University
Language: English only
Timing: Courses start at 9 AM, end at 3:30 PM
Skill requirements: Basic knowledge of statistics and/or pharmaceutical R&D, familiarity with MS Excel.
Equipment requirements: own laptop, MS Excel

HOW TO APPLY?

Download the application form from here: www.semmelweis.hu/hta/en/education/summer-course/
and send your filled application to: hta@semmelweis-univ.hu
