

## **Action plan based on the student feedback received in the 2nd Semester of the 2022/2023 Academic year**

Department: Heart and Vascular Center, Department of Surgical Research and Techniques

Faculty: Faculty of Medicine

Referring to the student evaluations in the second semester of the academic year 2022/2023, the Heart and Vascular Center, Department of Surgical Research and Techniques, Semmelweis University, prepares the following action plans for the education of third-year students Basic Surgical Techniques.

### Basic Surgical Techniques - AOKKMI020 1A

7 lectures

232 registered students

98 valid assessment

The average of the most answers is similar to the average of the Faculty there were no significant differences.

Two questions were scored under the average of the faculty:

How didactic and logical were the lectures? (score: -0.08) To what contribution did the lectures help you to learn the subject? (score: -0.11).

In the next Academic Year we will re-new our lectures and practices to make them more exciting and useful. We will change the thematic of the lectures focusing on the theoretical and experimental surgery and give chance to collect points during the semester that can increase the students' points in the exam. We will upload more short videos which helps to familiarise the students with the material covered in the practices.

Some students critiqued the unsatisfying information of the exam. All steps and points of the exams can be found on our homepage and we draw the students' attention to visit it. We explain the exam requirements in the practices. Our action plan to solve this problem is to send a Neptun message to the students to clarify each step in writing.

Our staff is highly experienced and is committed to teaching, we will do our best to make our practices even more varied and to make our students feel the importance of the subject of Basic Surgical Techniques. We are always open to face-to-face discussions and welcome every supportive comments.
