

dr. László Piros

Professional curriculum vitae

I was born in 1995 in Budapest.

In 2015 I finished a two-year international programme (International Baccalaureate) in English, by thus finishing secondary school

2015-2021 student at Faculty of Pharmacy at Semmelweis University

2021 obtaining PharmD Diploma

2021 – PhD Student at Department of Organic Chemistry, Semmelweis University

Motivation

I have always been interested in medicine, although I feel more comfortable in the lab, because I have been always motivated in creating something new. On the other hand, I was a nurse's aide for 9 months at the Heart and Vascular Centre (Városmajori Szív- és Érgyógyászati Klinika) at the transplantation department, and during the pandemic I worked nearly 300 hours at the Emergency Room of Semmelweis University Clinics, where I gained valuable experience (from a professional point of view) in the treatment of acute, even life-threatening conditions.

My work as a student researcher

During four years of my Scientific Student Association (SSA) research at the Department of Organic Chemistry I have achieved the following scientific results:

- 3 scientific presentations SSA conferences
- third place at SSA conference

Current work

Developing new pathways in the syntheses of Quinazolines

Synthesizing new novel molecules by Suzuki Cross-coupling reaction
