

## SEMMELWEIS UNIVERSITY

Faculty of Dentistry Department of Periodontology

Director

PROF. DR. PÉTER WINDISCH

### Action plan based on student satisfactory inquiries of 2021/22 autumn term

Clinic of Periodontology

Faculty of Dentistry

Subjects: Periodontology I and III

#### General opinion:

- Student participation in the lectures: Perio I 45.9%, Perio III has reached a higher percentage of 76.3%.
- Generally our results in Perio III are beyond the average of the Faculty points and reached an average of 4.5, which is considered very satisfactory. Perio I's results was not that good, but still acceptable. The summarized average value is 4 and the values representing the questions are under the average of the Faculty points without any significant difference.
- Our results are significantly better than the Faculty's overall average in Perio III: the subject aroused the students interest; organization; attendance; management of the practices; role of the practices within the subject in order to master the curriculum. However, Perio I results have not reached the Faculty average, but the difference was not significant in any of the issues.
- By the student feedbacks we managed all difficulties well during the Covid19 lockdown.
- The lectures were considered to be knowledgable and evidence based.
- Reflecting for the previous years inquiries, the plan to summarize the lectures with conclusion has been successfully fulfilled. The available online materials was extended with audio files, but this has to be further improved.

#### Plan:

- To keep on the good results and discipline.
- To still dedicate higher attention to the online available learning materials.

- To further upkeep the students' interest toward the subject, to reach a higher number of attendance during the lectures. This is a difficult objective if the students do not show motivation in order to visit lectures. The department's medical leadership does not support the idea of not having catalog during lectures in case of dental medical subjects.

Individual student feedbacks and answers:

- some students highly appreciated the practice's quality and the teachers attitude toward them. This attitude must be kept going on.
- One individual from Perio III appreciated the knowledge based lectures. It is suggested that Department of Periodontology should teach Oral Implantology. This suggestion is not handled within the authority of the Department, it is regulated by the Faculty's higher authority. However, our Department gives visiting lecturers for the subject of Oral Implantology.
- From Perio I we have received neither suggestions nor any opinions.

Thank you for your feedbacks and your attention.

Dept. of Periodontology
