

SEMMELWEIS UNIVERSITY

FACULTY OF DENTISTRY DEPARTMENT OF PERIODONTOLOGY

Director

PROF. DR. PETER WINDISCH

Action plan based on student satisfactory inquiries of 2022/23 autumn term

Dept. of Periodontology

Faculty of Dentistry

Subjects: Periodontology I and III

General opinion:

- Student participation in the subject's evaluation: Perio I 67.3%, Perio III 66,7%, both are considered high participation rates.
- Generally, our results in Perio I are below the average of the Faculty's points and reached a range of 3.75- 4.11 according to the asked questions, which is considered not satisfactory. Meanwhile, Perio III performed above the faculty's average. According to the asked questions, Perio III values range between 4.29-4.58, without any significant difference compared to the average Faculty's points.
- Our results was significantly worse than the Faculty's average in Perio I in the following aspects of education: organization; attendance; comprehensibility of the lectures; the extent the lectures contributed to the learning of the curriculum; the extent the textbook contributed to the learning of the curriculum.
- According to the overall feedback, the student were not satisfied with the institution's provided education in Perio I, however, Peri III was satisfactory among the students. Nevertheless, the meaning and reliability of the questionnaire can be questioned, because only 10-15% of the students are visiting the lectures. How can a 65-70% of student participation evaluate the education of the subject if they are visiting the lectures in a low number?

Plan:

- To keep on the good results and discipline.
- To still dedicate higher attention to the online available learning materials.

SEMMELWEIS UNIVERSITY

FACULTY OF DENTISTRY DEPARTMENT OF PERIODONTOLOGY

Director

PROF. DR. PETER WINDISCH

- Reflecting for the previous years inquiries, the plan to summarize the lectures with conclusion has been successfully fulfilled. The content of some lectures were also reduced, while the pictures got some figure legends in order to better understand them. Positive feedback were received with this.
- The official textbook (*Clinical periodontology and implant dentistry*) is available for the students, however the textbook content is generally too much for the gradual level, this strengthens the necessity to attend the lectures in order to summarize the knowledge which is important for the exams as well.
- To further upkeep the students' interest toward the subject, to reach a higher number of attendance during the lectures. This is a difficult objective if the students do not show motivation in order to visit lectures. The department's medical leadership does not support the idea of not having catalog during lectures in case of dental medical subjects.

Individual student feedbacks and answers:

- One student complained that the lectures were not given to them. ANSWER: It is hard to realized how it can happen, because to the best of my knowledge, the lectures are all uploaded to the website of the Department. I will check once more if this is true and the lectures are available for the students. The Moodle system will be checked as well.

Thank you for your feedbacks and your attention.

Budapest, 10.03.2023.
