

## COURSE SYLLABUS

### Semmelweis University Faculty of Dentistry, Dentistry

**Name of the course: Pharmacology II**

**Credit value: 4**

**Lessons (*in hours in the whole semester*): 56 from this, lectures: 28 practicals: 28 seminars:**

**Type of the course: compulsory obligatory elective elective**

**Semester in which it is announced according to the curriculum: 8<sup>th</sup>**

**Frequency of announcement (*per semester or year*): per year**

**The responsible educational and research organizational unit for teaching the subject:**

**Department of Pharmacology and Pharmacotherapy**

**Academic year: 2023/24 2<sup>nd</sup> semester**

**Subject (Neptun) code: FOKOFRM254\_2A**

**Lecturer of the course (tutor): Dr. Riba, Pál**

**Academic position: Deputy Head of Education of Department, associate professor**

**Contact details: Department of Pharmacology and Pharmacotherapy, 1089 Budapest, Nagyvárad tér 4. Tel: +36-1-2104416, e-mail: riba.pal@med.semmelweis-univ.hu**

**Date of habilitation and reference number: April 24 2017., 29/2017 Hab.**

**The goals and place of the course in regards to the education of dental students:**

Pharmacology is a synthesizing subject, building on what has been learned in the past, especially physiology, biochemistry, pathology, and translational medicine, and is essential for the later acquisition of clinical knowledge. The subject includes: general pharmacology, detailed pharmacology, toxicology and basics of prescription writing. General pharmacology (pharmacodynamics, pharmacokinetics) aims to acquire the basic concepts and knowledge needed for pharmacological thinking, while in detailed pharmacology the student learns the main principles of the mechanism of action, therapeutic effects, adverse effects, major interactions, and partly dosing of medicines. The basics of toxicology describe the mechanisms and targets of major intoxications and poisonings.

**Location of the course (*address of lecture hall, seminar room etc.*):**

Nagyvárad téri Elméleti Tömb, 1089 Budapest, Nagyvárad tér 4.

**Competences acquired by completion of the course:**

Students understand the pharmacological terminology, learn the mechanism of action, therapeutic effects, adverse effects, important interactions of drugs and the basics of dosing. Knowing the basics of prescribing drugs is of an utmost importance.

**Pre-study requirements and prerequisites of course registration and completion, in case of a multi-semester subject, the standpoint of the educational-research unit on the concurrent subject registration and on the requirements of permission thereof :**

Pharmacology I., Internal medicine I

The Department of Pharmacology and Pharmacotherapy does not support concurrent course registration.

**Number of students required for announcement of course (*min.*, *max.*), method of selection:**

Since it is a mandatory subject all the students in the fourth year of dentistry education must register.

**Method of course registration:**

**Through NEPTUN system**

**Detailed course/lecture description<sup>1</sup>:** *(to facilitate credit recognition in other institutions)*

- 1<sup>st</sup> week
  - Lecture: Anticoagulants, inhibitors of platelet aggregation
  - Practice: Fibrinolytics, drugs against bleeding, drugs acting on blood cell production.
- 2<sup>nd</sup> week
  - Lecture: Drugs influencing cardiac electrophysiology
  - Practice: Positive inotropic agents.
- 3<sup>rd</sup> week
  - Lecture: Diuretics, antidiuretics.
  - Practice: Drugs influencing blood pressure (sympatholytics, nitrates, Ca-channel blockers and other vasodilators. Pharmacology of RAAS.)
- 4<sup>th</sup> week
  - Lecture: Drugs acting on blood glucose control.
  - Practice: Drugs influencing the oxygen demand and oxygen supply of the heart. Drugs improving microcirculation.
- 5<sup>th</sup> week
  - Lecture: Drugs affecting lipid metabolism (1 study hour). Bronchodilators and drugs inhibiting the bronchial inflammatory processes (1 study hour).
  - Practice: Expectorants (secretomotorics, secretolytics, mucolytics), antitussive drugs. Autacoids, histamine, antihistamines.
- 6<sup>th</sup> week
  - Lecture: Corticosteroids and their antagonists. Drugs inhibiting steroid hormone synthesis
  - Practice: Pharmacology of pituitary hormones. Hypothalamic hormones, hormonanalogs and antagonists. Pharmacology of thyroid gland (thyroid hormones and antithyroid drugs). 3<sup>rd</sup> midterm
- 7<sup>th</sup> week
  - Lecture: Pharmacology of female sexual hormones.
  - Practice: Androgens, antiandrogens, anabolic steroids, drugs influencing sexual activity.
- 8<sup>th</sup> week
  - Lecture: Basics of toxicology
  - Practice: Drugs affecting bone mineral homeostasis.
- 9<sup>th</sup> week

- Lecture: Drugs influencing gastric acid secretion, drugs protecting gastric mucosa
- Practice: Appetizers, drugs promoting digestion, antiemetics, prokinetic agents. Laxatives, drugs against diarrhea. Pharmacology of liver and bile.
- 10<sup>th</sup> week
  - Lecture: Immunopharmacology (cytotoxic agents, inhibitors of intracellular signaling, cytokine and cytokine receptor inhibitors)
  - Practice: Cytotoxic anticancer drugs. Retinoids.
- 11<sup>th</sup> week
  - Lecture: Small molecule cytostatic, signal transmission inhibitor anticancer drugs. Anticancer drugs with hormonal mechanisms
  - Practice: Toxicology I. 4<sup>th</sup> midterm
- 12<sup>th</sup> week
  - Lecture: Anticancer antibodies. Immunostimulant anticancer agents. Other drugs used in therapies of cancer
  - Practice: Toxicology II. Drugs acting on smooth muscles
- 13<sup>th</sup> week
  - Lecture: Pharmacodynamic and pharmacokinetic basics of drug interactions
  - Practice: Contrast agents. Consultation
- 14<sup>th</sup> week
  - Lecture: Pharmacogenomics, personalized medicine, drugs for orphan disease. Special aspects of pharmacology in children and elderly
  - Practice: Drugs and pregnancy

**Courses (*compulsory and obligatory elective*) which in part or entirely overlap the topics of above course:**

Medical and dental physiology, Dental biochemistry, Molecular Cell Biology, Pathology, General and Oral Pathophysiology, Internal Medicine,

**Special academic work required for completion of the course<sup>2</sup>:**

N/A

**Attendance on practices and lectures, replacement in case of missed sessions:**

Maximum number of absences is 25 percent of the number of practices in the semester. In the case of absence, the student can attend another class the same week.

**~~Consequences of absence from sessions and exams: törölve~~**

**Method of checking acquired knowledge during the study period<sup>3</sup>:**

During the semester, we organise two compulsory midterm tests in weeks 6 and 11. These can be made up in weeks 7 and 12. Improvement attempt of the midterm tests (both) will be possible in week 13.

The course material for the third midterm test (study material from week 1 to 5): Pharmacology of the cardiovascular system. Drugs acting on lipid metabolism. Drug acting on blood glucose level.

Fourth midterm test (study material from week 6 to 10): Endocrine pharmacology. Pharmacology of the respiratory system. Pharmacology of the gastrointestinal system. Histamine and antihistamines. Drugs acting on smooth muscles. Immunopharmacology.

The midterm tests will count towards the final exam results:

1. If the student scores better than 60% in all four midterm tests during the whole year, the drug recognition question will be waived and in case of a doubtful grade, the better one will be awarded.
2. If the student achieves at least 75% score of all four midterm tests one final exam topic will be waived as well as the drug recognition question. The waived topic will be chosen by the examiner.

3. At the competition at the end of the year, the student who has at least one midterm of 80% and none of his/her demonstrations is worse than 33%, depending on the result of the competition, will be rewarded: between scores 90-100% the students will choose one of the three topics, between 80-89% the students will choose which one he/she will drop, between 70-79% the examiner will choose one topic to be dropped. The drug recognition question will be waived.
4. If the student fails both midterm tests of the second semester (even at the time of a retake), or fails to achieve 33% in either midterm test with a correction, the student will receive a grade penalty on the final exam.

**Requirements of an accepted semester (*signature of the lecturer*):**

The number of absences must not be more than 25 percent of the number of practices in the semester

**Type of the exam:**

**oral comprehensive examination (end-subject final exam)**

**Requirements of the exam<sup>3</sup>:**

To apply for the oral examination, the student must pass the toxicology exam before the examination period starts. The grade in the toxicology exam counts towards the final grade. In the oral final exam, at first 5 active substances selected from the compulsory list of active substances must be identified and their mechanism of action explained. If the student does not recognize at least 3 of the active substances, he/she will not be allowed to continue and will receive a fail mark. After successful completion of one core-concept question and three topics of three lists of topics (one from each), an acceptable level of knowledge of pharmacology must be demonstrated.

**Toxicology topics**

1. Management of the poisoned patient I. Mechanisms of death due to poisoning, initial management of the poisoned patients
2. Management of the poisoned patient II. Decontamination
3. Management of the poisoned patient III. Enhancing of elimination of toxins
4. Pharmacology of chelators
5. Lead poisoning
6. Mercury poisoning
7. Arsenic poisoning
8. Carbon monoxide poisoning
9. Aliphatic hydrocarbons and aliphatic halogenated hydrocarbons
10. Aromatic hydrocarbons, glycols and aldehydes
11. Insecticides
12. Mushroom poisoning
13. Atropine poisoning
14. Cyanide poisoning
15. Methanol intoxication
16. Acid and base poisonings, oxalic acid
17. Poisons inducing methemoglobinemia
18. Botulism

**Core concept topic list**

1. Stages of drug development in brief.
2. Types of clinical trials.
3. History of the Hungarian pharmaceutical industry.
4. Molecular targets of drugs
5. Receptor theory - agonist, partial agonist, antagonist, inverse agonist
6. Efficacy, potency
7. Dose-effect relationships at population level
8. Adverse drug reactions

9. Therapeutic index
10. Tolerance, tachyphylaxis, dependence
11. Absorption of drugs
12. Membrane transport mechanisms.
13. Distribution of drugs
14. Bioavailability
15. Volume of distribution
16. Phases of drug biotransformation
17. Excretion of drugs
18. Linear and non-linear pharmacokinetics
19. Clearance
20. Half-life
21. Saturating and maintenance dose
22. Drug accumulation and cumulation
23. Enzyme inducers
24. Enzyme inhibitors
25. Pharmacodynamic interactions - synergism
26. Pharmacodynamic interactions - antagonism
27. Pharmacokinetic drug interactions - at the level of absorption
28. Pharmacokinetic drug interactions - at the level of distribution
29. Pharmacokinetic drug interactions - at the level of metabolism
30. Pharmacokinetic drug interactions - at the level of elimination
31. Special groups - drug interactions: pregnancy
32. Special groups - drug interactions: childhood
33. Special groups - drug interactions: ageing
34. Characterisation of biological medicinal products
35. Orphan drugs
36. Advanced therapy medicinal products
37. Nutritional supplements
38. Traditional herbal active substances
39. Medical device
40. Principles of antimicrobial treatment - selective toxicity
41. Principles of antimicrobial treatment - empirical, targeted and prophylactic therapy
42. Principles of antimicrobial treatment - principles of bactericidal, bacteriostatic antibiotic and antibiotic combinations
43. Principles of antimicrobial treatment - time-, concentration- and exposure-dependent antibiotics
44. Narrow and broad spectrum antibiotics
45. Antibiotic selection considerations - pregnancy, childhood
46. Antibiotic selection considerations - infections affecting specific compartments
47. Considerations for antibiotic choice - comorbidities
48. Antidote - definition and examples
49. Pharmacogenetics, pharmacogenomics - definition, examples
50. Classification of drugs according to chemical structure and complexity
51. Drug-induced adverse reaction: sulfonamide allergy and its characterization
52. Drug-induced adverse reaction: serotonin syndrome
53. Drug-induced adverse reaction: neuroleptic malignant syndrome
54. Drug-induced adverse reaction: Stevens-Johnson sy.
55. Drug-induced adverse reaction: pseudomembranous colitis
56. Drug-induced adverse reaction: cheese reaction
57. Drug-induced adverse reaction: orthostatic hypotension
58. Drug-induced adverse reaction: hemorrhage
59. Drug-induced adverse reaction: thrombosis
60. Drug-induced adverse reaction: bone marrow damage
61. Drug-induced adverse reaction: nephrotoxicity
62. Drug-induced adverse reaction: ototoxicity
63. Drug-induced adverse reaction: hepatotoxicity
64. Drug-induced adverse reaction: QT prolongation
65. Drug-induced adverse reaction: bradycardia / AV block

66. Drug-induced adverse reaction: constipation, diarrhea, vomiting
67. Drug-induced adverse reaction: mucosal damage
68. Drug-induced adverse reaction: weight gain/loss
69. Drug-induced adverse reaction: sedation
70. Drug-induced adverse reaction: epileptiform seizures MI
71. Drug-induced adverse reaction: sexual dysfunction
72. Drug-induced adverse reaction: dental and oral cavity adverse reactions
73. The Summary of Product Characteristics

#### **Topic list "A"**

1. Cholinergic and adrenergic transmission and its presynaptic modification.
2. Cholinomimetics
3. Muscarinic receptor blocking drugs
4. Catecholamines
5. Indirect sympathomimetics. Selective  $\alpha_1$  agonists
6.  $\alpha_2$ -agonists and drugs acting on the imidazoline receptors
7.  $\alpha$ -receptor antagonists
8.  $\beta$ -receptor antagonists
9. Centrally and peripherally acting skeletal muscle relaxants
10. Local anesthetics
11. Opioids
12. NSAIDs.
13. Drugs used for treatment of gout. Drugs for headache syndromes
14. Inhalational anesthetics
15. Intravenous anesthetics. Perioperative medication
16. Benzodiazepines
17. Non benzodiazepine anxiolytics and non-benzodiazepine hypnotics.
18. Antipsychotics
19. Monoamine reuptake inhibitors.
20. Non-reuptake-inhibitor antidepressants. Agents used for treatment of manic phase of bipolar disorders.
21. Antiepileptics. Adjuvant analgesics.
22. Drugs of neurodegenerative diseases. (Drugs acting in the extrapyramidal motoric system. Nootropic drugs)

#### **Topic list "B"**

1. Drugs influencing blood coagulation I: Antiplatelet agents. Fibrinolytic drugs. Drugs inhibiting bleeding
2. Drugs influencing blood coagulation II: Anticoagulant drugs
3. Agents used in anemias
4. Positive inotropic drugs
5. Drugs influencing cardiac electrophysiology.
6. Drugs acting on the renin-angiotensin-aldosterone-system (RAAS)
7.  $\text{Ca}^{++}$ -channel blockers and other vasodilators
8. Drugs influencing the oxygen demand and oxygen supply of the heart. Drugs improving microcirculation.
9. Drugs affecting lipid metabolism.
10. Potassium excreting (wasting) diuretics
11. Potassium sparing diuretics, ADH antagonists, osmotic diuretics
12. Glucocorticoids for oral and parenteral use
13. Mineralocorticoids. Topically applied glucocorticoids. Adrenocortical antagonists, inhibitors of corticosteroid synthesis.
14. Androgens, anabolic steroids, antiandrogens. Agents affecting the sexual activity
15. Estrogens and antiestrogens
16. Progestins and antiprogestins. Contraceptives
17. Thyroid and antithyroid drugs. Pituitary hormones. Hypothalamic hormones, hormonal analogs and antagonists.
18. Pancreatic hormones and parenterally applied antidiabetic drugs.
19. Oral antidiabetics.
20. Agents affecting bone mineral homeostasis (calcium, vitamin D, parathyroid hormone, calcitonin, etc.).

21. Selective  $\beta_2$ -stimulants and other bronchodilators.
22. Antiinflammatory agents inhibiting bronchial inflammatory processes. Antitussive agents and expectorants
23. Drugs influencing gastric acid secretion, protective drugs of gastric mucosa
24. Antiemetic drugs. Prokinetic agents.
25. Drugs used in constipation (laxatives) and diarrhea. Drugs promoting digestion. Pharmacology of liver and biliary tract
26. Histamine and antihistamines
27. Drugs acting on smooth muscles. Drugs influencing uterus contractions.
28. Immunopharmacology I. (cytotoxic agents).
29. Immunopharmacology II. (Inhibitors of cytokine gene expression, 5-ASA derivatives)
30. Immunopharmacology III. (Antibodies and fusion proteins)
31. Drugs used in cancer treatment I (antimetabolites)
32. Drugs used in cancer treatment II (cytotoxic agents targeting DNA)
33. Drugs used in cancer treatment III (Topoisomerase inhibitors. Inhibitors of mitotic spindle)
34. Drugs used in cancer treatment IV. (Hormonal agents)
35. Drugs used in cancer treatment V. (Small molecule signal transduction inhibitors. Retinoids)
36. Drugs used in cancer treatment VI. (Large molecule signal transduction inhibitors. Immunostimulant anticancer drugs.)

#### **Topic list "C"**

1. Disinfectants and antiseptics
2. Antimycobacterial drugs
3. Antiprotozoal and antihelminthic drugs.
4. Antifungal agents
5. Agents to treat Herpes simplex (HSV), varicella-zoster (VZV) virus, cytomegalovirus (CMV). Anti-influenza agents Drugs against Corona- and other viruses
6. Antiretroviral agents.
7. Agents against hepatitis viruses
8. Penicillins
9. Cephalosporins
10. Carbapenems. Monobactams. Beta-lactamase inhibitors.
11. Chloramphenicol. Polymyxins. Antifolate drugs
12. Tetracyclines and glycylicyclines
13. Aminoglycosides
14. Quinolones and fluoroquinolones
15. Macrolides. Pleuromutilins
16. Clindamycin. Streptogramins. Oxazolidinones. Fusidans.
17. Glycopeptides. Lipopeptides. Bacitracin. Mupirocin.
18. Metronidazole. Fidaxomycin. Rifaximin. Nitrofurantoin. Phosphomycin.

#### **Grading of courses<sup>4</sup>. The possibility and requirements of an offered grade:**

The midterm tests will count towards the semester final exam results:

1. If the student scores better than 60% in all four midterm tests during the whole year, the drug recognition question will be waived and in case of a doubtful grade, the better one will be awarded.
2. If the student achieves at least 75% score of all four midterm tests one final exam topic will be waived as well as the drug recognition question. The waived topic will be chosen by the examiner.
3. At the competition at the end of the year, the student who has at least one midterm of 80% and none of his/her demonstrations is worse than 33%, depending on the result of the competition, will be rewarded: between scores 90-100% the students will choose one of the three topics, between 80-89% the students will choose which one he/she will drop, between 70-79% the examiner will choose one topic to be dropped. The drug recognition question will be waived.
4. If the student fails both midterm tests of the second semester (even at the time of a retake), or fails to achieve 33% in either midterm test with a correction, the student will receive a grade penalty on the final exam.

In the oral final exam, at first 5 active substances selected from the compulsory list of active substances must be identified and their mechanism of action explained. If the student does not recognize at least 3 of the active substances, he/she will not be allowed to continue and will receive a fail mark. After successful completion of one core-concept question and three topics of three lists of topics (one from each), an acceptable level of knowledge of pharmacology must be demonstrated.

Detailed information on the compulsory and the full lists of active substances. If the candidate:

1. knows all the active substances to be studied in full detail, or knows all the active substances with some minor lacks and can mention names of active substances from the full drug list, – mark 5
2. knows all the active substances to be studied and the information to a varying degree and can mention the names of active substances from the full drug list to a varying degree - 2,3,4
3. knows all the active substances to be learned, but only the name and nothing else – unsatisfactory (failure)
4. does not know any active substance names – unsatisfactory (failure)
5. does not know all the active substances from the mandatory list, but knows the active substances from the full list of active substances in the given topic, then points 1,2 or 3 above are taken into consideration, the mark is awarded according to these points

Type of grade: five-mark scale (1=unsatisfactory, 2=satisfactory, 3=average, 4=good, 5=excellent)

### Exam registration:

Registration must be done through the NEPTUN system for the days set by the department up to the limits.

### Rules of repeating exams:

According to the Study and Examination Policy of Semmelweis University

### List of textbooks, lecture notes and recommended textbooks, online material:

Basic and Clinical Pharmacology (Ed. B. G. Katzung), 15<sup>th</sup> edition, McGraw-Hill Education, 2021. ISBN 978-1 260 45231 0

Materials discussed during lectures and seminars: Moodle (<https://itc.semmelweis.hu>)

### Signature of course lecturer:

*Pál Riba*

**Pál Riba, MD., PhD**  
associate professor

**Signature of head of department:**

**Péter Ferdinandy, MD, DSc, MBA**  
**Head of Department**

**Date of submission:**

**June 23, 2023**

**Opinion of OKB:**

**Notes from the Dean's Office:**

**Signature of Dean:**

---

<sup>1</sup> Detailed and numbered for each week of theoretical and practical lessons one by one. In an annex, cannot be attached appendix!

<sup>2</sup> Eg. homework, report, midterm exam etc. Topics, dates, method of retake and replacement

<sup>3</sup> List of topics in case of theoretical exam, thematic and method in case of practical exam

<sup>4</sup> Method of inclusion of theoretical and practical exams. Method of inclusion of midterm assessments.
