

The Institute of Pharmacology and Pharmacotherapy announces a tender for the position of Research Associate

Semmelweis University is the leading medical and health higher education institution in Hungary and the Central European region, which is unique in the country as a specialized university. Its three main activities are education, research-innovation and healing; this triple unit makes the more than 250-year-old university an internationally recognized knowledge center.

Our institute, which as a university institution has a dual role of education and research, has been operating as an independent Institute of Pharmacy since 1872. The name of the Institute was changed to the Institute of Pharmacology and Pharmacotherapy in 1999.

Thanks to the dynamic development of our institute, we are announcing a new Research Associate position, for which we welcome applications from experienced researchers with a PhD.

Main tasks and jobs:

- participation in the scientific work of the gastrointestinal group of the Translational and Neuropharmacology Research Group, in the development, planning, implementation and evaluation of projects
- active participation in the implementation and coordination of the experimental work of the research group
- independent performance and management of in vivo and in vitro research tasks
- participation in the publication of research results (in Hungarian and English)
- the possibility of participating in domestic and international scientific public life and writing applications

Job requirements:

- PhD degree in natural sciences (biologist, bioengineer, pharmacist, doctor, etc.).
- presentation preparation, excel and statistical knowledge
- ability to work in groups and individually
- good communication skills
- intermediate English language skills, both spoken and written
- flexibility and load capacity

It is an advantage to fill the position:

- presentation and discussion skills in English
- domestic and international scientific activity
- Western blot, confocal microscopy, immunohistochemistry, qRT-PCR use, cell culture, in vivo experience
- biological laboratory experience
- experience in tendering activities

What we offer:

- Professional development
- Full time employment
- Fixed-term employment, which can be extended upon mutual satisfaction

- Working in a young, motivated team

How to apply:

Deadline for submitting professional resumes with photos: 31.03.2024 - with a salary request.
