

Complex exam information - Cardiovascular medicine and research Division

Actual information on organizing the complex exam is always sent out by the division's students' coordinator for all the students in their 4th active semester. If you have permission to take the exam in an earlier semester please contact the students' coordinator directly.

Application

The first step of applying for the complex exam is to fill out and send the following documents to the students' coordinator of the division by the deadline given in the information email.

- **Application form** for complex exam - signed by you, by your supervisor and by the program leader,
- **Recommendation** for the subjects of the complex exam and for the members of the professional board of the exam - the signatures will be collected by me, please send it in .docx format,
- professional **CV**,
- **publication list**.

Committee, exam subjects and organization

The requirements for the committee members can be checked in the recommendation document.

Please arrange the subjects and the committee members with your supervisor before you submit the recommendation document.

The committees will have to be approved by the division and by the Quality Control and Evaluation Board of the university. These signatures will be managed by me after you sent the documents listed above.

Once the committee is approved and the members of the committee accept the invitation to your complex exam, the students' coordinator will inform you about it and then you can start organizing the date and time of the complex exam.

Not later than one week before the exam you have to send the summary of your research work and the evaluation of your research activity written by your supervisor to the students' coordinator via email.

The list of exam subjects can be found on this website: <https://semmelweis.hu/phd/en/doctoral-divisions/cardiovascular-medicine-and-research-division/>
