- Endodontics
- Public Health and Community Service
- Oral pathology
Dentoalveolar Surgery

It includes the diagnosis, surgical and related treatment of diseases, injuries and defects involving both the functional and esthetic aspects of the hard and soft tissues of the head, mouth, teeth, gums, jaws and neck.
Oral and Maxillofacial Surgery

» Dentoalveolar surgery

» Maxillofacial Surgery
Oral Pathology

According to the American Dental Association: “Oral pathology is the specialty of dentistry and discipline of pathology that deals with the nature, identification, and management of diseases affecting the oral and maxillofacial regions.”
Pedodontics

This discipline focuses on pediatric/adolescent growth and development, disease causality and prevention, child psychology and management, and all aspects of the highly-specialized Pediatric restorative techniques and modalities.
Orthodontics

- concerned with the study and treatment of **malocclusions** (improper bites), which may be a result of **tooth** irregularity, disproportionate **jaw** relationships, or both. Orthodontic treatment can focus on dental displacement only, or can deal with the control and modification of facial growth.
Periodontics

is the **specialty** of **dentistry** that studies supporting structures of **teeth**, diseases, and conditions that affect them. The supporting tissues are known as the **periodontium**, which includes the **gingiva** (gums), **alveolar bone**, **cementum**, and the **periodontal ligament**.
Prosthodontics

Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation and maintenance of the oral function, comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible substitutes.
Endodontics

Endodontists perform a variety of procedures including endodontic therapy (commonly known as "root canal therapy"), endodontic retreatment, surgery, treating cracked teeth, and treating dental trauma. Root canal therapy is one of the most common procedures.
Dental Team

- Dentist(s)
- Assistant(s)
- Receptionist
- Patient Manager
- Dental Practice Manager
- Dental technician
  + courier
- Cleaning lady
Factors

- General / specialized Dental Practice
- Single dentist/ Group
- Location
