

## HUNGARIAN MEDICAL TERMINOLOGY IV.

**Responsible organisational unit:**

Department of Languages for Specific Purposes

**Programme director:**

**Dr. Katalin Fogarasi , associate professor, Director**

**4 lessons per week, 2 credits**

**Assessment:** midterm (oral interview) and final examination

**Role of subject in fulfilling the aim of training:**

The aim of the subject is to enable students to take patient's history, ask about medical history and present complaints. We focus on developing skills and strategies necessary to understand Hungarian patients during their clinical practice. Students learn to give instructions during examination and get familiarised with relevant clinical documents (charts, discharge papers, etc.). Vocabulary building is centred around symptoms of common conditions.

**Brief description of subject:**

This is the fourth semester of the medical language course. The aim of the course is to enable students to take anamnesis, to learn about previous diseases and present complaints, to have appropriate strategies for understanding the patients during clinical practices. Students learn about the instructions used in patient examination, are able to independently examine patients, are able to give relevant instructions. (e.g. examination of the chest organs, abdomen, musculoskeletal organs, nervous system - based on the chart) Students will learn about the forms of medical documentation as well. Students learn about the symptoms of diseases (based on the list recommended by clinics) in Hungarian, so that they can ask patients relevant questions about their disease.

**Brief description of subject:**

weeks	curriculum Hungarian instructions during examination on the following topics
1	<b>Revision: Hungarian instructions during examination</b>
2	Gastroenterology I. Reflux Ulcerative disease Colon cancer
3	Gastroenterology II. Ileus Cholelithiasis
4	Liver diseases Cirrhosis
