“Medical students can only be prepared for patient care  
when practising by hospital beds;  
Not only the teachers explaining diseases will teach them then,  
but diseases themselves...  
Let theory be combined with practice as it is in real life,  
and make students visit sickhouses once they  
are studying to be medical doctors;  
also have them take care of patients with all the  
knowledge that is expected from doctors.”

Lajos Markusovszky (1815-1893)

## Detailed history of Semmelweis University

### I. The history of the Medical Faculty (1769-1951)

---

The Nagyszombat (now Trnava) university founded in 1635 by PÁZMÁNY Péter archbishop of Esztergom and the former Jesuit order institution was given a royal rank during Maria Theresa's reign and turned from a truncated university to a real one with the addition of the missing fourth faculty, the Medical Faculty. All of the above formed an integral part of the comprehensive, imperial level reform process with the recognition in the background that health care is a key interest of the state and requires a high level of public intervention. The plans of the Medical Faculty in Nagyszombat was elaborated by the royal physician of the queen, the Dutchman Gerard van Swieten, based on the Medical Faculty in Vienna reformed by him as well. Organisation started with the decree of Maria Theresa dated on 7 November 1769. Before this, the whole university had received a royal rank with a royal charter on 17 July that year. To host the new faculty, a separate building was constructed according to the plans of Franz Anton Hillebrandt, which was completed in May 1772. Education was able to start in 1770, first with five faculties: Physiology and Pharmacology (PRANDT Ádám Ignác), Anatomy (TRNKA Vencel), Surgery (PLENCK József Jakab), Botany and Chemistry (WINTERL Jakab József) and General Pathology (SHORETITS Mihály), i.e. the actual clinics. Due to the lack of an own clinics, the education of general pathology faced severe difficulties, and the lack of the corpses and the botanical garden was also a great problem. By moving the university to Buda in 1777, these problems seemed to be solved.

The Ratio Educationis I issued simultaneously with the transfer to Buda modified the management of the University. The consistory considered as the representative of the state, which had been heading the university since 1767, was replaced by the university council (senate), however, practically with the same members. The magistratus academicus re-elected every year, which administered mostly the ritual issues, remained on. To lead the whole institution, a president and a director general and to lead the faculties, faculty directors (faculty presidents) were elected. A bit later (in 1786), Joseph II deleted this position (except the Medical Faculty) and their scope of authority was taken away by the previously marginalised deans. This time, the method of appointment of the tutors was also regulated. Based on the opinion of the faculty, the senate submitted

a proposal to the king who decided on the appointment through the Royal Council of Governors.

It was on 25 March 1780 when Maria Theresa issued the Diploma Inaugurale, called as the "Magna Charta" of the university, in which she set among other general regulations the legal status of the university and the financial basis of the maintenance thereof. The successor of the Queen, Joseph II was also dealing with the fate of the University. During his personal visits he decided on the translocation of the institution to Pest, which took place in 1784. The Medical Faculty found a home in a former Jesuits' monastery at the corner of Hatvani (now Kossuth Lajos) and Újvilág (now Semmelweis) streets. The frequent relocations held back educational activity, since the majority of resources was directed to the establishment of the conditions. The rapidly developing Pest provided a larger and more diverse patient population than before and the number of clinical beds also increased up to 16. The reconstructed building of the monastery proved to be small for the growing number of departments (Theoretical Medicine, Natural History in 1784; Veterinary in 1787; Public Medicine and Special Medical Studies in 1793; Theoretical Surgery in 1808; Obstetrics in 1812 and Ophthalmology in 1817) and the increasing number of students. Practical Training was strongly held back by that contrary to the international practice, the clinics were located not in the city hospital, but in the building of the faculty, therefore, there was no possibility to regularly change the patient population necessary for education. Although there were many attempts by the faculty to involve the Saint Roch Hospital to expand the institutions of the faculty, they were systematically rejected due to the resistance of the city magistrate. Contrary to this, from the 20's, the clinical trend emphasising practical education was established, the main representative of which was BENE Ferenc, the introducer of vaccinations against pox.

Initially, based on the idea of van Swieten, the duration of the medical training was not regulated. First, a decree in 1774 determined the training period of physicians to be 5 years and according to the study regulation in 1786, it became 4 years. After tightening the examinations, the mutual recognition of medical diplomas had been valid since the reign of Joseph II (the principle of the so-called conformetur), at least as regards Vienna-Prague-Cracow-Pest. In

1804, Vienna left this agreement and obtained a privilege against the others. The surgeon master and civil surgeon training were 2 years long, while the pharmacist training was of 1 year. Midwives were trained in short courses started each semester. In 1787, the Veterinary course joined as well.

The end of the century, showing a vivid university life was replaced by the retrograde mentality of the era of Francis I. This is reflected by the Ratio Educationis II in 1806, created in the spirit of centralisation and the deprivation of the freedom of education, which was dealing with the Medical Faculty in a much deeper level than the previous one. It stipulated in details the teaching material and the obligations of the professors, it updated the order of the education and comprehensive exam and increased the length of education to 5 years. The president (praeses universitatis) executing the intent of the government and his deputy and the vice president (vice-praeses) who was at the same time the chancellor of the university played a key role in the management of the university. The university magistrate consisting of rectors, deans and seniors had only limited power. At the end of the 1810's, even the faculty director position was reset, however, the professional supervision of the Medical Faculty was exercised by the national chief medical officer.

As in terms of the French revolutionary ideas feared by the government, medical training was a neutral area, at the beginning of the 19<sup>th</sup> Century, this was the only faculty able to perform considerable scientific activity and more significant developments. Contrary to the efforts, the substantial conditions of education became worse and worse due to overcrowding and the increasing demands. The devastation of the icy flood in 1838 increased on the problems in an extent that even the parliament was dealing with the situation of the Medical Faculty.

Under these narrow circumstances, the tutors of the faculty tried to keep up with the pace of international medical science which started to develop and specialise that time. In the light of the above should one consider that overtaking Vienna, Pest was one of the first cities to found an individual faculty of veterinary in 1793, which included the contracted forensic medicine and public health as well. Vaccination against pox has been applied in Hungary since 1799 and in 1824, headed by GEBHARDT Ferenc, a Central Vaccination Institute was established within the Medical Faculty. One of the most significant scientist of his era, KITAIBEL Pál was also among the tutors of this faculty. The Institute of Pathology founded in 1844 by ARÁNYI Lajos was one of the oldest similar institution in the world. At the beginning of 1847, only few months after the first experiment in the Massachussets Hospital, Balassa tried anaesthesia with ether. The first anaesthetic surgery was performed few days later by SCHOEPF-MEREI Ágost. The faculty was continuously playing key role in the fight against the great Hungarian epidemics (typhus, yellow fever, pox and the cholera leading to riots in 1831 and 1848-49).

The medical and surgical training courses were taught in Latin from the beginning. Education in Hungarian was first dealt with at the end of the 18<sup>th</sup> Century. RÁCZ Sámuel, who was the fifth professor of the medical faculty in 1793/94 to hold the position of rector, issued the first Hungarian physiology book in 1789 with the title "A physiologia rövid sommája" (Short summary of physiology), which was considered as the first Hungarian university textbook as well. In 1830, law allowed the use of Hungarian language and 3 years later, the first doctorate was written in Hungarian by FLÓR Ferenc and in 1844, Hungarian became the official language. Contrary to the national partiality of the tutors, the education in Hungarian was accepted by the Medical Faculty with reservations, since many of the students – and even some of the tutors – did not speak Hungarian and the Hungarian medical language was practically missing. Finally, the Hungarian as the language of education was introduced in 1848. The lower degree courses (surgeon master, midwife, veterinarian had been held in the

national languages since the beginnings, i.e. in Hungarian, German and Slovakian.

In the legal code of April 1848, a separate article (Art. XIX, 1848) was dealing with the university and promulgated the independence of the university and the principle of liberal freedom of education. The majority of the tutors and students actively took part in the freedom fight. Therefore, the reprisal after the surrender severely affected the tutors of the university. Many were forced to go to prison (BALASSA János), to hide (BUGÁT Pál) or to emigrate (e.g. SCHOEPF-MEREI who later founded a children's hospital in Manchester). Certification procedures were performed, the tutors might hold their position depending on their loyalty and authority harassments were permanent. Tutors loyal to the emperor, but often of secondary level were employed by the faculty. At the time of the absolutism, the language of education and administration became the German instead of the Hungarian. Instead of the educational order of 1848, in the spirit of the "conformetur" principle, the Vienna order of 1833 was introduced. At the same time, there were modernisations as well. In this way, the secondary school maturity became obligatory and the faculty director position was deleted. Although experts were trained still in 9 faculties, the surgeon master course slowly faded and based on the pattern in Lemberg, Olmütz and Salzburg, this training was suspended also in Pest. In 1872, the guilds were also dissolved. As regards the language issue, a shift occurred only after the large foreign policy defeat of the royal court. In 1859, a delegation of students went to Vienna to restore the Hungarian language. In 1860, the right of autonomous rector and dean election was extended also to the university of Pest. As a result of the October Diploma, the main subjects were taught in Hungarian and the others in German, Slovakian or Latin depending on the demands. Finally, it was the Article XLIV of 1868 after the Austro-Hungarian Compromise to reinstate the Hungarian language. This time, many tutors not speaking Hungarian left the university, e.g. the outstanding physiologist, Jan Nepomuk Czermák resigned as well contrary to the efforts of his Hungarian colleagues to make him stay.

The harmonised medical training was introduced in 1872, thus, since 1878, only one medical diploma has been existed with the name "doctor of the universal medical sciences". The new university decree in 1875 determined the order of the new and universal medical doctor comprehensive exam in addition to the provision of the freedom of education and the autonomy. In 1881, the duration of the academic year also changed. Earlier it had been between November and August and since that time, it has been between September and June.

Due to the poor facilities, the main problem of the medical faculty was the lack of space. Although in 1848, the clinics were transferred from the Újvilág utca building, it proved to be only temporary, since after the suppression of the freedom fight, they returned there. The Saint Roch Hospital refused on to host the clinics and the capital failed to provide a site for the constructions for a long time. The acquisition of the Kunewalder house (located that time in the Országút, today in the Múzeum körút) in 1858 was a temporary relief that time, which was originally bought for the Institute of Veterinary. The surgery (Balassa), the zoology, the physiology and the obstetrics headed by Semmelweis that time were able to move here. The administration of the faculty and the library got temporary home in buildings nearby. A real solution was brought only by the large-scale constructions started in 1873 with a cost of 25 million kronas, which were finished only in 1911. This time, the Üllői út considered that time as a rather outer belt area became the axis of the Medical Faculty, where the clinics, the institutions and the administration were located in two sites. Simultaneously, new, often parallel departments sufficiently equipped in the level of the era were established one after the other. The number of such departments almost quadrupled until the 1880's. In these still unique developments, EÖTVÖS József and TREFORT Ágoston ministers of the Ministry of Religion and Public

Education, BERZEVICZY Albert state secretary, MARKUSOVSKY Lajos councillor and on behalf of the Medical Faculty BALASSA János, KORÁNYI Frigyes and the later secretary of state, TÓTH Lajos played key role.

With the rapid development of the clinics, the catch-up of the lagging behind was successful. Parallely to the constructions, the “medical school of Budapest” became clear around Balassa having launched a medical weekly “Orvosi Hetilap” and Markusovszky. As an effect of Semmelweis, this was the place where the deliberate prevention of surgical infections was started. Public health was among the first to get a department in Budapest, headed by the outstanding bacteriologist, FODOR József. By continuing the work of Schoepf-Merei and Sauer, KORÁNYI Frigyes was the one to begin the establishment of a Hungarian internal medicine school on a state-of-the-art foundation. His work was carried on by his son, Sándor. JENDRASSIK Ernő, named also as the Hungarian Charcot was one of the founders of neurology, DOLLINGER Gyula was that of orthopaedics and TAUFFER Vilmos was that of the surgical obstetrics and gynaecology. LUMNICZER Sándor, the founder of modern surgery was the first to use the Lister’s system of antiseptis. Owing to the work of SCHULEK Vilmos, GRÓSZ Emil and IMRE József, Hungarian ophthalmology became this time famous throughout Europe. As regards paediatrics, the Bókays and KOPITS Jenő, the international expert of hip dislocation deserve mention. The first director of the Hungarian Pasteur Institution, HÖGYES Endre set the foundations of the later Nobel prize winner invention of BÁRÁNY Róbert. With the research of the fine structure of the nervous system, the anatomist LENHOSSÉK Mihály achieved the recognition of his Nobel prize winner colleague, Santiago Ramón y Cajal who considered him as his fellow during the creation of neuron studies. In stomatology, the work of ÁRKÖVI József, while in pharmacology, that of BALOGH Kálmán were outstanding. In 1907, the Radiology got a separate institute headed by the founder of radiology in Hungary, ALEXANDER Béla. Physiology became a modern science in the Medical Faculty owing to the outstanding Czermak of Czech origin. He was followed by JENDRASSIK Jenő whose aim was the foundation of the modern Hungarian physiology school.

The number of students drastically increased. In the 1860’s, their number was between 400-500, while in the 1880’s, it exceeded 1000. In the 1860’s, the first student associations were established. In 1862, aid society and 5 years later, a self-education association was founded. The end of the century was the first time when the issue of the admission of women arose. The medical faculty had generally a rejecting opinion thereabout. The first Hungarian female physician, countess HUGONNAY Vilma succeeded to achieve the recognition of her diploma obtained in 1879 only after 17 years of administrative struggling. In 1895, a decree made it possible for women to participate in trainings and practices in humanities, medical studies and pharmacology. The first female physician graduated in Budapest, STEINBERGER Sarolta was inaugurated on 3 November 1900. A real change in the training of female physicians was brought only by the world war.

During the World War I, the majority of the students and the tutors joined the army and the half of the beds the number of which increased to 2000 were maintained for the injured. The change to war industry and the economic exhaustion of the Monarchy drastically decreased the financial supply of education and also of the university. The war almost eliminated the students, however, after their disarmament, there was a dumping. Compared to the last year in peace, more than twice as many (6526) medical students wanted to continue their interrupted studies.

The revolution and the dictatorship of the proletariat triggered further chaos in 1918-19. The university was made subject to stringent central administration and there were significant transformations. There were changes in the personnel and the tutors considered as right

wing were deprived of their positions. During the short existence of the Council Government, its measures could not be long-lasting. By rising to power of the counterrevolution, the faculty council qualified the events after 31 October 1919 as “ex lex” and further changes in personnel and certification procedures were started. Tutors were removed from the faculty, among others HEVESY György, one of the founders of nuclear medicine who later won the Nobel prize abroad or the outstanding ophthalmologist, GRÓSZ Emil, but his removal was only temporary.

From the annexed areas, a smaller migration started to the remaining “Mutilated Hungary” and especially to Budapest. Mostly the state-employed intellectuals (public officers, physicians, teachers etc.) were forced to migrate, partly as their job was linked to the language and partly as they could have been hardly employed by a newly settling foreign state. The largest overcapacity was experienced in the field of physicians, mostly in Budapest, therefore, the fight for making a living was quite harsh. In addition to the too large number of students and the experience from the revolutions, this was also a reason of the issue of the Act XXV of 1920 also known as “numerus clausus”, the initiation of which just started from the Medical Faculty of Budapest. The point of this act was to tighten the conditions of the admission to university, with which on the one hand, they tried to decrease the number of students in further education and on the other they tried to exclude anyone who had taken part in the revolution and to limit the number of Jewish students. This latter affected especially the Medical Faculty, since as it was a course of open access, many Jewish youngsters have selected the medical profession since the beginning. On the other hand, this act was beneficial for the spread of protectionism. At the same time, the faculty tried to block the admission of women as well. On 14 April 1921, the university in Budapest took the name of its founder, PÁZMÁNY Péter and had this name until 1950.

The economic crisis aggravated on by the mutilation of the country led to a financial crisis for the university it had never experienced before. The situation had just begun to normalise when the crisis in 1929 resulted again the decrease in the financial resources spent on education and health care. Unemployment appeared among the physicians as well, the workforce reduction in the university exceeded 10%, the investments stopped and the quarter of the beds had to be left empty due to financial reasons. The number of students sharply decreased as well (in 1925-26 there were 1729, in 1930-31 only 1234 students), contrary to the international trends.

The reform of the medical training which had been on agenda for a long time was introduced in 1922. As a main principle, the researcher and practising physician trainings were in focus. The duration of the education increased to 6 years instead of 5, the comprehensive exams were separated in four cycles and the number of the courses announced was also increased. Later, the system of comprehensive exams was modified on, but it was entered into force only in 1943. In 1936, the classification of the diplomas changed. This was the time when the qualifications used even today, i.e. the rite, the cum laude and the summa cum laude were introduced. After a long time, also the pharmacist education was renewed by increasing the duration of the education from 2 years to 4 and by decreasing the practice from two years to one. Thereafter, the start of the pharmaceutical studies was not linked to a prior practice in a pharmacy, but after the maturity exam, one could immediately enrol.

Between the two world wars, internationally acknowledged schools were operating in the Medical Faculty, such as the school of KORÁNYI Sándor who developed on the school founded by his father. Among his results, the elaboration of the functional examination methods of kidney and the reduction of tuberculosis are outstanding. Many of his students became academicians and heads of department, such as RUSZNYÁK István, HETÉNYI Géza and HAYNAL Imre. The research on cancer made by KROMPECHER Ödön who described

the basocellular cancer, that on nucleins, complementaries and enzymes by LIEBERMANN Leó or that on morphology by SCHAFFER Károly were significant. As regards pathoanatomy, BUDAY Kálmán clarified the pathogenesis of necrotic stomatitis and mellitis. In microbiology PREISZ Hugó, in biochemistry HÁRI Pál, in physiology FARKAS Géza and in biology HUZELLA Tivadar can be mentioned. In the fields of clinical medicine, the paediatrician HEIM Pál, BÓKAY János and BÁLINT Rezső, the surgeon VEREBÉLY Tibor and the ophthalmologists GRÓSZ Emil and BLASKOVICS László were the outstanding experts of their fields.

Apart from the military duty affecting the tutors as well and the care of the injured, the World War II had not trigger any special disturbance in the life of the Medical Faculty until 1944. With the approach of the front, the majority of the tutors were deployed. The rise to power of the Arrow Cross Party on 15 October 1944 posed new threats on the university and thus, the Medical Faculty as well. Contrary to the categorical order of the government, the university denied to move to Germany. Afterwards, there were plans to transfer the clinics and laboratories to Buda, however, they were mostly thwarted partly due to the repeat resistance of the faculty and partly due to the difficulties in transportation. Before the closure of the shell of fortress lines, the engineering, medicine, pharmacy and veterinary senior students were carried to Germany with a military call-up, i.e. the representatives of every programme considered as important regarding the continuation of the war. In this way, about 600 medical and pharmacist students from the Medical Faculty Budapest were settled partly to Halle and partly to Austria with some of the education staff. They succeeded to return only after the war among huge difficulties and with the mediation of the university, with American passport.

Together with the city, the faculty was also heavily hit by the siege of Budapest. The damage in the buildings were enormous (four clinics were severely hit) and the majority of the equipment was also destroyed. The total damage was around 13 million golden pengő (at 1938). The largest devastation affected the Internal Medicine II, the Gynaecology I, the Dermatology, the Surgery II and the Paediatric Clinics, but several other buildings were damaged as well. This was aggravated by the freezing of the drainage system and the plundering affecting the whole city. Contrary to all these, the clinics were operating even in case of the siege, often under impossible circumstances. Even the Institute of Physiology and

the Pathoanatomy department started to perform the care of the injured.

After the war, the tutors were significantly changed according to the taste of the new political forces having the power. The main tool of this was the certification procedure. It describes the ratios well that against 15 out of the 27 regular tutors of the medical faculty, procedures were launched or they were dismissed with various sanctions. In addition to this, in January 1945, IMRE József professor died which led the Ophthalmology Clinic to get empty. In addition to them, 6 honorary extraordinary tutors, 17 private professors and 11 physicians were dismissed. Out of the physicians above, 44 were still in Germany with the students carried there.

From June 1945 until his emigration, the Nobel Prize winner professor SZENT-GYÖRGYI Albert was among the tutors of the faculty, who was that time the head of the Department of Physiology and Medical Chemistry. From 1945, there was a sharp increase in the number of the students, which exceeded multiple times the capacity of the faculty, therefore, from 1947/48 onwards, they were forced to introduce admission examination. After the rising of the Communist Party to power, one of the most important factors became the origin of the candidate, therefore, the social composition of the students significantly changed. Soon, almost 25% was the ratio of the students from worker or pawn origin. The National Association of Peoples' Colleges was founded and from the academic year 1951/52, the Scientific Students' Association movement was introduced based on Soviet pattern. In 1948, education was reformed again. The examinations were tightened, education turned more pragmatic and the medical chemistry and physics were included into the curriculum, in addition to the biology in 1950. Due to political reasons, the Marxism and Leninism, the Russian language and the national defence knowledge were also added.

In this period, multiple hospitals were attached to universities by forming clinics. Therefore, the number of beds increased to 3167 in 1955 from the 1178 in 1946. In parallel, specialisation was going on within the disciplines, which led to further separations in the clinics as well. Areas with larger and larger costs entered into research, therefore, fallback behind the rich countries was evident. This was worsened on by the isolation policy in the 1950's when there was Soviet influence also in science.

## II. History of the separate Medical University: BOTE, SOTE (1951-2000)

After 1949, the Hungarian higher education underwent consecutive reforms. Due to the fight against churches, the name of the university was modified, therefore, instead of its founder, PÁZMÁNY Péter, the university got the name of one of its most prominent scientist tutors, EÖTVÖS Loránd on 1 September 1950. At the end of 1950, the Council of Ministers discontinued the former practice and traditions and decided the creation of specialist universities subject to the sectoral ministries. They wanted to reach it partly by founding new institutions and partly by the division of the currently existing ones. During the reorganisation, the Soviet higher education system of the 1930's was taken as example, disregarding that since that time, this had been significantly modified also in the Soviet Union by resetting the unified management of higher education. The deadline of the completion of the action was planned to be on 1 February 1951. Within the framework of this, the medical faculties of the universities were separated and transformed into separate specialist universities. In a parallel way, the new medical universities were subordinated not to the Ministry of Religion and Public Education, but the newly formed

Ministry of Health. Therefore, from 1 February 1951, the Faculty of Medicine of the Eötvös Loránd University continued its operation as a separate Medical University of Budapest.

In 1955, the organisational transformations went on. Within the University, 3 faculties were formed (with their former names: Faculty of General Medicine, Faculty of Dentistry and Faculty of Pharmacy). On 1 September 1955, the rectorate was established. The pharmacist training was transferred permanently to the medical university from the Eötvös Loránd University back in 1951 and in 1952, the dentist training of new system was started. Finally, on 7 November 1969, for the 200<sup>th</sup> Anniversary of the Faculty of Medicine, the university took the name of SEMMELWEIS Ignác.

Separation had, however, some disadvantages as well. From certain aspects, the distance from the humanities and the Faculty of Sciences led to drawbacks for the medical profession. The everyday life of the new university was made more difficult by that it had

only the narrowest professional institutes and the conditions for the cultural and sports life or the rooms suitable for hosting large events were missing. They were able to be terminated only by the large investments of the 1970's. After the separation of the university, the separation from the BEAC university sports club also took place to form the Orvosegyetem Sport Club (OSC, Medical University Sports Club). The fencers and waterpolo players of the OSC have been the regular and successful participants of the Olympic Games and world championships.

The prints of the war had not even disappeared when as a protest against the communist power, the revolution broke out on 23 October 1956. In the student movements, the students of the medical university also took place and after the breaking out of the armed fight, the role of our university aimed mostly at the care of the injured, since our institutions were in the centre of the war in Budapest. The staff of the affected clinics and institutions exhibited superhuman and heroic withstand multiple times. Further buildings were damaged and the most severely hit building was the Dermatology clinic. The reprisal after the communist restoration did not avoid our university either. The victim of this reprisal was the innocently slandered and executed TÓTH Ilona senior physician student who is considered today as the martyr of our university.

After consolidation, the emerging external relations from the 1960's facilitated us to keep up with the scientific international profession. In the following decades, serious developments were performed as well. The most important of them were the reconstruction of the Dermatology clinics demolished in 1956, the huge theoretical building finished in 1978, the Ophthalmology clinic I and the delivery of the Transplantation and Surgery Clinics in the beginning of the 1990's. In the clinics, healing and education took place this time with more than 3100 beds.

The increase of the ratio of the international students has started to grow since the 1970's. This time, they arrived mostly from the developing countries and mostly from the so-called democratic countries. Education in German language started in 1983 and after an experiment in 1987, the regular education in English language started in 1989.

The Act LXXX of 1993 on Higher Education made it the task of the universities to prepare for scientific degree and to award the PhD degree, based on which the Semmelweis University got its Doctoral School accredited in the same year and until 2018, it started 47 programmes.

### III. The history of Semmelweis University (2000–2026)

At the end of the 1990's, the transformation of the Hungarian higher education network was put on agenda with the aim of institutional integration. The final stage of this process was determined by the Act LII of 1999 on the Transformation of the Higher Education Institutional Network. Accordingly, even in July that year, three universities (the Semmelweis University of Medicine, the Haynal Imre University of Health Sciences and the University of Physical Education) elaborated the plan of the organisational, operational and financial policy of the university to be created, together with the call for application for the rector and the director general. After the preparatory work, on 1 January 2000, Semmelweis University was established by the merger of the Semmelweis University of Medicine, the Haynal Imre University of Health Sciences and the University of Physical Education, which consisted of the following faculties: Faculty of General Medicine, Faculty of Health Sciences, College Faculty of Health, Faculty of Dentistry, Faculty of Pharmacy and Faculty of Physical Education and Sport Sciences. From this group, the Faculty of Health Sciences of the Haynal Imre University of Health Sciences was removed and based on a governmental decree, it ceased to exist. (The successor of the Haynal Imre University of Health Sciences was the new organisation, the National Medical Centre formed from it, which was known as Szabolcs utca Hospital until its closure in 2007.) The College Faculty of Health of the Haynal Imre University of Health Sciences remained on the part of the university, which continued its operation from the end of 2001 with 5 faculties: Faculty of General Medicine, College Faculty of Health (from 2007 with the name of Faculty of Health Sciences), Faculty of Dentistry, Faculty of Pharmacy and Faculty of Physical Education and Sport Sciences. In its decision no 62/2008 on 29 May 2008, the Senate of Semmelweis University decided to found its sixth faculty, the Faculty of Health and Public Services with the participation of three institutions working in the border of natural sciences and social sciences, i.e. the Health Services Management Training Centre, the Institute of Mental Health and the Institute of Health Informatics, Development and Further Training. The faculty started its activity in January 2010 and the inaugural meeting of the Faculty Council was held on 21 April 2010. The new faculty has mostly social science orientation, however, it integrated interdisciplinary trainings at the border of sciences. With its programs, it covers

the whole educational spectrum including the basic training, the master training, the doctoral training and the postgraduate specialist training courses in the field of healthcare management, mental and community health and health informatics.

In addition to the structural reorganisation, the new millennium brought significant developments as well. In 2003, the College Faculty of Health succeeded to move to a new site instead of its earlier fragmentation (Óbuda, Újpest, Józsefváros), to the Vas utca close to the centre of the university, into the fastidiously renovated building of the former Pajor sanatorium and later Balassa János Hospital. The Educational Centre of the Faculty of Dentistry was built between 2006-2007 in the site of the Pátria printing house, in the Szentkirályi utca. Almost all of the clinics and departments of the faculty moved to this state-of-the-art building. In September 2008, the plan of a long-standing desire of a second theoretical building, back from the 1960's came true in the form of the Theoretical Medical Centre in the Tüzoltó utca, which won several architectural professional prizes. In the gross 27,000 m<sup>2</sup> of the building, there are research laboratories, study rooms, student laboratories, lecture rooms, a modern animal house and seven seminar rooms. The two latter investment was performed in the so-called PPP construction. Among the renovations of buildings, the multistage project of the Central Management Building (Üllői út 26) started in 2008 has to be mentioned, the first stage of which, the renovation, was finished in 2009 and the project was completed by the formation of the loft in 2012. The Ophthalmology Clinic in the Mária utca and the 1<sup>st</sup> Department of Pathology and Experimental Cancer Research were renovated in 2013. In the summer of 2012, the large-scale development of the Outer Clinical Site, the Korányi project was started, which is one of the most significant investment of the previous century of the university.

Between 2008 and 2010, Semmelweis University started three off-site trainings abroad. The first was the Asklepios Campus Hamburg, within the framework of which the students studying in German language continue their studies in the Hamburg campus according to the Hungarian curriculum, after the theoretical training in Budapest and they get the medical (M.D.) diploma of the

Semmelweis University at the end of the training. In cooperation with the L.U.de.S University, Lugano, Switzerland, the Italian and English language physiotherapy basic training (BSc) started in 2009, with the same curriculum as the one applied in Budapest. Following the successful MAB accreditation procedure completed in 2019, the first Master's program in Health Care Management was launched in 2020 as an off-site program in Bratislava. Based on the agreement concluded with Westpfalz-Klinikum Kaiserslautern in 2026, the Faculty of Medicine's second educational site in Germany will soon be established.

In 2010, Semmelweis University won the title of Prestigious Research University related to which it performed a large-scale tender with the title "Modern Medical Science Technologies in the Semmelweis University". Within the framework of a tender of almost 3 billion Hungarian Forints, outstanding results were achieved in five distinguished fields of research: personalised medicine, imaging procedures and bioimaging, bio-engineering and nanomedicine, molecular medicine and in the integrative educational module. The university won the Research University qualification for the period 2013-16 as well, which is still possessed.

In Hungary in 2011, Semmelweis University was the first among the medical universities to develop e-learning learning materials within the framework of a two-year Social Renewal Operational Program (TÁMOP) and the possibility became open to hold on-line examinations. Even in that year, the E-learning and Digital Content Development Centre was founded, which performs the coordination tasks of the development of the university learning materials.

In 2013, the Central Institute of Stomatology was terminated, the role of which was taken away by the Department of Community Dentistry within the university. This Department renovated in 2019 is the largest institute of the Faculty of Dentistry in terms of staff and floor area and in addition to the continuous patient care, it takes part in the education, specialist physician training and further education tasks as well. In 2014, the Thoracic Surgery Department was established, which is operating on the basis of the National Institute of Oncology. In December 2015, the first successful lung transplantation in Hungary was performed here.

On 1 September 2014, the Faculty of Physical Education and Sport Sciences spun off Semmelweis University and it continued its operation separately again, with the name of University of Physical Education.

In the end of 2014, similarly to many Hungarian institutes of higher education, with the introduction of the chancellor position, the management system of Semmelweis University was changed. Education, research and patient care are managed by the rector, while the tasks regarding the operation and the management of the university were transferred to the chancellor. From 2015, the management of the Clinical Centre of the university was taken by the vice-rector for clinical affairs from the rector. On 1 August 2017, the Pető András College and its part, the Institute of Conductive Education joined the University, which has been operating as the Pető András Faculty. In this way, the number of faculties increased to six again.

In 2018, the university celebrated the 200<sup>th</sup> anniversary of the birth of Semmelweis Ignác after whom the university got its name and with the solemn opening ceremony of the academic year 2019/2020, the jubilee year of the university starts, with which we pay tribute to the 250<sup>th</sup> anniversary of the foundation of the university.

As of 1 August 2021, Semmelweis University was placed under the administration of a public-interest trust foundation performing a public function, with the Foundation for National Health Care and Medical Education ("NEOA") as its sponsor.

In March 2022, the new five-story building of the Faculty of Health Sciences—covering more than 4,500 square meters and opening onto Szentkirályi Street—was officially opened; it was named after Zsuzsanna Kossuth, the country's first chief nurse. The new wing houses two grand auditoriums, as well as skill labs and classrooms designed to support hands-on training.

In June 2022, Semmelweis University's Da Vinci robotic surgery system—the fourth-generation Da Vinci Xi robot, representing the most advanced technology—was installed at the Department of Surgery, Transplantation, and Gastroenterology (STÉG). Robot technology is primarily used for abdominal, gynecological, and urological surgical procedures. In addition, thanks to its dual-arm design, it also plays a role in education. The first Da Vinci robot-assisted surgery took place at the university in May 2022.

During the academic year 2022/2023, the institution once again celebrated a significant anniversary: the 40th anniversary of the launch of its international medical training program. The German-language program began in 1983, and the English-language program was launched in 1989.

In the academic year 2023/2024, the joint Semmelweis University Doctoral School was established, where—following the merger of the formerly accredited schools—doctoral programs are offered in 11 departments.

As of 1 November 2023, the Gusztáv Merényi branch of the Southern Pest Central Hospital — National Institute of Hematology and Infectious Diseases was integrated into Semmelweis University; all traumatology care for the Southern Pest region was transferred here, and the Clinic of Traumatology was established as a new organizational unit through the merger with the Department of Traumatology.

As of 1 March 2024, the university's portfolio expanded further: the neurology and neurosurgery outpatient and inpatient services of the National Institute of Mental Care, Neurology, and Neurosurgery's facilities on Amerikai út (formerly OKIT), as well as the specialized general surgical, orthopedic, and rehabilitation care provided by the facility of the National Institute of Musculoskeletal Disorders located in Szanatórium utca, were integrated into Semmelweis University. As a result, the Department of Neurosurgery and Neurointervention and the Department of Rehabilitation were established.

On 1 March 2025, the Department of Rheumatology and Immunology of Semmelweis University was established through the full integration of the former National Institute of Rheumatology and Physiotherapy (OMINT).

# Senate

---

The Senate is the highest governing body of Semmelweis University with decision-making authority, the right to submit proposals, and the right to evaluate and review matters. The chairman of the Senate is the rector of Semmelweis University.

The member of the Senate may be such a person – excluding representatives of the Student's Union and other representative organisations – who is employed by Semmelweis University in an employment relationship or as a full-time working public servant, i.e. lecturer, researcher, teacher, or other scope of activity. The Senate consists of 45 members. This number is determined according to the seats available based on position, election and delegation as a result of election, defined in Section 13, part (4)-(5) of the Organisational and Operational Rules. The Rector and Chancellor are ex officio members of the Senate.

## Members of the Senate

### RECTOR

Dr. Béla Merkely

### CHANCELLOR

Dr. Lívía Pavlik

### VICE RECTORS

Dr. Ferenc Bánhidý  
Dr. Attila Szabó  
Dr. Péter Hermann  
Dr. Ferdinandy Péter  
Dr. Éva Feketéné Szabó  
Dr. Alán Alpár

### FACULTY OF MEDICINE

Dr. Péter Nyirády  
Dr. Zoltán Jakus

### FACULTY OF HEALTH SCIENCES

Dr. Gabriella Bednárikné Dörnyei  
Dr. István Vingender  
Dr. Zoltán Balogh

### FACULTY OF DENTISTRY

Dr. Gábor Gerber  
Dr. Csaba Dobó Nagy  
Dr. Zsolt Németh

# THE WORDS OF THE VOW AT REGISTRATION

I....., student of Semmelweis University promise under oath that I will respect the Hungarian laws and the Fundamental Law of Hungary. I promise that I shall abide by the regulations of Semmelweis University. I promise solemnly that I will respect the professors and teachers of the University, and that my conduct will be in keeping with the honor of my profession. I will keep the secrets of the patients that I learn about in the course of my studies. I will pursue my studies with full sense of responsibility to prepare myself to the best of my abilities for all my duties and obligations in my profession so as to be able to serve with my knowledge the progress of mankind. So help me God!

## THE WORDS OF OATH AT GRADUATION

### Faculties of Medicine and Dentistry

"I, ..... swear that I will devote myself to the medical profession at all times. I will use the knowledge acquired in the field of medicine to prevent and cure diseases, and to benefit the physical and mental well-being of my patients. I will not betray the confidence of those who turn to me, I will not take advantage of their defenselessness, nor will I disclose their secrets. I will treat every person with equal care and attention. I will maintain the high quality of my knowledge and skills through continuous education, but will also acknowledge the limits of my knowledge and abilities. I will respect the ethical requirements of my medical practice. I will strive to enhance the reputation of the medical profession and of SEMMELWEIS University."

"Én, ..... esküszöm, hogy orvosi hivatásomhoz mindenkor méltó magatartást tanúsítok. Orvosi tudásomat a betegségek megelőzésére, a betegek testi-lelki javára, betegségük gyógyítására fordítom. A hozzám fordulók bizalmával, kiszolgáltatott helyzetével visszaélni nem fogok, titkaikat fel nem fedem. Egyenlő figyelemmel és gondossággal gyógyítok minden embert. Tudásomat és gyakorlati ismereteimet állandó képzéssel magas szinten tartom, de ismereteim és képességeim korlátait is tudomásul veszem. Az orvosi működésemmel kapcsolatos etikai követelményeket tiszteletben tartom. Arra törekszem, hogy az orvostudomány, valamint a SEMMELWEIS Egyetem jó hírnevét öregbítsem és megbecsülését előmozdítsam."

### Faculty of Pharmaceutical Sciences

I, ..... swear that in virtue of my acquired knowledge of pharmaceutical sciences, I shall do my professional duty with the utmost diligence, and I shall always behave worthy of my profession. I shall place before all things the care for and the healing of my patients. I shall not reveal any data concerning the health status or the medication of my patients. I shall maintain my theoretical and practical knowledge at a high level. I shall never use my knowledge for activities that are contrary to the ethical code of pharmacists. As a participant in the activity of healing, I shall use my knowledge only for the defense and restitution of health to my fellow humans. I shall do my best to promote the science of pharmacy and keep the good name of the Semmelweis University.

# PLAGIARISM DECLARATION

## at the Faculty of Medicine

(Declaration on compliance with regulations on preparing thesis work)

I, the undersigned, name: .....

(Neptun code: ..... ) hereby declare by signing this declaration that this thesis work, entitled:

.....  
.....  
....."

is my own work, and I adhered to the provisions of Act LXXVI of 1999 on Copyright in the preparation of the thesis work and respected the rules laid down by the University.

I acknowledge by signing this declaration that Semmelweis University refuses accepting the thesis provided it can be proved that this thesis work was not carried out by me or violation of copyright law arises with regard to the thesis.

I am also aware, that the authorization holders may take action against me because of violation of copyright law, which may result in legal consequences, including consequences of civil law, infringements act and criminal law.

Budapest, ....., 20.....

student's signature

# Rectorial Circular

## **on the independent work of students and on certain questions concerning lecture and practice policies**

In order to meet the requirement for independent student work and to ensure the smooth functioning of lectures and practices, I hereby draw the attention of the students of Semmelweis University to the following:

- I. In the course of testing one's knowledge and practical skills, it is prohibited, under disciplinary liability, to use any unauthorized material, or to secure any illicit advantage. For the purpose of this provision, advantages ensured to disabled students in accordance with legal provisions or university regulations and allowances based upon individual decisions made in accordance with Chapter III Part III of The Rules of Operation and Organization of Semmelweis University qualify as allowed advantages.
- II. The independent creation of original work, as well as the true and accurate citation, and the precise and complete indication of the sources used are not only scientific requirements, but also obligations arising from legal regulation. Intellectual property is protected by the laws of Hungary. The content of this protection is defined particularly by the Copyright Act, the acts on inventions and patents, and on trademarks and the Civil Code of Hungary. The intellectual property of another person is only allowed to be used in accordance with these regulations.

All creations of literature, science and art shall fall under copyright protection as defined by Act No LXXVI of 1999 on copyright. According to this act, from a work disclosed to the public any part may be cited by indication of the source and naming the author indicated therein. Such citation shall be true to the original and its scope shall be justified by the nature and purpose of the borrowing work. The free use is permitted only so far as it does not conflict with a normal exploitation of the work and does not unreasonably prejudice the legitimate interests of the author, and it is in compliance with the requirements of fairness and is not designed for a purpose incompatible with the intention of free use.

The consequences of the abuse of rights relating to intellectual property are provided by law, thus the abuse of these rights may also fall under disciplinary liability.

- III. In the absence of previous authorization, it is prohibited, under disciplinary liability, to take photos or make video or sound recordings at lectures and practices. In addition, any misuse of the likeness or recorded voice of another person shall be deemed as a violation of inherent rights and may result in other consequences. The disclosure of likeness or recorded voice of another person shall be authorized by that person.

I request all students to take notice of the above.

# Attention to Students of Foreign Language Programs at Semmelweis University

In recent years, Semmelweis University has built a valuable student community by maintaining high academic standards and placing much emphasis on the ethical integrity of our education. The overwhelming majority of our students appreciate our efforts. Unfortunately, a small minority does not want to accept our ethical guidelines, and tries to take undue advantage at exams by using unacceptable techniques.

We therefore do implement the following sanctions:

Against students who are found at exams possessing forbidden items, including electrical devices, such as mobile phones, ipods, etc. a disciplinary action will be initiated that can end with immediate discharge with disgrace from Semmelweis University. By implementing this rule, we wish to preserve the academic and material value of the Semmelweis Diploma.

## NEPTUN.NET Unified Education System

### Summary for Students

At Semmelweis University, the education system NEPTUN.Net is used for performing administrative tasks related to education. The users of the system – registry clerks, faculty secretaries, instructors and students – have different authorities to access the information stored in the system.

For the students of the institution, the system provides the following functions:

- To check their personal data and information related to their studies,
- To register for subjects,
- To register for exams,
- To check grades entered into the system,
- To monitor the grants transferred,
- To get information on their payment obligations,
- To manage their finances,
- To receive messages within the system from registry clerks, secretaries of institutions and instructors.

You get your user ID and password to the NEPTUN.Net system from the Dean's Office or the Registry of the Faculty where you

have been admitted. Users with students' rights may only manage their own data. In order to prevent unauthorized access, it is very important that you change your password from time to time. It is recommended that you change the password immediately upon entering the system for the first time. The password should be minimum 6 characters long, consisting of letters, numbers or a mixture of both.

Students can access the NEPTUN.Net system on any computer located in students' terminal rooms (in the Student Centre /NET/ and in the Central Library) or any other computer with Internet access using a browser (Internet Explorer 7 or Mozilla Firefox version 2) from the official university Neptun Portal (**<http://net.neptun.sote.hu>**).

(For a detailed description of the Students' WEB please check the Neptun Portal – Support / Neptun usage / Aids by role / Aids for students).

### Entering the system

On the Neptun Portal, click on the Student icon to enter. Then choose the server you wish to use. Enter the Neptun code (ID) and the password on the window which appears.

Once you enter you can choose from the following data groups at the top of the page:

Personal data, Studies, Subjects, Exams, Finances, Information, Administration

Upon entering the Neptun.Net system, students have to perform the following operations during a term:

- Registration
- Subject registration
- Exam registration

### Registration

You can access the registration function in the "Administration" menu. Here you can register for the next term by clicking on the link "Registration". On the page "Registration requests", when clicking on "New" in the status column of the current semester, a window is displayed where you have to declare whether you choose to register with an "Active" or a "Passive" status. After you have chosen the appropriate option, click on the button "I declare". (Such registration is only available if Registration period is displayed under "Periods" in the "Information" menu! If you

have not chosen any course for the semester yet, but you intend to register with an "Active" status, the program will ask you to make sure whether you really want to continue the registration process. If you choose the option "no" at this stage, this means that registration will not be completed, and before you do so, you can take up your courses. If you choose "OK", you can continue registration. Naturally, you are free to take up courses afterwards.)

### Subject registration (choosing subjects, choosing courses)

Choose the link "*Subject registration*" in the "*Subjects*" menu.

1. Displaying the list of subjects: Select the appropriate semester (e.g. 2022/23/1) and the curriculum, then select "Subject list of the chosen curriculum" under „Subject type" to display obligatory and elective subjects. The option "Other elective

subjects" may be used if the institution concerned manages its elective subjects separated from the curricula. If you do not find any subject in this list, this only means that at your institution these elective subjects are also integrated into the curricula. In this case, you should choose the option "Subject list of the chosen curriculum" at this question. By ticking "Show

only those subjects that will be launched" you can make sure that only those subjects appear in the displayed subject list which will be launched in the semester selected. You can display the subject list filtered according to the conditions set by clicking on the "List subjects" button.

2. Display, search and ordering options in the subject list: On the top of the list you can set the number of subjects to be displayed on one page. If the list is longer than one page, you can use the two-way arrows on the top of the list or the drop-down menu to turn pages. By clicking on the printer icon, you can print the page displayed. When you find the subject required, click on any detail and all details of the selected subject will be displayed in a pop-up window.
3. Subject details / Current courses tab: Here you can see the courses launched in the given semester for the selected subject. You can now choose the subject and its course or courses. You can choose the courses by marking the checkbox on the right of the course list, then confirm your choice by clicking on "Save" at the bottom of the page. You have to choose more than one course for the same subject if more than one course type (e.g. theoretical and practical) are announced. In this case, you need to choose one course for each course type. This is not true for exam courses which must be chosen independently in all cases, which means that you cannot choose an exam course and another course type for the same subject at the same time. Course registration will only be successful if:
  - **you have fulfilled the requirements for subject and course registration,**
  - none of the courses selected is booked out (in the students/limit column the number of students is under the limit),
  - **you have selected one course for each course type (e.g. theoretical, practical),**
  - **it is preliminary or final subject and course registration period,**
  - you have not completed the subject so far.
 For more information on a given course, click on any detail of the given course in the list to display the course information in a new pop-up window.
4. Deregistering subjects: If for any reason you would like to drop a chosen subject, you can do so under "Registered subjects" in the "Subjects" menu. On this page you can see the subjects you have chosen in the current registration period; you can change courses or deregister subjects here. If in any subject line you click on "Deregister subject", the system will first ask whether you really want to drop the given subject and if you answer yes, the subject will be dropped and deleted from the list of registered subjects. Naturally, this means that your registration for the courses of the deregistered subjects is also deleted and you will be informed of this. (Subject deregistration is possible during the preliminary or final subject or course registration period.)
5. Changing courses: If you want to change the course(s) you have chosen in a given subject you can do this by clicking on any detail of the given subject to display the pop-up window "Subject details". Here on the "Current courses" tab in the last column of the list you have to select the course(s) required and unmark the course(s) to be dropped, then confirm the change by clicking on the „Save" button. The system will report on the change or the reasons for potential errors.

## Exam registration

You can find "Exam registration" in the "Exams" menu. On this page you can register for exams or cancel your registration. In the exam list, exams which you have already registered for will appear in blue. To cancel an exam registration, go to the „Selected exams" menu.

1. List exams: On entering the page for the first time all future exam dates announced in the current semester will appear, but you can filter the list. If you only want to see the exam dates of a given subject, select the subject from the "Subjects" roll-down menu, then click on the button "List exams".
2. Exam registration: To register for an exam, click on "Register" in the line of the given date. The program will report on the success or failure of exam registration.
3. Cancelling exam registration: If you register for an exam by mistake or you simply change your mind and want to cancel your registration, click on „Cancel" next to the given exam. (Normally this can be done prior to the exam within the cancellation deadline.)
4. Payment of retake exam fee: By clicking on "Payment" under "Finances", you will be taken to the page where the list of settled and payable items is displayed. Here you can also fulfill your financial obligations. On the "Payment" tab, click on the "Transcribe item" button and on the appearing "Transcribe item" window, enter the payment title (retake exam), then select the subject for which you would like to transcribe the exam fee from the roll-down list. Finally, click on the „Create item" button. You can take over the invoice of the item created in the Dean's Office. To list current items, select the current semester using the "Semester" roll-down menu under "Filters" on the 1. "List items" tab. (Items you have displayed are marked as "Own item" in the "Status" column.) To view the details of a given item, click on "Details" in the line of the item concerned.

## Message management

During term time, students may receive messages on various topics. This menu can be found on the left-hand side of the page. Here you can see the messages sent to the student by the Dean's Office clerk in charge of his/her year or the instructor of a chosen course. You can view the text of the message on a new window by clicking on the required topic in the list of messages.

The NEPTUN system assists students and university employees in the accurate and effective performance of administrative tasks related to their studies. **In order to ensure faultless operation, it is indispensable that authority rules are complied with and that accurate data is provided. Therefore, please note that data changes or wrong data must be corrected within 8 days using „Modify data".**

# THE DEPARTMENTS OF SEMMELWEIS UNIVERSITY

## Semmelweis University, Faculty of Medicine

### Department of Anatomy, Histology and Embryology

1094 Budapest, Tűzoltó u. 58.  
Phone: +361/215-6920 ext. 53601 Dr. Andrea Székely  
53652 Dr. Dr. Katalin Kocsis (Pharm.)  
Head of the Department: Prof. Dr. Alán Alpár

### Department of Anaesthesiology and Intensive Therapy

1082 Budapest, Üllői út 78/B.  
Phone: +36 1 210-0330/61972  
<https://semmelweis.hu/english/health-care/health-care-units/Department> of Intensive Therapy  
Head of Department: Prof. Zsolt Molnár M.D., Ph.D.  
Tutor: Dr. András Lorx M.D., Ph.D.  
E-mail: [aitt.oktatas@semmelweis.hu](mailto:aitt.oktatas@semmelweis.hu)  
Obligatory subjects: AOKANE759\_1A  
Elective/Optional subjects: AOVANE104\_1A, AOSANE1184\_1A, AOKANG1137\_SA

### Institute of Behavioural Sciences

1089 Budapest, Nagyvárad tér 4. (20<sup>th</sup> floor)  
Phone: +361/210-2953 ext. 56136 Dr. Ágnes Dósa  
Head of the Institute: Dr. György Purebl

### Institute of Biochemistry and Molecular Biology

#### Department of Medical Biochemistry

1094 Budapest, Tűzoltó u. 37-47.  
Phone: +361/459-1500 ext. 60024, 60023, 60022  
Dr. Christos Chinopoulos  
Head of the Department: Prof. Dr. László Csanády  
Tutor: Dr. Christos Chinopoulos  
E-mail: [chinopoulos.christos@semmelweis.hu](mailto:chinopoulos.christos@semmelweis.hu)  
Obligatory subjects: Medical Biochemistry I, Medical Biochemistry II  
Elective/Optional subjects: Quantitative and Medical Biochemistry, Medical Biochemistry for OSCE Preparation

### Faculty of Medicine

#### Department of Bioinformatics

1094 Budapest, Tűzoltó u. 7., Tel.: +36 30 0164509  
Head of Department: Prof. Dr. Balázs GYÖRFFY  
Tutor: Dr. Otília Menyhart  
E-mail: [menyhart.otilia@semmelweis.hu](mailto:menyhart.otilia@semmelweis.hu)  
Elective/Optional subjects: Clinical Bioinformatics

### Department of Biophysics and Radiation Biology

094 Budapest, Tűzoltó u. 37-47., Tel.: +36 1 459-1500 /60200  
<https://biofiz.semmelweis.hu/?nyelv=eng>  
Head of the Department: Dr. Miklós KELLERMAYER  
Tutor: Dr. Dániel Sándor VERES  
e-mail: [veres.daniel@semmelweis.hu](mailto:veres.daniel@semmelweis.hu)  
Obligatory subjects (medical students): Medical Biophysics I; Medical Biophysics II.; Medical Statistics, Informatics and Telemedicine  
Obligatory subjects (dentistry students): Biophysics I.; Biophysics II.; Physical Foundations of Dental Materials Science  
Obligatory subjects (pharmacy students): Pharmaceutical Biophysics  
Elective/Optional subjects (all faculty): Mathematical and Physical Basis of Medical Biophysics; Modern Microscopy Methods in Medical Science; The Medical Aspect of the Nanoworld; Medical-biophysical Aspect of Radiological

Accidents; Digital Image Processing and Analysis; A Practical Introduction to MR Imaging; Introduction to the Clinical Biostatistics; Artificial Intelligence in Medical Research

### Department of Dermatology, Dermatooncology and Venerology

1085 Budapest, Mária u. 41.  
Phone: +3620/670-1308 Dr. Kende Lőrincz (Med.), 361/266-0465 ext. 55776 Dr. Bernadett Hidvégi (Dent.)  
Head of the Department: Prof. Dr. Péter Holló

### Institute of Clinical Psychology

1091 Budapest, Üllői út 25. 1<sup>st</sup> floor  
Phone: +361/459-1493  
Director: Xénia Gonda

### Department of Psychiatry and Psychotherapy

1083 Budapest, Balassa u. 6.  
Phone: +361/210-0330 extension 51100  
Head of the Department: Prof. Dr. János Réthelyi  
Tutors: Dr. Attila Pulay (Med., 5<sup>th</sup> year) ext. 51230, Dr. Ferenc Ádám Szabó (Med. 6<sup>th</sup> year), Dr. Zoltán Hidasi (Dent.)

### Institute of Digital Health Sciences

1089 Budapest, Nagyvárad tér 4. fszt. 18.  
Phone: +361/488-7620; +36-20/324-4158 Gergely Marosi  
Director: Dr. Tamás Palicz

### Department of Emergency Medicine

1082 Budapest, Üllői út 78./A  
Phone: +361/459-1500 ext. 62060  
Head of Department: Dr. Bánk Gábor Fenyves PhD  
Head of Education and Practice: Dr. Péter Vass  
Head of Education and Practice: Dr. Barbara Bukor  
email: [bukor.barbara@semmelweis.hu](mailto:bukor.barbara@semmelweis.hu)  
Tutor: Dr. Eszter Békefi-Erős  
email: [bekefi.eros.eszter@semmelweis.hu](mailto:bekefi.eros.eszter@semmelweis.hu)  
Substitute tutor: Dr. László Békefi  
email: [bekefi.laszlo@semmelweis.hu](mailto:bekefi.laszlo@semmelweis.hu)  
Tutor: Dr. Bálint Vörös  
email: [voros.balint@semmelweis.hu](mailto:voros.balint@semmelweis.hu)  
Obligatory subjects:  
First Aid, Emergency Medicine and Oxyology  
Elective/Optional subjects:  
POCUS (The use of point of care ultrasound in the Emergency Department)

### Department of Experimental Cardiology and Surgical Techniques

1085 Budapest, Nagyvárad tér 4., Tel.: +36 1 4591500/56569  
<https://semmelweis.hu/mutettan/en/>  
Head of Department: Dr. Tamás RADOVITS  
Tutor: Dr. Györgyi Szabó  
E-mail: [szabo.gyorgyi@semmelweis.hu](mailto:szabo.gyorgyi@semmelweis.hu)  
Obligatory subjects: *Basic Surgical Techniques*  
Elective/Optional subjects: *Intermediate knotting and suturing techniques*  
*Advanced Suturing Techniques*  
*Advanced Laparoscopic Techniques*  
*Intermediate Microsurgical Techniques*

**Department of Family Medicine**

1095 Budapest, Üllői út 25. City Corner Office  
Phone: +36 1 355-8530; +36 1 214-0841  
Dr. Ádám Becze, English Program Tutor  
[becze.adam@semmelweis.hu](mailto:becze.adam@semmelweis.hu)  
Katalin Karanedeve, English Program Assistant  
[karanedeve.katalin@semmelweis.hu](mailto:karanedeve.katalin@semmelweis.hu)  
Head of the Department: Prof. Dr. Péter Torzsa

**Institute of Genetics, Cell- and Immunobiology**

1089 Budapest, Nagyvárad tér 4. Tel: +36 1 210-2930  
Head of the Department: Prof. Dr. Edit BUZÁS  
Tutor: Dr. Eszter LAJKÓ (EM/ED Cell Science, EPh Cell Biology)  
[lajko.eszter@semmelweis.hu](mailto:lajko.eszter@semmelweis.hu)  
Dr. Hargita HEGYESI (EM Medical Genetics and Immunology I, ED Genetics and Genomics, EPh Genetics)  
E-mail: [hegyesi.hargita@semmelweis.hu](mailto:hegyesi.hargita@semmelweis.hu)  
Dr. Marianna HOLUB (EM Medical Genetics and Immunology II, ED/EPh Basic Immunology)  
E-mail: [holub.marianna@semmelweis.hu](mailto:holub.marianna@semmelweis.hu)  
Obligatory subjects: Cell Science (EM/ED)  
Cell Biology (EPh)  
Medical Genetics and Immunology I-II (EM)  
Genetics and Genomics (ED)  
Genetics (EPh)  
Basic Immunology (ED/EPh)  
Elective/Optional subjects:  
Chemotaxis - Its significance in biology and clinical sciences  
Genetics of Cell Organelles

**Heart and Vascular Centre, Department of Cardiology**

1122 Budapest, Városmajor. u. 68.  
+361/458-6842; <https://semmelweis.hu/varosmajor/en/>  
Head of the Department: Prof. Dr. Béla Merkely  
Tutors: Dr. György Bárczi [barczy.gyorgy@semmelweis.hu](mailto:barczy.gyorgy@semmelweis.hu)  
Dr. Roland Papp [papp.roland@semmelweis.hu](mailto:papp.roland@semmelweis.hu)  
Dr. Klaudia Vivien Nagy  
[nagy.klaudia.vivien@semmelweis.hu](mailto:nagy.klaudia.vivien@semmelweis.hu)  
Obligatory subjects: Cardiology, Heart Surgery, Angiology, Vascular Surgery; Clinical ECG

**Heart and Vascular Center, Department of Sports Medicine**

1122 Budapest, Városmajor. u. 68., +36 30 016 4458  
Head of Department: Prof. Hajnalka Vágó MD  
Tutor: Dr. Tímea Kovács  
Study Administrator: Katalin Solymosi  
E-mail: [cvc.oktatas2@gmail.com](mailto:cvc.oktatas2@gmail.com)  
Lecture: Sports Physiology, Sports Surgery, Sports Nutrition  
Practice: ECG, Spiroergometry, Echocardiography, MRT, Patient examination, Sport surgery- operating room, ambulance, rehabilitation, physiotherapy

**Department of Internal Medicine and Oncology (BOK)**

1083 Budapest, Korányi Sándor u. 2/A  
Phone: +361/459-1500 ext. 51465 Dr. Péter Studinger  
Head of the Department: Prof. Dr. István Takács

**Department of Internal Medicine and Haematology (BHK)**

1088 Budapest, Szentkirályi u. 46.  
Phone: +361/375-4364; +3620/825-0949 Dr. Katalin Keltai  
Head of the Department: Prof. Dr. Tamás Masszi

**Department of Laboratory Medicine**

1089 Budapest, Nagyvárad tér 4.  
Phone: +361/210-0278; 20/825-9753 Dr. Miklós Molnár  
Head of the Department: Prof. Dr. Barna Vásárhelyi

**Medical Imaging Centre**

1082 Budapest, Üllői út 78/A  
Phone: +361/459-1500; +3620/825-9215  
Tutor: Dr. Zsuzsanna Földes-Lénárd  
E-mail address: [lenard.zsuzsanna@semmelweis.hu](mailto:lenard.zsuzsanna@semmelweis.hu)  
Head of the Department: Dr. Pál Maurovich Horvat  
E-mail address: [okk.oktatas@semmelweis.hu](mailto:okk.oktatas@semmelweis.hu), [maurovich.horvat.pal@semmelweis.hu](mailto:maurovich.horvat.pal@semmelweis.hu)  
Obligatory subjects: Medical Imaging  
Elective/Optional subjects: Six-week Facultative course

**Institute of Medical Microbiology**

1089 Budapest, Nagyvárad tér 4.  
Phone: 459-1500/56101 Dr. Ágoston Ghidán,  
Head of the Institute: Prof. Dr. Dóra Szabó

**Department of Military, Disaster, and Law Enforcement Medicine**

1091 Budapest, Üllői út 25. II/209.; +36 (20) 825 0327  
Head of the Department: Prof. Dr. János Gál  
E-mail: [katasztrofa@semmelweis.hu](mailto:katasztrofa@semmelweis.hu)  
Elective/Optional subjects: Disaster Medicine

**Institute of Biochemistry and Molecular Biology****Department of Molecular Biology**

1094 Budapest, Tűzoltó u. 37-47.  
Phone: +361/2662615  
www: <https://semmelweis.hu/molekularis-biologia/en/>  
Head of Department: Prof. Dr. Miklós Csala  
Tutor: Dr. Gergely Keszler  
E-mail: [keszler.gergely@semmelweis.hu](mailto:keszler.gergely@semmelweis.hu)  
Obligatory subjects: Medical Chemistry; Molecular Cell Biology 1 & 2  
Elective/Optional subjects: Basics of Medical Chemistry; Methods in Molecular Biology; Molecular Medicine Research; Pathobiochemistry; Signal transduction and targeted therapy

**Department of Neurology**

1083 Budapest, Balassa u. 6.  
tel.: +36 + 2100330  
Head of Department: Prof. Dr. Tibor Kovács  
Tutor: Dr. Róbert Debreczeni  
E-mail: [debreczeni.robert@semmelweis.hu](mailto:debreczeni.robert@semmelweis.hu)  
– Faculty of Medicine  
Dr. Gertrúd Tamás  
E-mail: [tamas.gertrud@semmelweis.hu](mailto:tamas.gertrud@semmelweis.hu)  
– Faculty of Dentistry  
Obligatory subjects: Neuroanatomy IV.; Pathology II.; Internal Medicine III. (cardiology); Radiology  
Elective/Optional subjects: Physiology, Pathophysiology

**Department of Neurosurgery**

1145 Budapest XIV., Amerikai út 57.  
Phone: +361/467-9325

Physical Education VI.; Physical Education VII.; Physical

Education VIII.; Physical Education IX.; Physical Education X.;

**Institute of Biochemistry and Molecular Biology****Department of Medical Biochemistry**

1094 Budapest, Tűzoltó u. 37-47.

Phone: +361/459-1500 ext. 60024, 60023, 60022 Dr. Christos Chinopoulos

Head of the Department: Prof. Dr. László Csanády

Tutor: Dr. Christos Chinopoulos

E-mail: [chinopoulos.christos@semmelweis.hu](mailto:chinopoulos.christos@semmelweis.hu)

Obligatory subjects: Dental Biochemistry I, Dental Biochemistry II

**Department of Pharmacology and Pharmacotherapy**

1089 Budapest, Nagyvárad tér 4.

Phone: +361/210-2930 ext. 56270

<https://semmelweis.hu/pharmacology/en/>

Head of the Department: Prof. Dr. Péter Ferdinandy

Tutor: Dr. Pál Riba, [riba.pal@semmelweis.hu](mailto:riba.pal@semmelweis.hu) +361/210-2930 ext. 56267

Obligatory subjects: *Pharmacology I, Pharmacology II*

Elective subjects: *Medicinal, Epidemiological, and Social Aspects of Drug Abuse, Clinical Pharmacology in Dental Practice*

## Semmelweis University, Faculty of Pharmaceutical Sciences

**Institute of Organic Chemistry**

1092 Budapest, Högyes Endre u. 7., Phone: +361/476-3600 ext. 53006

<https://semmelweis.hu/orgchem/en/>

Head of the Institute: Dr. István MÁNDITY

Tutor: Dr. Petra DUNKEL

E-mail: [dunkel.petra@semmelweis.hu](mailto:dunkel.petra@semmelweis.hu)

Obligatory subjects: Organic Chemistry I. (GYKSZK337E1A).

Organic Chemistry II. (GYKSZK337E2A)

Elective/optional subjects: Basics of Organic Chemistry

I. (GYSSZK372E1A), Basics of Organic Chemistry II.

(GYSSZK372E2A), Name Reactions in Organic Chemistry

(GYSSZK207E1A)

**University Pharmacy, Department of Pharmacy Administration**

1092 Budapest, Högyes Endre u. 9.

Phone: +361/476-3600 ext. 53053

Head of the Institute: Prof. Dr. Romána ZELKÓ

[zelko.romana@semmelweis.hu](mailto:zelko.romana@semmelweis.hu)

Tutor: Dr. Ágnes MÉSZÁROS

[meszaros.agnes@semmelweis.hu](mailto:meszaros.agnes@semmelweis.hu)

Obligatory subjects:

- Clinical Pharmacy
- History of Pharmaceutics and the University
- Pharmaceutical Care
- Pharmaceutical Propedeutics
- Pharmacy Administration
- Pharmacy Management

Elective/Optional subjects:

- Clinical Pharmacy Practice
- Counselling Travellers in the Pharmacy

### Department of Pharmaceutical Chemistry

# FACULTY OF MEDICINE

## **CLINICAL MODULE**

**Fourth year in the academic year 2026/2027**

# STUDY PROGRAMME

**Teaching is done in “clean” blocks:** Theory + Practice + Exam. (Practices are taught by “shadowing”)  
The time span of each block depends on the credit value of the subjects: 1 to 5 weeks

**For example: based on a subject of 2 credits:**

- 2 credits × 14 lessons = 28 lessons (1 semester consists of 14 weeks. The number of credits are equal with the lessons in a week)
- Education is provided as 8 lessons in a day: 4 days x 8 lessons = 32 lessons
- the training and the exam must be completed in 2 weeks
- approx. 40 students will be trained by providing 4 days of training and 2 days of exams within 10 working days.

## 7th–8th Semester

| Course name                                                                    | Neptun code                  | lecture (h/week) | lecture (h/semester) | practice (h/week) | practice (h/semester) | seminar (h/week) | seminar (h/semester) | credit points | prerequisite(s)                                                                                                               | examination                               |

# FACULTY OF MEDICINE

## **ROTATION**

**Sixth year in the academic year 2026/2027**

# STUDY PROGRAMME

**Comment:**

Please read more about the rules concerning the criteria of selecting the foreign clinical practice positions and accepting the practice period spent abroad that can be found on our website <https://semmelweis.hu/registrar/>

**Please note the following:**

- 1. When not at Semmelweis University the one-week Traumatology is to be completed at a surgical department providing *neurochirurgia* as well.
- 2. It is strongly required to keep the instructions of the Examination and Studies Regulations concerning the requirements of the diploma work focusing especially on the deadlines.
- 3. The final exams can be done only on the exam dates published by the clinical departments of Semmelweis University.

**Please note:** there are no individual requests, and the rule should be kept strictly.

## 11th-12th Semester

|                       | <b>Sum of credits in the semester:</b>                  |               | <b>21</b> |                    |                       |                       |                        |                    |                    |                     |                 |            |

The following "new" language requirements will be obligatory from the academic year 2024/25 in years I-II-III and will have to be completed in an ascending line from then on:

In the Dentistry Program, the condition of issuing a diploma in the foreign language programs: a final examination in Hungarian language. Students who participate in the English language program are required to be able to communicate in Hungarian which they shall prove by taking a Hungarian final examination. The abstract of the thesis/diploma work must be attached to the finalized and submitted thesis/diploma work in Hungarian in accordance with the formal and content requirements. As a new criterion, the linguistic and grammatical evaluation of the abstract is also added to the assessment form of the thesis work. At the defense of the thesis/diploma work, the last, summarizing slide of the slides, on which the oral presentation is based, must be presented in Hungarian language. In the defense report of the thesis/diploma work, the student's Hungarian language performance must be evaluated as well.

Studying the language for dental medical purposes: foreign language for specific purposes has been built into the curriculum as a criterion requirement in the form of a professional basic university exam subject. For obtaining a master's degree, foreign language knowledge including the relevant terminology of dentistry must be acquired before obtaining the pre-degree certificate in accordance with the requirements set out in the curriculum.

*For the number of lectures/seminars/practices per week, the Course Syllabus is normative, and where it was not possible to interpret, these columns were left empty.*

*Courses to be included in the degree average grade: comprehensive examinations and examinations\* (weighted examinations), with the exception of the Hungarian for Dental purposes V.*

*Examination\* = an examination that is to be concluded in the degree average grade (pursuant to Article 49 (2) of the Organizational and Operational Regulations – Part III, Study and Examination Regulations)*

### The following language requirements will be compulsory for students graduating from the 2026/27 academic year

#### The conditions for issuing a diploma in dentistry in English-language training are:

In the Dentistry Program, the condition of issuing a diploma in the foreign language programs: a final examination in Hungarian language. Students who participate in the English language program are required to be able to communicate in Hungarian which they shall prove by taking a Hungarian final examination.

The abstract of the thesis/diploma work must be attached to the finalized and submitted thesis/diploma work in Hungarian in accordance with the formal and content requirements. As a new criterion, the linguistic and grammatical evaluation of the abstract is also added to the assessment form of the thesis work.

At the defense of the thesis/diploma work, the last, summarizing slide of the slides, on which the oral presentation is based, must be presented in Hungarian language. In the defense report of the thesis/diploma work, the student's Hungarian language performance must be evaluated as well. Studying the language for dental medical purposes: foreign language for specific purposes has been built into the curriculum as a criterion requirement in the form of a university professional basic exam subject. For obtaining a master's degree, foreign language knowledge including the relevant terminology of dentistry must be acquired before obtaining the pre-degree certificate in accordance with the requirements set out in the curriculum. α For the number of lectures/seminars/practices per week, the Course Syllabus is normative, and where it was not possible to interpret, these columns were left empty.

# The criterion requirement subject "Semmelweis Symposium" can be replaced by successfully completing the optional subject "FOK - Winter University". The criterion requirement subject "Semmelweis Symposium" can be completed in the 5th, 7th and 9th semesters of the program. Courses to be included in the degree average grade: comprehensive examinations and examinations\* (weighted examinations), with the exception of the Hungarian for Dental purposes V.

Examination\*: an examination that is to be concluded in the degree average grade (pursuant to Article 49 (2) of the Organizational and Operational Regulations – Part III, Study and Examination Regulations)

# STUDY PROGRAMME

## The new curriculum of the credit-based training for the 2026/2027 academic year for students enrolled for the first year

Please note that the subject descriptions for all subjects in a searchable PDF format can be found under the following link:

# FACULTY OF HEALTH SCIENCES

# Brief History of the Faculty of Health Sciences

The University's second largest Faculty is the Faculty of Health Sciences. The Faculty started its first academic year in 1975 with the aim of training highly accomplished, skilled, committed and open-minded health care professionals. This was the first higher-level school in Hungary that trained dietitians, health visitors, physiotherapists, public health and epidemiology inspectors, vocational teachers and paramedics. During the past years both the structure of education and the curriculum have undergone changes in the spirit of modernization. The Faculty continuously expands the

range of its Hungarian and English language training programmes. To its prospective students, the Faculty offers study rooms, lecture halls, specialist laboratories, demonstration rooms and a public library that are all equipped with state-of-the-art technology, as well as a great variety of opportunities for an active student life, and a motivating environment. Following graduation, students of the Faculty can immediately be involved in various areas (ex.: health care, tourism, education, sociology) and they are able to have a positive impact on their close and broad environment.

## Facts and Figures

The Faculty of Health Sciences celebrated its 50th anniversary in 2025. Since its foundation, cc. 35.000 students graduated from the Faculty and today more than 5000 students are studying at this institution. The Faculty is very proud of its library containing more than 50.000 volumes.

During the last four decades the Faculty has developed extensive international relations, and as a result, we have connections with about 50 higher educational institutions throughout Europe, Asia and America. Many students and staff members have the opportunity to take part in short- and long-term exchanges in our partner institutions. The Faculty's Asian relations have also been largely extended by establishing a fruitful relationship with Shanghai Jiao Tong University

School of Medicine (SJTU) and with Heilongjiang University of Chinese Medicine (HLJUCM), that launched its off-campus Traditional Chinese Medicine training at our Faculty.

We are also proud of having operated our Italian, French and English [B.Sc.](#)-level Physiotherapy training in Lugano, Switzerland since 2009. Currently, over 300 students participate in our programme there. The extent of our international relationships is still growing and we accept several groups of students from different countries on our 2-4 weeks advanced professional programmes mainly from the USA, China and Japan. In these programmes our students have the opportunity to participate in, and to build international professional connections.

## Information about the B.Sc. and M.Sc. programmes

### Training system

---

Hungary, as a member of the European Union, belongs to the unified European Higher Education Area, which in principal follows the multi-cycle (bachelor, master and doctorate) training system. In this system it is much easier for students, lecturers and researchers to travel and build international relations, moreover, as citizens of the European Union they can continue their studies and plan their future as employees or entrepreneurs in any of the member states. These opportunities open up a wider field for non-European citizens studying in Hungary as well, since the possibilities of internal mobility inside the unified Europe are based on the training channels and close relationships between countries in the labour market and among institutions.

# Programmes of the Faculty

## I. Bachelor of Science (B.Sc.) Programmes

### 1. Nursing and Patient Care B.Sc. Programme

Specialized programmes: Physiotherapy (Hungarian, English), Nursing (Hungarian, English), Midwifery (Hungarian, English), Dietetics (Hungarian, English), Paramedics (Hungarian), Voice, speech and swallowing therapy (Hungarian)

#### Physiotherapy

Physiotherapists act as autonomous practitioners who are able to perform functional examinations, identify impairments, functional limitations, abilities and disabilities by using clinical decision-making processes. Physiotherapists treat patients with therapeutic exercises, manual techniques and other therapeutic modalities as the professionals' chief task is to improve the functions of the musculoskeletal system. The therapists develop movement therapies and apply electrotherapeutic treatment, therapeutic ultrasound, and various manual and massage treatments for the sake of healing and rehabilitation or for the prevention of health damage. Graduates take part in healing locomotor (orthopaedic, rheumatologic, traumatologic), cardiovascular, obstetrical, gynaecological, neurological and psychiatric disorders. Prevention and health promotion belong to the specialists' profession, too. Physiotherapists plan, explain, carry out, and adapt an examination-based treatment, draw conclusions from the examination as a whole and rank the main problems according to priority.

#### Qualification

Physiotherapist

#### Nursing

The occupation of nurses is a vocation that is pursued for the sake of health preservation, promotion and patient healing. Nurses observe patients in the hospital and continuously monitor their needs, take part in disease prevention and act as active contributors to the process of the patient's recovery and rehabilitation. They help patients absorb and understand the information on their health status. Nurses holding a B.Sc. degree can organise, manage and supervise all their internal medical, surgical, obstetric-gynaecological, psychiatric, intensive nursing and primary care tasks in every area of health care. They are responsible for conducting the healing-nursing activities prescribed by the physician, and help the patient and the physician perform certain examinations. Graduates of the speciality are able to provide health care treatment for each age group from premature infants to elderly patients, explore the special needs of the patient and the person cared for, prepare nursing diagnoses and perform the tasks professionally on the basis of priorities, participate in planning, developing and implementing health care and social services.

#### Qualification

Nurse

#### Midwifery

Midwives fulfil caring and nursing tasks during pregnancies, in the postpartum period and on the occasion of gynaecological problems. Their responsibilities are to monitor pregnancies, labours and the postpartum progress while cooperating with other health care professionals in order to achieve the best possible outcome for each family. From the start of the parturition, midwives prepare and continuously support and encourage the woman during labour, monitor the process of delivery and the mother-infant connection, assess and register their observations. Midwives individually assist deliveries, take care of the protection of the perineum and of the treatment of the woman and the new-born baby during the post-delivery period. Graduate midwives look after, nurse and care for female patients and perform the required specialised treatment. State of the art skill laboratories help the preparation of the students for their future profession.

#### Qualification

Midwife

#### Dietetics

Dietitians deal with the questions of human nutrition and possess knowledge about healthy diet and diseases caused by unhealthy nutrition. Graduates are able to practise diet therapy independently, or perform dietetic and catering tasks as members of a therapist team. The specialist's tasks include individual and group counselling, preventing nutrition related chronic and non-contagious diseases, organising diet plans according to the client's sensitivity and disease type. They manage catering units: lead the catering service, organise catering work procedures, and establish appropriate and acceptable conditions for catering. Dietitians play an important role in teaching how to lead a preventive and healthy life as they can also develop and implement programmes for health promotion.

#### Qualification

Dietitian

#### Paramedics

Graduates are able to approach professionally and safely patients or victims in prehospital emergency care (oxyology), able to perform triage, on an individual basis and during a catastrophic event. On the scene, paramedics familiarise themselves with the nature of the emergency, examine the patient, and make a primary diagnosis. They stabilise and care for the patient, decide on the possibilities of leaving the patient on the scene. Paramedics observe and monitor the patient during transport, communicate appropriately with the patient and his/her relatives, complete the necessary interventions, and provide psychological support for the suffering patient. Paramedics holding a B.Sc. degree also complete standby on-call duties, organise teamwork in the system of emergency care within health institutions, teach First Aid, and participate in the further training of emergency nurses and ambulance car drivers. Paramedics work in close alliance with the control staff, ambulance assistants, physicians, and health care professionals of hospital emergency care.

#### Qualification

Ambulance Officer (Paramedic)

## Voice, speech and swallowing therapy

Voice, speech and swallowing therapists perform diagnostic and therapeutic tasks in otolaryngology, phoniatrics, neurology, paediatrics, geriatrics and rehabilitation units as well as in outpatient services and can treat certain functional disorders in private practice. Their responsibilities include the functional examination and therapy of phoniatrics, articulation, speech-language abilities, nutrition intake (chewing, swallowing). Graduates are able to treat the disorders of two fundamental functions of human life: the disorders of communication and of food intake. They are able to contribute to the rehabilitation of persons suffering from these functional disorders, thus enabling them to manage their social responsibilities and to integrate into society. Graduates are able to participate in preventive, curative, nursing and rehabilitating professional work on any level of the health care and/or social care system.

### Qualification

Voice, speech and swallowing therapist

## 2. Health Care and Disease Prevention B.Sc. Programme

Specialized programmes: Health Visitor (Hungarian), Public Health Care Inspector (Hungarian, English)

### Health Visitor

The health visitor is present in the families' life during the most important steps of life: during pregnancy, reception of the new-born baby, formation of family life and at the time of enrolment to nursery and elementary school. Graduates are able to provide counselling concerning family planning and parenthood, help and provide nursing care to the pregnant woman, and perform screening tests. After childbirth, the health visitor teaches the mother the ways of breastfeeding and her tasks related to the child. They monitor the health condition and development of neonates, provide community health care for children (aged 3-18), aid in the prevention of behavioural disorders and bad habits, solve the problems of teenagers and direct them to the appropriate professional. Health visitors give mental hygiene support to families and organise vaccinations. Health visitors take part in planning, organising and conducting health development and promotion programmes for individuals and communities. They perform their duties either independently or in cooperation with doctors and other medical experts.

### Qualification

Health Visitor

### Public Health Supervisor

A public health supervisor deals with epidemiological tasks that consist of the organisation of public health investigations and the analysis of data retrieved during the investigations. Graduates of the speciality are able to perform public health related municipal activities, conduct appropriate municipal supervision based on current regulations, initiate, plan and manage epidemiological tasks, analyse, interpret, use and critically apply the results of epidemiological examinations, process and realize local and central health policies in order to improve the health status of the population. Public health supervisors plan and realize nosocomial surveillance, monitor the health status of the population, plan, organize, realize and evaluate preventive programmes.

### Qualification

Public Health Supervisor

## 3. Medical Diagnostic Analysis B.Sc. Programme

Specialized programmes: Optometry (Hungarian, English), Radiography (Hungarian)

### Optometry

Optometrists are able to utilise their optic, optometric, measuring and clinical knowledge gained during the training programme, conduct the examination and correction of the eye individually and prescribe optical aids (eyeglasses, contact lenses) with the aim of attaining the optimal visual acuity in patients. The professionals are able to estimate the refractive medium, refractive ability, errors of refraction, the way eye muscles function, and the ability of heterophoria and convergence. Professionals examine binocular vision, the chamber of the eye, crystalline lens, vitreous humour and the eye fundus with the help of a slit lamp, and they estimate ocular tension. Optometrists utilize their clinical and nursing knowledge during their daily activities, actively participate in improving the culture of vision of individuals, communities and the population. Through examinations, the optometrist recognises and evaluates the disorders of the eye and so contributes to the immediate receipt of specialised care.

### Qualification

Medical Diagnostic Analyst (Optometrist)

### Radiography

Medical diagnostic analysts individually operate modern diagnostic imaging appliances (e.g. X-ray, ultrasound, computer tomography / CT/) while keeping the related regulations and procedures. They process, evaluate and archive diagnostic imaging information, establish a daily contact with patients and prepare them for diagnostic imaging therapies. The specialists observe patients during examinations, perceive pathological situations, participate in therapeutic examinations, recognize health damaging effects as results of radiological interventions, and other technological errors, and they prevent them.

### Qualification

Medical Diagnostic Analyst (Radiographer)

## 4. Health Care Management B.Sc. Programme

Specialized programme: Health Tourism Management (English)

### Health Tourism Management

Graduates of the training take part in organising and managing health promotion activities, prepare projects that aim at developing health tourism and strengthening international cooperation, and they participate in the implementation of tourism development programmes of the European Union. The health care manager is a versatile professional who is proficient both in health care processes and in the field of tourism. Their acquired knowledge comprises information on health, tourism and business, therefore they are not only able to see through, organise and coordinate the operation of health care institutions but with appropriate business knowledge they are able to market and manage them, too. The speciality provides the necessary knowledge to create health tourism, health preservation, curative and rehabilitation programmes.

### Qualification

Health Care Manager (Health Tourism Management)

## II. Master of Science (M.Sc.) Programmes

### Physiotherapy M.Sc. Programme

---

Master's level physiotherapists develop therapeutic procedures and protocols based on their extensive national and international knowledge and skills, recognise and analyse physical, anatomical, physiological and pathological factors affecting physical ability and capacity. They participate in solving scientific problems in physiotherapy, and finding new skills and knowledge in their expertise. The specialists perform scientific evaluation of the effectiveness of physiotherapeutic methods, organise and realise clinical research in physiotherapy, publish new scientific results and act as leaders in hospital units of physiotherapy, apply fundamental regulations and quality control principles in the management of health institutions and private enterprises. The promotion of health education on local, community, national and international levels also belongs to the tasks of a physiotherapist.

#### Qualification

Physiotherapist

#### Languages

Hungarian, English

### Nursing M.Sc. Programme (Advanced Practice Nurse)

---

Master's level nurses characterise the health status of the population, formulate problems, priorities and aims in public health. They conduct research and analyse technical literature, interpret the results of modern statistical methods, perform tasks of organisation and management related to the nursing process. They are able to perform human resource management tasks related to nursing. Planning budget and writing tenders, planning, realising and evaluating programmes, and establishing cooperation between institutions and individuals belong to the tasks of nurses, too. The health care professionals are acquainted with the role and the possibilities of the improvement of health sciences in the life of society, and they are able to characterise the health status of the population. Master's level nurses formulate problems, priorities and aims in public health, they take part in solving the scientific problems of nursing, in finding new and constructing ideas about the profession and in the promotion of their practical usage.

### Specialisations within the Nursing M.Sc. programme

---

Emergency Nursing (Hungarian)  
Geriatric Nursing (Hungarian)  
Community Nursing (Hungarian, English)  
Intensive Nursing (Hungarian)  
Perioperative Nursing (Hungarian)

#### Qualification

Nurse

#### Languages

Hungarian, English

### Nutritional Sciences M.Sc. Programme (Joint training of Semmelweis University and the Hungarian University of Agriculture and Life Sciences)

---

Nutritionists develop quality food, functional food, food supplements, special nutrients, eco products and organic food. They develop food industrial innovations, determine food qualities considering hygienic aspects, take part in professional and counselling tasks in the field of nutrition sciences and catering. Master-level dietitians determine the composition of food and diets for healthy people and those with different diseases, perform innovative research and development work preferred by the support system of the European Union. Master's level dietitians are able to understand and solve professional problems assertively, come up with reform ideas, and carry out innovative activities. The nutrition specialist plans and compiles healthy diets in the field of health industry, wellness, medical tourism and hotel industry. Nutritionists promote the achievements of nutrition science in order to improve public health figures, work as highly qualified nutritionists, researchers, advisors and health educators.

#### Qualification

Nutritionist

#### Language

Hungarian

### Teacher of Health Sciences and Health Care M.Sc. Programme

---

Master's level health care teachers are capable of educating people about healthy lifestyle using their knowledge gained in the fields of health sciences and pedagogy. For the sake of improving the quality of life of people, professionals plan, develop and adopt prevention programmes in the specialist training, suggest problem solving and up-to-date life models in accordance with the altered health statuses. They give advice on career orientation, career choices and career planning. While applying health education methods, the teachers are able to recognize those negative effects that arise from harmful environment or poor social situation and lifestyle. In specialised health related interpersonal relationships, their activity is characterised by high communication standards and didactic preparedness. Master's level health care teachers possess the ability to educate, and to demonstrate good example while teaching, moreover, they are able to recognize the relationship and development opportunities between the training institutions, the economy, the labour market and the social environment.

#### Qualification

Teacher of Health Sciences and Health Care

#### Language

Hungarian

## Public Health M.Sc. Programme

---

Master's level public health professionals, with their knowledge of the scientific basis of public health and the related methodological and practical skills, contribute to the improvement of the health status of the population and to the prevention of diseases through professional, social and intersectoral cooperation. They can also put their skills into practice in the country or institution where the legislation, guidelines and protocols in force allow them to do so.

This program is designed for graduates in health professions who want to contribute to a high level of health protection and prevention of diseases and risks. We welcome students who have a strong understanding of the importance of prevention in relation to both communicable and non-communicable diseases and who wish to develop their knowledge in this field to the highest level.

### Specialisations within the Public Health M.Sc. Programme

---

Epidemiology  
Environmental and Occupational Health

**Qualification**  
Expert in Public Health

**Language**  
Hungarian

## III. Doctoral School

---

**Address:**  
H-1088 Budapest, Vas u. 17, room V/515  
  
Mailing address: [etk.phd@semmelweis.hu](mailto:etk.phd@semmelweis.hu)  
  
Phone: +(36-1)486 5901

**Head of Doctoral School:**  
Professor Dr. Zoltán Zsolt Nagy PhD

**Contact person:**  
Secretary: Judit Györfi-Virág  
Phone: +(36-1)486 5901 / +36 20 670 1959

e-mail: [etk.phd@semmelweis.hu](mailto:etk.phd@semmelweis.hu)

The main objective of the Doctoral School of Health Sciences is to combine theoretical and preclinical knowledge, clinical and comparative health science research, and public and public health sciences, and to improve the social sciences related to health sciences. It also aims to complement the doctoral programs at the University to ensure that health sciences are also incorporated, thus giving extra emphasis to preventive – domestic and international – health preservation programmes that satisfy public health needs and affect society as a whole.

PhD studies can be conducted in the following professional fields:

1. Clinical and comparative health sciences
2. Theoretical and preclinical health sciences
3. Society and health
4. Public health sciences

## IV. Postgraduate specialist training courses

Addictology Counselling (Hungarian)  
Podiatrist (Hungarian)

## DEPARTMENTS

### Department of Nursing

#### Head of Department

College Professor Dr. Zoltán Balogh RN, PT, M.Sc., PhD

#### Contact person

College Professor Dr. Zoltán Balogh RN, PT, M.Sc., PhD  
Phone: +(36-1)486-5836  
e-mail: [balogh.zoltan@semmelweis.hu](mailto:balogh.zoltan@semmelweis.hu)

#### Background

The Department was founded in 1975 as a part of the College of Health Care of the Postgraduate Medical School (now Semmelweis University Faculty of Health Sciences). It was the first college in Hungary to award degree to health care teachers in 1977. Academic level training of nurses began with part-time courses in 1989/90; since 1990/91 a full-time course has been offered as well. The College of Health Care was also the first to introduce a four-year baccalaureate certificate programme in nursing. The Masters-level programme in nursing was introduced in Academic Year 2002/2003.

#### Education

B.Sc. in Nursing is an eight-semester programme, either a full-time or part-time, which provides students a general knowledge of science related to nursing, health and social sciences. The Nursing B.Sc. programme is based on the Directive 2005/36/EC of the European Parliament and the one of the European Council of 7 September 2005 on recognition of professional qualifications. Our programme has been running in English since the 2011/2012 academic year.

M.Sc. in Nursing is a three-semester part-time programme based on a former bachelor degree in nursing. During their studies, students learn the planning of nursing in all areas of health care, the organisation of the nursing work, the teaching of the basics of nursing and health care, the organisation of research projects in nursing, and the supervision of quality assurance in nursing care.

#### Research

The previous members of the Department's staff supported projects such as the development of a nursing curriculum with the introduction of distance education methodology into nursing training programmes (in collaboration with Columbia University, School of Nursing (USA) in 1995-98 and a Hungarian-Canadian nursing programme for a methodology and model of prior learning assessment and recognition (PLAR) of nurse-candidates (Douglas College, Canada) in 1999-2000.

In co-operation with the Chamber of Hungarian Health Care Professionals, the present members of the Department performed investigative research into the Hungarian situation with regard to needle-stick injuries in 2006, 2008, 2013, 2018 among health care professionals. The objectives of the study were twofold: to reveal the trend in the extent to which health workers are affected, and to draw the attention of economic and education decision-makers to the importance and prevalence of the issue.

The other research programme aims to explore from an international perspective the meaning of care from the point of view of nurses and patients and to find common and shared definitions between these partners of caring. In addition, it aims to identify the relationship

between nurse caring and patient satisfaction and to clarify the opinion of nurses and patients on individualized nurse caring. In this study (2008-2014), participants from 6 EU countries: Cyprus, Czech Republic, Finland, Greece, Hungary and Italy united their efforts in order to achieve the aims of the study. Europe faces severe population ageing in the near future. A new positive vision of ageing and promotion of possibilities in older age is needed. The challenge is how to transfer this vision into practice. Higher Education Institutes and associations agreed to launch a project. Funding was received from Lifelong Learning Program-Erasmus Academic Networks for a project for the years 2013-2016.

### Department of Clinical Studies in Obstetrics and Gynaecology

#### Head of Department

College Professor Dr. Klára Gadó

#### Contact person

Senior lecturer Dr. Eszter Borján PhD  
Phone: +(36-1)486-4893  
e-mail: [borjan.eszter@semmelweis.hu](mailto:borjan.eszter@semmelweis.hu)

#### Background

The Department of Clinical Studies in Obstetrics and Gynaecology was founded in 2014. Earlier, the training of midwives was performed by the Division of Midwifery of the Department of Nursing. Academic level training of nurses began through part-time courses in 1989/90; since 1990/91 a full-time training programme is offered as well. Additional programmes have been introduced in recent years, including the training of midwives (2002) and a masters-level programme in nursing (2003). The English language midwifery training programme was introduced in the 2011/12 academic year.

#### Education

The B.Sc. midwifery training programme can be completed on either a full-time or part time track. Those who receive a midwifery degree upon successful completion of this programme are able to carry out communicational/informational/documentation activities, provide a safe and hygienic environment, complete general midwifery tasks, and provide first aid, complete tasks related to antenatal care, conduct deliveries, care for female patients, and care for the newborn and the postpartum mother. The Midwifery B.Sc. programme is based on the Directive 2005/36/EC of the European Parliament and of the European Council of 7 September 2005 on the recognition of professional qualifications. Duration of the training: 8 semesters, number of credits: 240 ECTS.

#### Research

Members of the Department's staff support projects and conduct research in different fields of health care and health care education, e.g.: health behaviour of practising midwives, simulation education and curriculum development, and the impact of maternal depression on pregnancies and early attachment.

## Department of Physiotherapy

---

### Address

H-1088 Budapest, Vas u. 17., room 305  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-5980  
Fax: +(36-1)486-5981  
E-mail: [etk.fizioterapia@semmelweis.hu](mailto:etk.fizioterapia@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

College Professor Dr. Mónika Horváth PhD

### Contact person

Master instructor Ms. Rita Xantus  
Phone: +(36-1)486-5985  
e-mail: [xantus.rita@semmelweis.hu](mailto:xantus.rita@semmelweis.hu)

## Background

Underwater therapy equipment was used in the Császár baths as early as 1891. The first physiotherapy training in Hungary, which was more like an artistic movement therapy, was started by Alice Madzsar in 1912. The need for physiotherapy arose during the time of the Poliomyelitis epidemic, resulting in the foundation of a proper physiotherapy school in Budapest in 1955. At this time, the training was two years long, the duration of studies increased to four years only in 2000.

## Education

The Department's aim is to train physiotherapists who can be valuable members of a health care team of prevention, care and rehabilitation. The Physiotherapy undergraduate programme consists of 240 credits, which corresponds to the requirements of a Bachelor's degree. The Department also offers the Master's Programme for another 90 credits in 3 semesters. Each term consists of courses corresponding to 30 credits. Courses are divided into theoretical and practical units, each unit covering a particular field of physiotherapy. At the B.Sc. programme the supervised clinical practice takes place from the 1<sup>st</sup> to the 7<sup>th</sup> semester (two to three weeks), and in the 8<sup>th</sup> semester (12 weeks) at a variety of medical centres. The physiotherapy programme comprises an independent graduate project corresponding to 1152 clinical practice hours, which is equal with 48 credits. The Master's programme's last semester can be divided into two halves. At the beginning the students have theoretical and practical courses and in the last 8 weeks they attend specialised clinical practice and scientific research.

### Successful completion of the programme requires that students:

- acquired sufficient knowledge and skills to be able to work independently as physiotherapists;
- acquired knowledge and skills of physiotherapeutic methods of assessment and treatment, as well as knowledge of the connection between science and long-established experience;
- developed their self-recognition and capacity for empathy, thereby paying attention to ethical considerations;
- and familiarised themselves with conditions in society which affect people's health, and gained an ability to initiate and take part in the health-promoting and preventive efforts.

## Biomechanical Lab

The biomechanical lab is equipped with the latest technology. With these modern pieces of equipment we can perform dynamic and kinematic measurements to demonstrate the discrepancies of musculoskeletal, neurological and other problems, moreover, we can compare the physiological and pathological movement patterns. The use of these devices helps us to test the validity of traditional physiotherapy examination methods, as well as measuring the effectiveness of the therapies by objective data. In addition, our laboratory with the new visual stimulation biofeedback equipment can be used not only to analyse the walking but to correct and develop it. So now it is suitable for therapeutic interventions. Both the B.Sc. and M.Sc. programmes' curriculum include subjects that instruct the students how to use these devices for their thesis, dissertation research and for projects in the Students' Scientific Association.

## Research

Some areas of research interests at the Department:

- the biomechanical characteristics of standing stability and balance maintenance, testing by biomechanical equipment and therapeutic possibilities with physiotherapy;
- examination of posture with ultrasound-based 3D movement analyser equipment, correction of posture by physiotherapy;
- treatment of incontinence with complex physiotherapy methods;
- effects of positive end-expiratory pressure in cystic fibrosis;
- conservative therapeutic options of the knee-instabilities;
- chest physiotherapy in cystic fibrosis with the specific features of childhood;
- clinical features of paraneoplastic syndrome in the musculoskeletal system;
- the effect of exercise in cardiac rehabilitation;
- the effect of exercise in musculoskeletal rehabilitation;
- gait analysis according to the ultrasound- based 3D method.

## Division of Physical Education

---

### Contact person:

Head of Division Gábor Soós  
Phone: +(36-1)486-5850  
e-mail: [etk.testneveles@semmelweis.hu](mailto:etk.testneveles@semmelweis.hu)

The Division of Physical Education teaches the 4-semester long criteria subject, the Physical Education (PE) for each full-time B.Sc. student. PE classes enable students to several opportunities for sport (swimming, volleyball, handball, basketball, football, floorball, conditioning, aerobic) in different locations (gym, swimming pool). Apart from the PE course, therapeutic swimming that is highly demanded by our students is also launched as a selective subject in each semester.

Colleagues of the Division participate in the operation of the Student Sport Association (DSE). Primarily, the Association provides student participation in the university's system of sport competitions.

### Background

Education of dietetics in Hungary dates back to the 1920s and was initiated by Aladár Soós. The Department of Dietetics was founded in 1975 as part of the newly established College of Health Care (now Semmelweis University Faculty of Health Sciences). The main task of the Department is the undergraduate and graduate training of dietitians while providing courses on nutritional sciences and dietotherapy for other health professionals educated at the Faculty. The Department of Dietetics and Nutrition Sciences is responsible also for the training of Masters of nutrition and food sciences. The programme is carried out in collaboration with the Hungarian University of Agricultural and Life Sciences.

### Education

Over the last 40 years, as many as 2000 dietitians completed their studies here. The undergraduate training course consists of eight semesters, with a total number of 240 ECTS, of which 40% is devoted to theoretical training and 60% to practice. During the education students are taught about each scope of dietetic practice such as clinical, administrative and public health/community dietitians. Graduate students can be employed in different areas of public health nutrition and nutritional research fields. Postgraduate training programmes are also available for dietitians.

In the 2009/2010 academic year a new training programme, the Master of Nutrition and Food Sciences was launched. Students are taught by experienced teachers who are recognized as experts in the field of nutrition and food technology as well as in research methodology. The duration of the training is 4 semesters with a total number of 120 ECTS. Graduate students can be employed in different areas of public health nutrition and nutritional research fields.

Postgraduate training programmes are also available for dietitians. Graduating as Masters of nutrition and food sciences allows students to continue their studies at PhD level at Semmelweis University Doctoral School in Health Sciences.

The Department of Dietetics and Nutrition Sciences has collaborative partnership with the European Federation of the Associations of Dietitians (EFAD).

### Research

The Department has been involved in several projects sponsored by, for example, the EU: the "Ageing Nutrition" project (2004-06, organised by the Department), the "PORCROW" project (2004-06), furthermore, the Department participated as partner institution in the thematic network called DIETS1, "Dietitians Improving the Education and Training Standards (2006-09)" and DIETS2, 'Dietitians ensuring education, teaching and professional quality' (funded by the EACEA 2010-13). The Department is involved in the preparation of the Hungarian version of EPODE Project collaborating with the Association of Hungarian Dietitians (2014).

Members of the Department's staff are involved in the PhD education as tutor teachers.

### Research area:

- Food production by fermentation for patients with food allergy and intolerance
- Nutrition Science Analysis and Diethoterapeutic Interventions
- Innovation in public catering
- Disease Specific Nutrition Therapy and Communication Method
- Examination of the nutrition and nutritional status of the elderly

### Fields of scientific interest are:

- Investigation of biologically active component of vegetable and fruit during cultivation, post harvesting, food technology and food preparation
- Determination of mycotoxin contamination in foodstuffs
- Monitoring of allergen contamination of equipment, tools and food preparation process
- Role of food labelling in order to improve informed and safe food choice of people with special dietetic needs
- Monitoring of different groups' nutritional status and nutrient intake for the purpose of health preservation and to identify risk factors of diet-related diseases
- Assessment and analysis of the fluid consumption habits, attitudes and product choice preferences and education of theme for the purpose of health preservation
- Teaching correct dietary habits in children's catering, development of eating behaviours
- Members of the Department's staff are actively involved in the boards of various professional organizations in the field of nutrition, such as Hungarian Society of Nutrition, Association of Hungarian Dietitians, Hungarian Food Allergy and Food Intolerance Databank, College of -Health Dietetics and Human Nutrition Council, National Association of Catering Managers.
- Moreover, they hold positions in the editorial boards of several professional periodicals.

## Department of Oxyology and Emergency Care

### Address

H-1088 Budapest, Vas u. 17., room 145  
Mailing address: H-1085 Budapest, Üllői út 26.

Phone: +(36-1)486-5840,  
Fax: +(36-1)486-5841  
E-mail: [etk.oxiologia@semmelweis.hu](mailto:etk.oxiologia@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department:

Professor Dr. Andrea Székely MD, PhD

### Contact person:

College Associate Professor Dr. István Hornyák PhD  
Phone: +(36-1)486-5842  
e-mail: [hornyak.istvan@semmelweis.hu](mailto:hornyak.istvan@semmelweis.hu)

### Background

Oxyology – the science of rapid intervention as described by the famous Hungarian physician Aurel Gabor - is a specialisation that has been recognized since 1975. The main task of the Department of Oxyology and Emergency Care is the training of paramedics at the highest possible level. It is our mission to qualify health care providers not only for the National Ambulance Services but also for the national emergency departments. The department is also responsible for the first aid teaching at the Faculty of Medicine in English and German language, and for first aid classes held at the Faculty of Dentistry. Besides theoretical and practical B.Sc. trainings, we offer postgraduate specialist trainings for qualified nurses and paramedics, and regular accredited courses in various areas of acute care for physi-

cians and nurses. We have been participating in the training of the Doctoral School of the Faculty with an independent research subject since 2009, while regularly offering advanced education for the students of Semmelweis University's School of PhD Studies. The Department manages its tasks with four full-time members and a number of highly qualified consulting teachers. Practical teaching is organized with the co-operation of the National Ambulance Service, hospital practices are completed in accredited teaching hospitals.

## Education

- The Department regularly provides vocational and postgraduate trainings, and is closely connected with the new University Emergency Centre where practical teaching takes place.
- Staff of the Department has an established relationship with the University of Massachusetts, Department of Emergency -Medicine in the area of research and development.
- Members of the Department participate in numerous professional and societal organizations of acute care and hold leading positions in the Society of Emergency Medicine and Oxyology.
- The leader of the Department is an active Examiner in Emergency Medicine for the European Board of Emergency Medicine.
- Students can join the PhD School offering participation and thesis work on "Point-of-care technologies in emergency medical care".
- An M.Sc. training programme targeting the intrahospital emergency care has been started resulting in the qualification of advanced practice nurses (APN), those capable health care professionals who work in the emergency departments under the supervision of the lead physician.
- We have launched a monthly meeting named OxyNox for trainee and graduate paramedics. This event is held in the Vas utca building where a well-known representative of prehospital care is invited as guest speaker followed by case discussions from everyday practice.
- The Paramedic Day is organised each May, where students demonstrate their practical skills during a competition.

## Research

PhD research topic:

- Point of Care technologies in emergency medical care.

Students' Scientific Association research topics:

- Acute Coronary Syndrome;
- First aid training;
- Position and activities of paramedics in the Emergency Department;
- Care of the multiple injured patients;
- Shock management;
- Mental aspects of rescue/emergency work;
- Complex cardiopulmonary resuscitation;
- Communication in emergency situations;
- Role players and standardized patients in HiFi simulation.

## Department of Family Care Methodology

### Address

H-1088 Budapest, Vas u. 17., room 245  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-4840  
Fax: +(36-1)486-4845

### Head of Department:

College Professor Dr. Lajos Attila Réthy MD, PhD, med. habil.

### Contact person:

College Professor Dr. Lajos Attila Réthy MD, PhD, med. habil.  
Phone: +(36-1)486-4841  
e-mail: [rethy.lajos.attila@semmelweis.hu](mailto:rethy.lajos.attila@semmelweis.hu)

## Background

Academic level training of health visitors (similar to district or family nurse) started in 1975 in Hungary.

## Education

The aim of this eight-semester programme is to train health visitors who can give assistance to children and pregnant women in social care and in the prevention of illnesses. Practical training takes place under clinical and real-life circumstances (e.g. in hospitals and district consulting rooms).

The basic subjects (e.g. anatomy, physiology, pathology, biology) are followed by special studies in paediatrics, nursing, obstetrics, sanitation and nursing methodology. Pedagogy, psychology, health education, social sciences and information sciences are integrated into the curriculum. After submitting a thesis, students are tested in theoretical, practical and professional skills before attaining their diploma. Upon completion of the programme health visitors are entitled to work in municipal primary health care facilities, or in schools and in the area of primary preventive medical services. They can perform their duties either independently or in cooperation with doctors and other medical experts.

## Research

- Preventive/visiting nurse system in Europe
- The characteristics of childhood onset depression according to depressive symptoms, co-morbidities and quality of life
- Influence of smoking during pregnancy on preterm-birth and low birth-weight
- Connection between childhood obesity, IDDM and physical activity

## Department of Public Health Sciences

### Address

H-1088 Budapest, Vas u. 17., room 129/A  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-4870  
E-mail: [etk.kozeg@semmelweis.hu](mailto:etk.kozeg@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

College Professor Dr. Tamás Pándics PhD

### Contact person

College Professor Dr. Tamás Pándics PhD  
Phone: +(36-1) 486-4870  
e-mail: [pandics.tamas@semmelweis.hu](mailto:pandics.tamas@semmelweis.hu)

## Background

The overall duty of the Department of Public Health Sciences, the legal successor of the Department of Epidemiology, is to provide appropriate training for health practitioners in the field of public health and carry out different research projects. Our aim is to equip students with the knowledge and skills to make valuable contribution to public health.

The Department offers undergraduate degree programmes at B.Sc. level and a master programme will be introduced in the near future. Courses of disease prevention and health promotion are available in English for full time students of physiotherapy. The Department for Epidemiology offers a wide range of research topics with professional assistance for students, and they also contribute to the improvement of our doctoral degree programme.

A well-equipped laboratory belongs to the Department for laboratory practices of microbiology and infection control investigations.

## Education

Within epidemiology, students are taught both general and specific aspects of pest control and disinfection techniques, including insect and rodent control. Following the fourth and sixth semesters, students take part in four-week practice sessions, and during the eighth semester they participate in a thirteen-week practicum.

## Research

### *Infection Control Centre*

- In order to prevent nosocomial and healthcare associated infections, the Department forms an infection control centre in collaboration with external public health partners.
- The key elements of active laboratory surveillance system:
- molecular biology methods for comparison/characterization of strains isolated from different sources;
- monitoring infections;
- computer data analysis of bacterial isolates including antimicrobial-resistance patterns.

### **Burial customs and funeral practices**

- Treatment of dead persons according to the law and the process of mourning
- Dead people – from a public health and cultural historical view
- Characteristics and forms of burial from an intercultural perspective

## Research Projects for the Students' Scientific Association

- Epidemiology and prevention of infectious diseases
- Epidemiology of diseases of civilization
- Profile of secondary prevention in Hungary and in the EU
- Appropriate food hygiene practice, infestation of food, food poisoning
- Probiotics and their effects on the human body
- The impact of climate change on food safety
- Research on natural antimicrobial proteins

## Department of Clinical Studies

### Address

H-1088 Budapest, Vas u. 17., room 239  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-5970  
Fax: +(36-1)486-4860  
E-mail: [etk.egtud.klinikai@semmelweis.hu](mailto:etk.egtud.klinikai@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

College Professor Dr. Klára Gadó PhD, MD

### Contact person

College Professor Dr. Klára Gadó PhD, MD  
Phone: +(36-1)486-5970  
e-mail: [gado.klara@semmelweis.hu](mailto:gado.klara@semmelweis.hu)

## Background

The tasks of the Department of Clinical Studies are: instruction of clinical knowledge in the frame of the bachelor and master degree programmes of the Faculty of Health Sciences, and participation in health sciences programmes of Semmelweis University's School of PhD Studies as consultant or reviewer.

## Education

- The Department's educational activities include:
  - transmission of evidence-based, modern, medical-clinical knowledge, and familiarization with the etiology and pathomechanism of different diseases;
  - enabling students to recognize the signs of diseases, evaluate symptoms, and complete adequate patient care based on competences;

- providing basic pharmacological knowledge, therapeutic possibilities and effects, side effects, therapeutic responses;
- helping students to gain insights into the clinical significance of most important laboratory, radiological and endoscopic examinations, into the methods of clinical problem-solving, and into the pharmacological basis of medical therapy;
- preparation for the assistance in advanced diagnostic and therapeutic methods, the understanding of current medical science, and the acquirement of the competences required for health practitioners;
- the development of the solid approach of prevention-remedy-nursing-care-rehabilitation.
- The Department actively participates:
  - in the preparation of student-focused didactical strategies;
  - in the development of new subjects and training programmes;
  - in the preparation of textbooks and lecture books;
  - and in special didactical and applied clinical researches.

## Research

- Hemostasis changes in pregnancies
- Diagnosis and therapy of thrombophilias
- The methodology of teaching clinical knowledge
- Fitting the level of higher education to the European Qualification Framework
- Development of validation processes in higher education
- Family planning, family care
- Social and cultural background of health care employees
- The support of parents expecting their first child; application of the APP model (PhD research)
- Family planning and maternity plans of Health Visitor students
- Anaesthesiology and Intensive therapy – patient security/safety, monitoring
- Clinical nutrition and its management with pharmaceutical aspects
- Risk screening, nutritional assessment, oral nutrition support, enteral and parenteral nutrition,
- Parenteral nutrition compatibility and incompatibility
- Methods of examination of TPN emulsions, physicochemical stability of TPN
- Role of nutrition team

## Department of Clinical Ophthalmology

### Address

H-1088 Budapest, Vas u. 17., room 20  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-5855  
Fax: +(36-1)486-5858  
E-mail: [etk.szemeszeti@semmelweis.hu](mailto:etk.szemeszeti@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

Associate Professor Dr. Illés Kovács MD, Ph.D

### Contact persons

Master teachers: Ms. Kata Réz  
Phone: +(36-1)486-5858  
e-mail: [rez.kata@semmelweis.hu](mailto:rez.kata@semmelweis.hu)

Dr. Beáta Tapasztó MD

Phone: +(36-1)48-65858  
e-mail: [tapaszto.beata@semmelweis.hu](mailto:tapaszto.beata@semmelweis.hu)

## Background

The education of optometry started in 1992 in Hungary at the College of Health Care (now Semmelweis University Faculty of Health Sciences). The Department of Clinical Ophthalmology was established in 2008. Prior to this, the education of optometry belonged to the tasks of the Department of Clinical Studies. The Department is responsible for training optometrists. This includes developing the curriculum of the optometry training, organising clinical and optical trainings for students, and keeping connection with educators and institutions who participate in the practical training.

## Education

The training is the one and only optometry training in Hungary and runs as a part time training programme. The undergraduate training programme consists of eight semesters and 240 ECTS with a total number of 1062 of contact hours and 6138 individual hours, of which 40% is devoted to theoretical training and 60% to practice.

Graduate training programmes are also available after completion of the basic training.

## Research

The Department conducts scientific research activities in two ways:

**1 In cooperation with the Department of Ophthalmology at the University in the following fields:**

- Femtolaser in the surgery of cataracts;
- Development of a new intraocular lens in surgery of cataracts.

**2 The Department's individual scientific work is carried out in the following fields:**

- Correction of presbyopia with contact lens;
- Screening of the visual acuity and ametropia of children of age 7 to 14;
- Contact lens related dry eye;
- Contact lens wearing in childhood;
- Computer Vision Syndrome and its connection with ametropies.

## Department of Imaging and Medical Instrumentation

### Address

H-1088 Budapest, Vas u. 17., room 348  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-5960  
Fax: +(36-1)486-5961  
E-mail: [etk.kepalkoto@semmelweis.hu](mailto:etk.kepalkoto@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department, Contact Person

Associate Professor Dr. Zsuzsanna Lénárd

## Background

The Department of Imaging and Medical Instrumentation conducts teaching, scientific and supplemental activities. The Department is responsible for the education of imaging diagnostic analyst specialists corresponding to the task of training highly qualified radiographers who are experienced in every sub-field of radiology.

## Education

In the four-year part-time B.Sc. education, the first three basic semesters are followed by specialist courses (Conventional radiology, US, MRI, Nuclear Medicine, Interventional therapy, Radiation therapy). Students attaining the degree are able to use imaging tools to plan and perform examinations on their own, and to process and apply the obtained information.

Teaching is performed by leading radiologists and radiographers, mainly of Semmelweis University and of large teaching hospitals. Practical training takes place in these hospitals as well.

The Medical Engineering group teaches "Basics of Biophysics and Medical Technology" and "Info-Communication" to dietitian, nurse, health visitor, physiotherapist, paramedics and public health supervisor students.

The Department continuously produces innovative books, image collections and other teaching materials necessary for the education. For this purpose, the Department works in collaboration with the other 3 similar departments in the country to harmonize the teaching materials and the requirements.

An emphasized task of the Department is the graduate teaching of radiographers including the organisation of courses.

## Research

The professors of the Department have leading positions in associations of radiology, radiography and medical technology inside and outside Hungary, and they are in the editorial boards of various scientific papers. The focus of the researchers is on clinical decision support, medical informatics, self-monitoring, on developing an immersive learning environment, or a virtual learning environment. Significant focus is put on emergency care systems, on the reduction of supply times and on successful cooperation with emergency departments.

Moreover, the Department joined the European Association of Radiographers.

## Department of Applied Psychology

### Address

H-1088 Budapest, Vas u. 17., room 343  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-4919  
Fax: +(36-1)486-4912  
E-mail: [etk.pszichologia@semmelweis.hu](mailto:etk.pszichologia@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

College Professor Dr. Ildikó Baji PhD

### Contact person

College Professor Dr. Ildikó Baji PhD  
Phone: +(36-1)486-4920  
e-mail: [nagyne.baji.ildiko@semmelweis.hu](mailto:nagyne.baji.ildiko@semmelweis.hu)

## Education

The main task of the Department is to offer basic psychological knowledge for all departments of the Faculty of Health Sciences in four modules which are as follows:

- *Basics of Psychology* – theoretical course including general psychology, developmental psychology, theories of personality.
- *Social Psychology* – theoretical course including group dynamics, social phenomena, attitudes, prejudices, attributes, stereotypes.
- *Communication and Personal-Development* – We use structured exercises to develop skills in the following fields: enhance group cohesion, basic communication skills, assertive communication, emphatic communication, stress managing methods, conflict management, and profession-specific communication strategies.
- *Health Psychology* – Health psychology is the field within psychology devoted to understanding psychological influences on how people stay healthy, why they become ill, and how they respond when they do get ill. It focuses on health promotion and maintenance; prevention and treatment of illness; the ethology and correlates of health, illness, and dysfunctions; and improvement of the health care system and the formulation of health policy. Health psychologists' fields of work: behavior risk factors/"pathogens" (possibilities of intervention for correction of risk behavior) behavior health preservation / „immunogenic". Conducting research into what are the views, opinions, attributes of health and illness among everyday people. Communication, cooperation, decision-making (health professional – patient interaction). The environment of treatment (how the work environment influences the health worker). Psychology of patients with chronic diseases (disabled, dying).

## Division of Applied Pedagogy

Another task of the Department is promoting the basic knowledge of theoretical and practical health education and prevention for students in B.Sc. and M.Sc. trainings; emphasising the pedagogical aspects of patient-care; improving the indispensable skills in counselling and education in paramedical professions; teaching methods of health promotion, and the possibilities of development of health culture, lifestyle and health behaviour.

## Research

Since the Department's scope is necessarily broad, staff members have been participating in research activities of various psychological fields:

- Nutritional and sport habits of students;
- Stress among the Professional helpers;
- The exploration of the learning attitude among 19-26 years old students;
- The relationship between burn out, emotion regulation and empathy among health professionals;
- Assessment of ethical and legal issues regarding professional tasks of doctors and nurses working in perinatal centres from the point of view of dilemmas related to the beginning and the end of life

## Department of Addictology

### Address

H-1088 Budapest, Vas u. 17., room 230B  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)48-65990  
Fax: +(36-1)486-4912  
E-mail: [etk.addiktologia@semmelweis.hu](mailto:etk.addiktologia@semmelweis.hu)  
Web: <https://semmelweis.hu/etk>

### Head of Department

Professor Dr. József Rácz MD, PhD, DSc

### Contact person

Senior lecturer Dr. Máté Kapitány-Fövény PhD  
Phone: +(36-1)486-5990  
e-mail: [kapitany-foveny.mate@semmelweis.hu](mailto:kapitany-foveny.mate@semmelweis.hu)

## Background

The Department of Addictology coordinates the educational and research activities of the Faculty related to addictive disorders. Some of our fields are the symptomatology, therapy, and prevention of addictive problems. Addiction medicine is present at every specialization of our Faculty; secondary topics like intravenous drug-use, models of preventive medicine are especially practical and optional courses. Our students are involved in many of our research programmes in collaboration with other institutions in Hungary or abroad. The new fields of addiction medicine like gambling and Internet-addiction are also present in our teaching and research activities.

We have close contacts with therapeutic and rehabilitation institutions in Hungary, preventive and outpatient centers (Blue Point Center).

## Education

Our Department coordinates the „Addiction Counsellor” specialization, which is the first and only opportunity to study addiction counselling in our country. The most important specialists of this field are our invited teachers. Our counsellors are also taught economics and management, which are necessary for their everyday work as coordinators of therapeutic and financial processes. They are also able to organize preventive courses on alcohol and illegal drug abuse fields.

## Research

Our research interests include the application and adaptation of counselling methods in the health and social care of alcohol and drug abusers, the analytic epidemiological study of deviant behaviour, biological and ethic sides of human behaviour, the social background of medical organizations, and researches about the newest therapeutical approaches for intravenous drug users and dependent patients as well as the qualitative and quantitative approaches in the study of hidden substance users (epidemiological, qualitative and quantitative studies on the users of new psychoactive substances).

## Department of Morphology and Physiology

### Address

H-1088 Budapest, Vas u. 17., room 345  
Mailing address: H-1085 Budapest, Üllői út 26.  
Phone: +(36-1)486-4940  
Fax: +(36-1)486-4942  
Email: [etk.morfologia@semmelweis.hu](mailto:etk.morfologia@semmelweis.hu)  
Website: <https://semmelweis.hu/etk>

### Head of Department

College Professor Dr. Gabriella Dörnyei PhD

### Contact person

College Associate Professor Dr. Judit Kiss PhD  
Phone: +(36-1)486-4945  
e-mail: [kiss.judit2@semmelweis.hu](mailto:kiss.judit2@semmelweis.hu)

## Background

The Department of Morphology and Physiology as a unit of the Institute of Basic Health Sciences has been operating at Semmelweis University Faculty of Health Sciences since its foundation in 1975. The Department participates in the education of the full time English language physiotherapy B.Sc. programme since 2005. The full time English language training of nurses and midwives was introduced in the 2011/2012 academic year.

## Education

The Department's educational tasks include the teaching of core and optional subjects to students participating in the full- and part time trainings of the Faculty, as well as to students taking part in the Master's level programmes, in the doctorate courses and in vocational trainings. Members of the Department's staff contribute to different medical and health care research projects, too.

The Morphology Working Group teaches Anatomy and Applied Biology, whilst the Physiology Working Group teaches Physiology-Pathophysiology, Chemistry and Biochemistry in the first, second and third semesters. The following optional subjects are offered in English language:

- Biology of stem cells;
- From classical genetics to epigenetics;
- Chapters of venous circulation and hemodynamics;
- The genetic basis of muscle disorders;
- Functions of hormone receptors: scientific research and clinical practice, health and disease,
- Applied sport physiology and sport health sciences.

## Research

The main research areas of the teaching staff are as follows:

- Maintaining of functional abilities and prevention of falls among older adults;
- The examination of decreased function due to low back pain with validated, self-reported questionnaires;
- The examination of posture balance and talent parameters of high school student age group;
- Signalling pathways and autophagy in cancer;
- Stem cells: prospects and challenges;
- Statistical analysis of Hungarian twin data;
- Signal transduction pathways in maternal-fetal interactions in normal and complicated pregnancies;
- A possible model of venous varicosity in rats;
- Effects of hormones on vascular remodelling;
- Roles of G protein-coupled receptor signalling in the vascular function;
- Roles of physical activity in prevention of chronic diseases;
- Signs of cardiovascular sport adaptation;
- Gerontokinesiology – translational animal models: organization of motor control and cognitive functions,
- Walking assessment and dementia prediction;
- Prevention of falling and fracture in elderlies;

- Movement/sport nutrition;
- Active and passive exercise (experimental and human studies);
- Bariatric and metabolic surgery in rats;
- Neurocardiological aspects of exercise-driven rehabilitation in rats,
- Survey of environmental factors influencing ADHD symptoms among elementary school children.

## Department of Social Sciences

### Address

H-1088 Budapest, Vas u. 17., room 332  
 Mailing address: H-1085 Budapest, Üllői út 26.  
 Phone: +(36-1)486-4910  
 Fax: +(36-1)486-4912  
 E-mail: [etk.tarstud@semmelweis.hu](mailto:etk.tarstud@semmelweis.hu)  
 Website: <https://semmelweis.hu/etk>

### Head of Department

Habil. College Professor Dr. Judit Helga Feith PhD

### Contact person

Habil. College Professor Dr. Judit Helga Feith PhD  
 Phone: +(36-1)486-4910  
 email: [feith.helga@semmelweis.hu](mailto:feith.helga@semmelweis.hu)

### Background

The Department of Social Sciences belongs to the Institute of Basic Health Sciences. The role of the Department is to support all students to recognize and to prepare for the social, cultural and economic embeddedness of their future health care professions. Our Department offers theoretical and practice-oriented knowledge – discussing general and special health care related problems – in the fields of Sociology, Social Anthropology, History of Health Sciences, Law, Ethics, Scientific Research Methods, as well as Medical Economy and Management. These modules – as essentials in health care labour market – are to improve conscious employee competencies and social responsibility. Our Department actively participates in an extended Europe-wide network, COHEHRE. The members of the Department of Social Sciences occupy leading positions in several professional and social organizations and take part in their work (Hungarian Association of Medical History, Public Body of Hungarian Academy of Sciences, Hungarian Sociological Association, American Anthropological Association, The European Association for the History of Medicine and Health (EAHMH), Hungarian Association of Sport Studies). Furthermore, our colleagues have a hand in the edition of different scientific journals, such as Development and Financing, Central European Studies, Kaleidoscope – Journal of History of Culture, Science and Medicine, and the newly initiated Developments of Health Sciences.

### Education

The Department takes part in the educational development of all B.Sc. and M.Sc. programmes of the Faculty and in the elaboration of curricular directives. As a participant of full time and part time trainings in Nursing and Patient Care, Health Care and Disease Prevention, and Medical Laboratorial Diagnostic Imaging programmes, the Department is responsible for teaching the following subjects: Health and Society, Introduction to Health Care Economics, Health Care Management, Health Care Law, Bioethics and Professional Ethics, Philosophy of Health, Thesis Methodology. Additionally, the Department has been organising the Health Care Project Manager postgraduate course (in Hungarian) since 2008, which enables graduates of the course to successfully (project) manage tasks and situations in every area of the health system. As a result of an educational cooperation between Semmelweis University Faculty of Health and Public Services, Semmelweis University Faculty of Health Sciences and the Budapest Metropolitan University, the Health Care Management B.Sc. started in Hungarian language (with Health Tourism Management speciality) in a form of part time programme in September 2014. The programme is supervised by the Faculty

of Health and Public Services (the programme supervisor is Dr. Miklós Szócska). Our Department is involved in the coordination and teaching work related to the programme.

The Health Care Management B.Sc. programme enables graduates of the course to successfully design and construct client-centred health tourism programs, to analyse statistical data related to tourism, and to coordinate touristic and health touristic projects with the implementation of knowledge about the system of health care and touristic institutions.

One of the main concerns of the Department is to provide adequate and flexible knowledge in the most suitable ways, therefore we devote special attention to the innovation of our methods of instruction. To keep a continuous interdisciplinary discussion about this topic, we have organized eight 'Professional Days on Teaching and Research Methodologies' so far. Most of our staff have experience in teaching abroad, which has broadened our perspectives and made us more conscious about the approaches we apply.

### Research and professional forums

With the aim of building networks of knowledge relating to social sciences and health, the Department of Social Sciences highly engaged with the creation of forums for interdisciplinary and inter-professional discussion. As a result, the Department hosted various professional days and conferences in the past years.

As a result of this work, in 2016 the Department organized the 5th Professional Day and Conference on Patient Rights. The next edition of this bi-yearly event was in the fall of 2018. The aim of the conference was to examine the current ethical and legal issues arising in the everyday practice of health care with the involvement of a wide circle of scientific and professional audience. The highlighted topics of the conference are the ethical and legal questions of health care for children, the dilemmas related to informed consent and communicational gaps during health care delivery, the questions of legal liability in emergency care and the opportunities for implication patients' rights during health care delivery.

In 2018, the Department gave place for the Professional Day on Health Tourism. The programme of the event put emphasis on the facilitation of discussion about the opportunities, weak points, results and possible legal regulation of health tourism.

With the initiation of the Faculty of Health Sciences, Department of Social Sciences a conference has been organized since 2017 with the title of 'Harmful/Protective Society'. The conference is a fruit of cooperation between three organizational units of Semmelweis University: The Faculty of Medicine Institute of Behavioural Sciences, the Faculty of Health and Public Service, Institute of Mental Health and the Faculty of Health Sciences Department of Social Sciences. The primary aim of the conference is to build a scientific community for those researchers who work on better understanding of the interconnectedness of health and society. The programme of the conference represents the results of ongoing research projects in the fields of Medical Sociology and Sociology of Health, with the emphasis on the mental, physical, and social dimension of health. Furthermore, the participants may share their experiences about challenges of teaching social sciences in health care training programmes.

Main research areas of the Department include: labour migrants in the health care sector; health and social care of migrants and minorities in Europe; comparative analysis of archive sources, legal sources on health care of the 18-19th centuries; epistemology of interpretive anthropology; developing intercultural competences; minority education and its effects on cultural connectedness; comparative analysis of dentistry business income producing capability; typology of ancient votive uterus-representations; analysis of the archival sources related to the birth-control and the midwife training; ethical and legal dilemmas in the practice of perinatal intensive care from the point of view of the beginning and the end of life; the socio-economic status of nurses and its sociocultural context; modern pedagogical approaches of Hungarian health promotion by peer education (TANTUdSZ Programme).

Our department provides external review and evaluation for the Healthy Diversity project, which is an international consortium of 7 different organisations aiming at developing training materials for health care professionals in VET sector.

## Background

The mission of the Department of Health Promotion Methodology is to represent in the higher education sector the healthy lifestyle and healthcare decision support solutions increasingly used on electronic devices; which is world-class in its form as an educational, research, knowledge and service center.

## Education

The department's areas of expertise cover the basic knowledge of process-based and value-based healthcare as well as healthcare founded on evidence obtained in real life, with special emphasis on health promotion as function of health behavior, the processes of patient support, health planning, health care communication and health-cooperation, the user experience and health experience, the human-machine collaboration and service-planning responding to this, job competency development as well as device design.

In education, it is primarily adapted to the training programs of the Faculty, while it also plays a role in the training programs of other faculties. It makes its training materials available for medical and health sciences students of other domestic institutions.

## Research and professional forums

Its research focuses on the areas of health promotion solutions and human-machine collaboration emerging with the development of technology, with its sub-themes being organization, analysis and evaluation, behavioral, social, planning and design.

Through its knowledge-sharing activities, it assumes an active role in disseminating knowledge about people-centered healthcare to both other disciplines and to the general public.

Through a wide range of collaborations, the University is developing health-promoting applications that can be used by the population.

## Background

The task of the Department of Voice, Speech and Swallowing Therapy is primarily to train its students, to teach professional subjects related to the program, to elaborate and develop subject programs, and to perform organizational work related to theoretical and practical education.

In order to ensure the professional development of our students, our task is to maintain continuous contact, cooperation and coordination with all organizational units and professional practice venues involved in the training of voice, speech and swallowing therapist students.

We regularly hold further training and preparation consultations, workshops and professional trainings for the therapists and master instructors conducting internships.

## Education

At the department, we carry out research aimed at the development of the profession of voice, speech and swallowing therapist, and publish the results of the research in domestic and foreign journals. We provide an opportunity for students to get involved in research work, we help their Students' Scientific Association (TDK) and the preparation of their dissertation as a supervisor.

We participate as a lecturer in professional national and international conferences and domestic trainings in the fields of ear, nose, laryngology, phoniatrics, neurology, rehabilitation, child rehabilitation, special education.

The instructors are members of the management and are professional supporters of various national professional and social organizations.

ANDRÁS PETŐ FACULTY

# Brief of Professor András Pető, the founder and namesake of András Pető Faculty

The founder of conductive education was born on 11th September 1893, in Szombathely. Having studying medicine at the University in Vienna and working in various hospitals in Austria, Andras Peto became an experienced neurologist. He was a pioneer in working with children with cerebral palsy by using a holistic approach to overcome any difficulties connected to their neurological motor disorders.

In the beginning of 1950, Peto founded his first Conductive Education centre which has been a foundation of the current András Pető Institute of Conductive Education and College for Conductor Training in Budapest, Hungary. Pető began to work with children with cerebral palsy, whose condition had been thought incurable and after a year an inspection committee reported that the children's condition had considerably improved. He provided motor therapy, special gymnastics, breathing exercises and motor education. "He put 'health' and 'illness' on another basis. He approached the problem with a bio-psycho-social-holistic view. It appears in his terminology too – there is 'client' instead of 'patient', a dynamic process analysis instead of the causal approach, educative-reeducative learning together instead of therapy-curing, a conductor leads towards independence instead of a doctor-physiotherapist."\*

He worked persistently until his death. He died in the institute in 1967.

Pető's mission and legacy have been carried through the years and the geographical borders; although the aim remained the same – to show individuals suffering from injuries to the central nervous system and their families the way to a full life and to make society aware of the opportunities to help.

Nowadays, the András Pető Faculty of Semmelweis University (also known as Pető Institute) apart from providing conductive care to individuals with motor disorders; also prepares future professionals for implementing and practicing Conductive Education.

## Facts and Figures

- More than two thousand students graduated since con-

ductor training has started. Among these students there are Hungarian as well as international students, since the 1980's.

- The faculty has participated in international Erasmus programmes via different European projects, and different Erasmus+ student programmes. The Practising Institutions of the Faculty also accepts students for Erasmus+ traineeship programme and offers the opportunity to get familiar with the practice of conductive education.
- The Faculty has different higher education cooperations in Europe, such as the United Kingdom, Germany, Russia, Ukraine and Romania.
- Training of Japanese conductors gave the opportunity to establish conductive education institutions in Japan, as our first Asian partners.
- New education cooperation has been established in the Public Republic of China, Shandong, and Jinan.
- More than 30 years of experience in coeducation is gained with the Aquinas College, in Grand Rapids, Michigan, United States.
- The faculty members are continuously working on developing its education programmes both in Hungarian and English and the cooperations with other higher education institutions.

# Information about the Conductive Pedagogy Bachelor programme

## Training system

---

Hungary, as a member of the European Union, belongs to the unified European Higher Education Area, which in principle follows the multi-cycle (bachelor, master, and doctorate) training system. In this system it is much easier for students, lecturers, and researchers to travel and build international relations, moreover, as citizens of the European Union they can continue their studies and plan their future as employees or entrepreneurs in any of the member states.

These opportunities open a wider field for non-European citizens studying in Hungary as well, since the possibilities of internal mobility inside the unified Europe are based on the training channels and close relationships between countries in the labour market and among institutions.

## Conductive Pedagogy Bachelor programme

The conductor is an educational rehabilitation professional who is trained to use the method of conductive education and support the habilitation of children with cerebral palsy or other impairments of the nervous system causing difficulties in motor development/performance or coordination. Conductor is able to participate in adult rehabilitation as well, specialised in motor development of those who has neurodegenerative diseases such as Parkinson disease or Multiple Sclerosis, or conditions after stroke, or cranial/brain injuries. Conductive education through its holistic approach supports its participants in developing as independent life as possible by coming over or learning to live with their difficulties.

### Field Practices

Practical training is closely related to the theoretical education in conductor training and organised by the faculty. The given order of the different practice cannot be changed.

The conductor BA programme is an 8-semester-long training including more than 40 percent practice of the total education hours.

**Major curricular components:** History of Education, Theory of Education, Functional Anatomy, Special Education, Anatomy of the neuro-system and musculoskeletal systems, Introducing to Psychology, Neuro Psychology, Conductive Pedagogy, and methodologies of rehabilitation at different fields of study.

**Career opportunities:** working in conductors' team, working in multi-professional teams in education, rehabilitation, or health institutions.
