Course description:

Nursing summer practice (90 hours)
Week 1: Familiarization with ward operations. Observes nursing activities, the assessment of nursing needs, and documentation. Learns about the content of nursing documentation, including observation forms, fever charts, and marking methods. Creating a safe environment for patients. With the assistance of nursing staff, students actively participate in the daily care of patients. Observing and learning how to communicate with patients. Observing laboratory and other diagnostic procedures, as well as patient preparation for examinations and surgeries. Using personal protective equipment in the ward, learning hygienic and disinfectant handwashing techniques, and becoming familiar with aseptic and antiseptic techniques.

Week 2: Independently performing nursing assessments, including measuring weight, height, blood pressure, pulse, temperature, and respiratory rate; checking blood glucose levels; and assessing and documenting patient needs. Assessing nutritional and fluid intake needs. Setting up the patient's environment. Monitoring and labeling the patient's secretions. Assisting with ECG procedures. Administering medications, drawing blood, administering injections, securing IV lines, monitoring infusion therapy and transfusion therapy, assisting with preparation, and

recognizing potential complications. Under nursing supervision, administer subcutaneous and intramuscular injections and perform bedside blood glucose testing.

Week 3: Blood draws, injections, and securing IV lines under nursing supervision. Continued practice of the tasks learned during the first and second weeks. Familiarization with the basic resuscitation process, protocol, and equipment used on the ward.

Method and type of assessment:
There is no exam; just a signature at the end of the practical assignment.

The rating should be based on the student's theoretical knowledge and practical work, as well as his or her relationship with patients.

The requirements for receiving the signature for the 90-hour practice include a minimum attendance rate of 90%, as well as the student’s theoretical knowledge, practical work, and interactions with patients being at least at an acceptable level.
