STUDY PROGRAM

Courses Taught in the 2024/2025 Academic Year

When enrolling for the courses - in order to complete the 360 credits required for the degree - in addition to the obligatory subjects it is recommended to take the obligatory elective and the optional subjects in a proportional manner over the 12 semesters, to ensure that the acquisition of 30 (± 3) credits per semester is achieved.

Based on the decision No. 79/2020 (V.28.) of the Senate, the curriculum of medical training is amended with the following requirement related to the 'principles of professional ethics':

The oath of students enrolling in the first year of the Faculty of General Medicine:

„I,....., student of Semmelweis University promise under oath that I will respect the Hungarian laws and the Fundamental Law of Hungary. I promise that I shall abide by the regulations of Semmelweis University. I promise solemnly that I will respect the professors and teachers of the University, and that my conduct will be in keeping with the honor of my profession. I will keep the secrets of the patients that I learn about in the course of my studies. I will pursue my studies with full sense of responsibility to prepare myself to the best of my abilities for all my duties and obligations in my profession so as to be able to serve with my knowledge the progress of mankind.

Based on the decision No. 47/2022 (VI.23.) of the Senate, the curriculum of medical training is amended with the criterion requirement of completing the obligatory non-credit subject *Semmelweis Symposium* .

From the year 2028 on, the completion of this subject will be a precondition for the issuance of the pre-degree certificate.

Semester	Compulsory /Elective Course	Course Name	Lecture (h/week)	Practice (h/week)	Credits	Prerequisite(s)	Examination	Block education number of weeks

English Language Program

STUDY PROGRAM

Courses Taught in the 2024/2025 Academic Year

Semester	Compulsory /Elective Course	Course Name	Lecture (h/week)	Practice (h/week)	Credits	Prerequisite(s)	Examination	Block education number of weeks
----------	-----------------------------	-------------	------------------	-------------------	---------	-----------------	-------------	---------------------------------

- For students starting their studies in the academic year 2021/2022 or later, a minimum of 4% of the total number of obligatory credits,
- for students starting their studies in the academic year 2020/2021 or before, the number of credits needed to complete the total of 360 credits, excluding obligatory and optional courses

\* Simultaneous enrolment is also possible.

\*\* Completion of the course Physical Education: in the former curriculum it was obligatory in the first 4 semesters, in the new curriculum it is obligatory in all 12 semesters, therefore under the new curriculum, after 20 August 2019, in the 3rd year or higher years, students are required to complete a Physical Education course in each semester.

\*\*\* From the year 2025, it is a precondition for issuing a pre-degree certificate

\*\*\*\* Clinical work: clinical (patient care) credit. 1 credit per semester can be earned by performing productive clinical work for at least 2-3 hours per week. Certification and evaluation can be obtained from the director of the respective clinic/hospital. The credit can be awarded if the director provides a list of the skill(s) acquired.

\*\*\*\*\* TDK work (1 credit): 1 credit for documented and evaluated TDK work (research activity as a registered member of the Students' Scientific Association) that demonstrates genuine effort and is systematic but not outstandingly successful. The 1 credit is awarded to the student if the head of the affected department, based on the opinion of the supervisor, confirms the systematic research activity at the end of the semester.

In addition to the 1 credit, additional credits can be earned as follows:

TDK Conference III. (2 credits): the course recognizes the work of a student who is a presenter at a TDK Conference or submits a paper for the Rector's Award.

TDK Conference I-II. (3 credits): recognition of the work of a student who comes first, second or third in the TDK Conference, or participates in the National TDK Conference, or is awarded first, second or third prize or commendation in the Rector's Award competition.

National TDK Conference and Publication (4 credits): the course recognizes the work of a student awarded a place at the National TDK Conference, or a student who publishes an article as a first author in a professional journal with an international impact factor.

\*\*\*\*\* Demonstrator work:

Demonstrators will receive the following credit points to be included in their training

- 2 credit points if they perform demonstrator activities continuously for 2 semesters,
- 1 credit point if they perform demonstrator activities continuously for at least 1 semester.

When taking the courses Clinical Work and the optional courses Demonstrator Work and TDK Work into account, the three activities together must not result in more than 4 credit points per semester.

If at least two of the three activities are completed in the same training location (institute, clinic, hospital), the supervisor must make a declaration on the separation of tasks.

On the basis of the information obtained from the leaders, the Credit Transfer Committee shall have the right to reduce the number of credits.
