STRUCTURE OF PRESENTATIONS:

An interactive poster presentation competition will be held. Each competitor will give a three-minute presentation, designed to raise awareness and provide an introduction, rather than to explain all the details of the scientific work. Presenting the introductory presentation in English will be an advantage in the evaluation, but is not expected. After listening to all the presentations, a discussion will take place on the printed posters. Here, everyone will have the opportunity to explain in detail the methods and results of the scientific work and to answer questions from the jury. The evaluation of the competitors' work will be based on the presentation and the discussion at the poster session.
