

REQUIREMENTS

Semmelweis University, Faculty of Dentistry Name(s) of the Institute(s) teaching the subject: Department of Languages for Specific Purposes
Name of the subject: Medical Terminology (German language program) Credits: 2 Total number of hours: lectures: practices: <u>seminars:</u> 28 Type of the course (mandatory/elective): elective course
Academic year: 2022/2023
Code of the course: FOKVNYE345_1N
Course director (tutor): Katalin Fogarasi PhD Contact details: Department of Languages for Specific Purposes (1094 Bp., Ferenc tér 15.), + 36-20-670-1330 Position: director Date of habilitation and reference number:
Aim of the subject and its place in the curriculum: The aim of this course to help students understand the basic anatomical and clinical terminology. In the course, students get familiar with the structures and meanings of the most important Greek-Latin terms, which supports the comprehensible learning of anatomy and later clinical subjects. Terms for diagnoses and procedures are demonstrated by authentic medical and dental documents. In addition, students get acquainted with the basic linguistic phenomena required for diagnostic skills.
Location of the course (lecture hall, practice room, etc.): Department of Languages for Specific Purposes: 1094 Budapest, Ferenc tér 15.
Competencies gained upon the successful completion of the subject: After completing this course, students will - know the definition and various levels of medical and dental language, terminology and nomenclature - know the language demand of various fields of medical studies - know the linguistic structure of the medical vocabulary of Greek and Latin origin - know how to compose perfectly clear terms of high level - be able to understand medical and dental language - be able to understand and use anatomical names - be able to use elementary clinical and pathological diagnoses According to the demand of each group and the updates in the university curriculum, minor changes can be made in the schedule which do not affect the definite topics of the course.
Prerequisite(s) for admission to the subject:
Minimum and maximum number of students registering for the course: 7-20 Student selection method in case of oversubscription: no
How to register for the course: through NEPTUN system
Detailed thematic of the course: Week 1: Skills: history of the medical terminology; differences between the anatomical and clinical terminology; structure of the anatomical and clinical terms

Vocabulary: anatomical planes and directions; planes and directions in the oral cavity

Week 2: Skills: Part-whole theory in the anatomical nomenclature

Vocabulary: terms of the body regions; terms of the bones of the upper and lower extremities

Week 3: Skills: attribution in the anatomical nomenclature; relations, shapes

Vocabulary: terms of the bone connections, detailed terminology of the skeletal system

Week 4: Skills: attribution in the anatomical nomenclature, orthognathic surgery diagnoses

Vocabulary: terms of the bones and bone connections of the skull; basic terms of orthognathic surgery

Week 5: Skills: terms of the teeth; plural forms in anatomy and in clinical documentation

Vocabulary: terms of the teeth and parts of the teeth; detailed terminology of the skeletal system

Week 6: Skills: basic terms of common symptoms and locations of lesions and degenerations in the clinical and dental practice

Vocabulary: terms of the clinical diagnoses; anatomical names of the muscles and articulations of the pectoral girdle

Week 7: 1st midterm

Skills: Distinguishing types of medical documentation; location of lesions and medical interventions in the clinical and dental diagnoses

Vocabulary: anatomical names of the articulations and muscles of the upper extremity

Week 8: Skills: parallel terms in the anatomical and clinical names; basic clinical terms

Vocabulary: terms of the symptoms and inflammations; anatomical terminology of the pelvis and the lower limb

Week 9: Skills: parallel terms in the anatomical and clinical names; basic terms of dentistry (symptoms, lesions, degenerations, interventions)

Vocabulary: anatomical and clinical terminology of the head and the cervical region

Week 10: Skills: analysing basic terms of embryology and clinical diagnoses; complex anatomical names

Vocabulary: terms of the musculus risorius and masseter

Week 11: Skills: analysing complex anatomical names; phrases expressing relations and shapes in the anatomical names

Vocabulary: terminology of the trunk

Week 12: Repetition; analysing anatomical and clinical terms in authentic context

Week 13: 2nd midterm

Week 14: Evaluation

Potential overlap(s) with other subjects: -

Special training activities required: -

Policy regarding the attendance and making up absences:

Attendance of lessons is obligatory. Students are allowed to have maximum 3 absences a semester. A medical certificate is required if the student has been absent more than 3 times.

In case of more absences, the teacher may deny giving the signature. There is a possibility to make up for absences during the current school week after prior consultation with the instructor.

Means of assessing the students' progress during the semester:

Midterms 1 and 2 (week 6 and 13 resp.)

After prior consultation with the teacher, students can retake a midterm, out of the hours of the lesson.

Requirement for acknowledging the semester (signature):

According to the Study and Examination Policy: 75% practice class attendance, and attendance on midterm is required for signature.

Type of the examination: practice mark

Exam requirements: -
Type and method of grading: The evaluation of student performance is based on the points for the 2 written papers: 90 – 100% = excellent (5) 75 – 89% = good (4) 60 – 74% = average (3) 50 – 59% = satisfactory (2) 0 – 49% = unsatisfactory (1), signature denied
How to register for the exam: -
Opportunities to retake the exam: -
