CENTRE FOR TRANSLATIONAL MEDICINE

PROGRAM SUMMARY

BASIC INFORMATION ABOUT THE PROGRAM

ONE SCHOOL
FIVE COURSES

**AT THE END OF THIS SUMMER SCHOOL,
THE PARTICIPANTS WILL BE ABLE TO**

- Acquire knowledge in translational medicine
- Critically appraise the scientific literature
- Understand the main modern clinical scientific methodologies
- Perform healthcare delivery science
- Conduct independent research work

WINTER EDITION 2026/ 2027

Application deadline	Interview period	Acceptance by	Course fee payment by	Course period (4 weeks)
November 20	December 1-3	December 4	December 13	Jan 18 - Feb 12

SUMMER EDITION 2026/ 2027

Application deadline	Interview period	Acceptance by	Course fee payment by	Course period (4 weeks)
May 2, 2026	May 10-13	May 14	May 28	Jun 21 - Jul 16

COURSE DIRECTOR

Péter Hegyi, MD, PhD, DSc, MAE

ORGANISERS

The **SUMMER SCHOOL** is organized jointly by the **Centre for Translational Medicine**, Semmelweis University and the Translational Medicine Foundation.

TUITION FEES

- Application fee: **75 €** / person or **350 €** / group

COURSE FEE STARTING FROM 2.070 €

INTRODUCTION

OF THE COLLABORATING INSTITUTES

SEMMELWEIS UNIVERSITY

Semmelweis University's history dates back more than 250 years, to 1769. Today SU is one of the leading institutions of higher education in Hungary and the Central European Region in the field of medicine and health sciences. At SU, our core commitment is based on the integrity of education, research, and medicine that makes the University an internationally recognised centre of excellence.

TRANSLATIONAL MEDICINE FOUNDATION

The **Translational Medicine Foundation** aims to facilitate the application of scientific results and innovations in healthcare. It promotes data exchange among universities, hospitals, and research centers to improve the quality and efficiency of multicenter research, while supporting both professionals and the public in implementing evidence-based knowledge through various platforms. The Foundation also organizes conferences and training programs and provides support for research services and human resource selection.

THE HISTORY

OF TRANSLATIONAL MEDICINE IN HUNGARY

The **Translational Medicine (TM)** “learning by doing” education model was launched at the University of Pécs in Hungary in 2016 under the leadership of Péter Hegyi. Between 2016 and 2021, almost 50 PhD students and residents have participated in our programs. During this period, more than 300 high-quality publications have been published through scientific research and translational patient care initiatives with support from the **Translational Medicine Foundation**, the University of Pécs, the University of Szeged, and Semmelweis University.

The results have enabled the development and supplementation of several treatment guidelines, allowing for the immediate application of scientific findings in patient care ([Nature Medicine](#) - click on link).

Semmelweis University (SU) aims to rank among the world's best universities and recognize the importance and high potential of translational medicine. Therefore, in 2021, this program was invited to function on a much bigger scale than before, now under the umbrella of Semmelweis University. As a result, the training at SU has already enrolled almost 600 PhD and MSc students and more than 200 undergraduate research students.

THE IMPORTANCE OF TRANSLATIONAL MEDICINE

The key goal of **Translational Medicine (TM)** is to transform scientific discoveries into tangible benefits for communities. This is crucial because scientific findings are currently underutilized in everyday medical practice, limiting their potential to save lives. In 2016, 1.7 million people under the age of 75 died in Europe, **and 1.2 million of these deaths could have been prevented** with effective public health interventions and better use of medical research.

Recognizing this, **Academia Europaea** launched a groundbreaking project in 2018 to speed up the application of scientific knowledge for the public good. Leading researchers, journal editors, and academic experts came together to develop the TM cycle—a model designed to close the gap between science and clinical practice. The **TM cycle** focuses on generating new scientific insights, making them accessible to healthcare providers, and communicating them effectively to the broader public. This approach aims to deliver more efficient, cost-effective healthcare—and that's where our summer school comes in.

By attending this program, you'll gain hands-on experience with the TM cycle, learning how to apply cutting-edge research directly to patient care. You'll work alongside international experts, growing your professional network and contributing to the future of global healthcare innovation. Join us to help make a real-world impact by transforming research into life-saving solutions.

Don't miss the chance to join the movement to improve healthcare for everyone!

SUMMER SCHOOL PROGRAM

WHAT WE OFFER

The **SUMMER SCHOOL** mainly focuses on the second and third steps of the TM cycle. The program helps students to become critical consumers of medical research papers, to gather primary data on health issues through questioning and observation, and to conduct biomedical research. Students will gain an understanding of the planning of clinical research, including systematic reviews, patient registries, and clinical trials, by designing and extending projects in study groups, which are led by experienced members of the TM Centre.

THE THREE PILLARS OF THE PROGRAM

HARD SKILL

SOFT SKILL

BIOSTATISTICS

THE SUMMER SCHOOL FOCUSES ON THE MAIN MODERN HEALTHCARE DELIVERY SCIENTIFIC METHODOLOGIES OF TM

- 1. Systematic Reviews and Meta-Analysis:** Learn the essentials of meta-analyses and their role in evidence-based medicine, including designing systematic search strategies, reading forest plots, and assessing the validity of findings.
- 2. Patient Registries:** Explore the practical aspects of developing and managing patient registries, from planning and IT infrastructure to data management, ethical approvals, and publication.
- 3. Clinical Trials:** Gain an overview of experimental study designs, focusing on study planning, randomization, bias, and interpreting cause-effect relationships in clinical research.
- 4. Biostatistics:** Understand the basics of statistical methods in medical sciences, including hypothesis testing, survival analysis, and ROC curve analysis to better interpret scientific data.
- 5. Soft Skills in Clinical Research:** Focus on critical soft skills such as time management and presentation skills, which are essential for effective clinical research and professional development.

KEY OUTCOMES

- Learn core concepts of healthcare delivery science and translational medicine.
- Gain practical experience in setting up patient registries, clinical trials, and systematic reviews.
- Master formulating clinical questions and sourcing reliable evidence using the PICO model.
- Critically appraise clinical research using evidence-based methods.
- Develop essential soft skills like time management, communication, and presentation.

SCHEDULE AND CLASSES

Please note that the daily schedule is subject to adjustments as needed to enhance the learning experience. We will inform participants in advance of any changes to ensure a smooth and flexible course flow.

SYSTEMATIC REVIEWS AND META-ANALYSIS					
GMT +1	MON	TUE	WED	THU	FRI
8:00	Course introduction	E-learning introduction	Types of systematic reviews	E-learning introduction	Data types and extraction
9:00	Translational Medicine	E-learning		Framing your research question	
10:00	Introduction to the main courses				
11:00			Data analysis		
12:00					
13:00				Article writing	
14:00					

BIOSTATISTICS					
GMT +1	MON	TUE	WED	THU	
8:00	Course and e-learning introduction	Data types	Statistics in meta-analysis	Data types and extraction	
9:00		Probability			
10:00	E-learning	Descriptive statistics	E-learning	Data analysis	
11:00		Parametric and non-parametric tests			
12:00		Comparing qualitative data		Interpreting results	
13:00		Correlation analysis			
14:00		Q&A		Q&A	
15:00					

PATIENT REGISTRIES				
GMT +1	MON	TUE	WED	THU
8:00	Course introduction	The purpose and rationale of the registry	Course introduction	Running and analyzing a patient registry
9:00	E-learning	Structured data collection	E-learning	Patient enrollment
10:00				Feasibility, exploratory data analysis
11:00		Bias in registry analysis		Descriptive statistics
12:00				
13:00		Ethical approval		Article writing
14:00		Resources		
15:00		Q&A		Q&A

CLINICAL TRIALS				
GMT +1	MON	TUE	WED	THU
8:00	Course introduction	Clinical research types	Course introduction	Maintaining a study, quality assurance
9:00	E-learning	Observation studies and bias	E-learning	Closure of a clinical study
10:00				Data types and analysis
11:00		Interventional studies and bias		
12:00				Article writing
13:00		Ethical considerations		
14:00				Q&A
15:00				

APPLICATION

HOW TO JOIN OUR PROGRAM

CLICK HERE
OR SCAN THE
CODE TO APPLY

COURSE INFORMATION

TARGET AUDIENCE

- Degree/ studies in health sciences (Candidate, BSc, MSc, MD, DMD, etc.) is preferred.
- Good English communication skills are recommended (minimum B2 level; see details [here](#)).

PARTICIPANT LIMIT

To preserve efficacy, the course will start with a **minimum** of 12 attendees.

STUDY LOAD

8 hours of course, including a 1-hour lunch break per day.

Each day, the course starts at 8 AM (GMT+1)

REQUIRED DOCUMENTS

For this course, you are required to upload the following documents when applying:

- Motivation Letter
- CV
- An application with proof of payment of the application fee must be submitted by the application deadline. In the event of transfer difficulties, an electronic certificate is also acceptable.

IMPORTANT DATES

- Deadline for application - **November 20, 2026 / May 2, 2027**
- Interview period - **December 1-3, 2026 / May 10-13, 2027**
- Acceptance by - **December 4, 2026 / May 14, 2027**
- Course fee payment by - **December 13, 2026 / May 28, 2027**
- Course period (4 weeks) - **Jan 18 - Feb 12, 2027 / Jun 21 - Jul 16, 2027**

RESPONSIBILITIES OF THE CENTRE FOR TRANSLATIONAL MEDICINE

The Centre will provide access to the training materials in case of successful recruitment, but this does not cover the technical requirements for access, in particular a stable internet connection and computer equipment. The application fee covers the costs of the application procedure, and the Centre does not undertake to reimburse the costs of unsuccessful applications. Students who are successfully admitted will be offered a training contract by the Centre. Hungarian law will apply to the application process and the training as a whole.

FINANCING INFORMATION

COSTS

- Application fee: **75 €** / person
- In case of group registration larger than 10 participants **350 €** / group
- Individual registration: **2.760 €** / person*
- Course fee (in case of in-person participation):
 - 12-25 participants: **2.760 €** / person
 - 25-40 participants: **2.550 €** / person
 - 41-60 participants: **2.300 €** / person
 - 61 or more participants: **2.070 €** / person
- For groups: **20%** discount in case of online participation, **+20%** in case of a different time period (in case of 12+ participants)

Students are expected to cover:

- Round-trip air transportation
- Health insurance
- Medical liability insurance
- Living expenses
- Cost of general medical examination and vaccines

PAYMENT

After you have completed the registration form [here](#), you will receive the payment details via email.

*Please note that upon individual registration, the course will only start if there are at least 12 participants.

TODAY**

IT ASSISTANCE

IMPORTANT HELP

In case of online course, Zoom will serve as our online communication platform. To ease the use of the software, our admin will be there to provide help where needed.

What you are going to need:

- Zoom account
- Stable internet connection

Please arrive to the Zoom meetings **20 minutes prior** to the session time.

Security is a key aspect of Zoom meetings, so for your safety a passcode will be sent alongside the classes' link. Also, there will be other measurements adding an additional layer of security, for example preventing you from unmuting or renaming yourselves during a lesson, in order to limit distractions.

Never share your meeting ID or passcode publicly (such as on social media).
