Objectives of the subject, its place in the medical curriculum: Traumatology as a specialty deals with the treatment of injured patients, independent of the injured organ, patient's age or previous diseases. In developed countries, the 4-5th leading cause of death is injury, while in the actively working population, the rate of death is even higher. Morbidity in children and in the elderly is also high. Traumatology treatment for the most part deals with extremity surgery in correlation to orthopedics, however cranial, thoracal, abdominal, spinal and pelvic injuries as well as the treatment of polytraumatized patients also belong to the field of trauma care.
Place where the subject is taught (address of the auditorium, seminar room, etc.): <ul style="list-style-type: none">• Uzsoki Hospital, Department of Orthopedics-Traumatology, Conference room (ground floor) 1145 Budapest, Uzsoki street 29-41.• Dr. Manninger Jenő Traumatology Center, Conference room (8th floor) 1081 Budapest, Fiumei street 17.
Successful completion of the subject results in the acquisition of the following competencies: During practices, students will have the opportunity to learn the following: physical examination of injured patients, bandaging, suturing, casting techniques, and the uses of orthesises and splints. Students will have the opportunity to enter the operating theater, scrubbing, and become acquainted with special instruments used in Traumatology. Consultation of typical and the more frequent trauma cases, radiologic diagnostics, as well as

videos in the operative theater are also part of the curriculum. During on duty shifts, students will have an opportunity to examine and participate in the trauma care of patients under supervision.
